CRIME* collocates, MI-sorted, min freq 3

Note: MI stands for Mutual Information, which is a statistical measure of the association between two linguistic units (here words). A high MI score indicates a strong association beyond what would be expected by chance. We are treating the MI score as more significant than raw frequency and therefore sort the collocates by size of MI score rather than frequency.

Rank	Frequency	Left	Right	MI	Collocate
1	4	1	3	16.153	inexpiable
2	3	0	3	15.738	leze
