noteconsent	**Consent** Greetings, My name is **[interviewername]** and I work for DAI Research and Advisory Services. I am approaching you for a study being conducted by researchers at Harvard University, USA. The study is focused on the social and economic impact of government welfare programs for agriculture. We invite you to take part in this study because you are the village sarpanch. This study is being done to understand how welfare policies and programs affect the economic circumstances of people involved in agriculture, as well as the social fabric of the village. This is important to understand because, as you know, most people in India live in villages and rely on agriculture for their livelihood. I would like to ask you some questions about your village, including questions about the village population, infrastructure, agriculture, and welfare programs. Your participation will take about 20 minutes of your time. Your participation is completely voluntary. You can decide to participate or not participate. You can skip any questions that you do not want to answer. You can stop this survey at any time. You can also ask me any questions that you have about the study. We are approaching officials in many villages in Telangana and Andhra Pradesh to participate in this study. Your answers will be combined with the answers of other people in Telangana and Andhra Pradesh, and only overall results will be used for research. They will be coded and stored on a secure server only accessible to the researchers. The risk to you from participating in this study is minimal. Please also note that parts of the survey may be audio recorded for internal quality control purposes. These recordings will be deleted as soon as quality checks are complete. There will be no direct benefits to you from participating in this study. Your participation may indirectly benefit others through any conclusions reached by the study on how people engaged in agriculture can be better supported. If you have questions, concerns, or complaints, please contact [supervisor name], an employee of [survey firm name], at [insert number]. You can also contact Akshay Dixit, a researcher at Harvard University, at akshay_dixit@g.harvard.edu. This research has been reviewed and approved by the Harvard University Area Institutional Review Board (“IRB”). The Institutional Review Board is a group of people who review research studies for the safety and protection of the people who take part in the studies. You may contact them at cuhs@harvard.edu if your questions are not being answered by the research team, you have questions about the study and your rights as a study participant, or if you cannot reach the research team.

notesec8	**Request for contact information for sample households** Thank you for your answers, we are just approaching the end of this interview. Now I would just like to ask you for directions in this village. We will do a survey of some households in this village, to understand the social and economic impact of government welfare programs for agriculture. We want to make sure we capture the views of different kinds of people, including those who are farmers owning land, and those who are leasing land or working as laborers. Since we cannot talk to everyone in the village, the researchers doing this study have used the voter list to randomly select some people to survey. The selection is totally random and based on the serial number in the voter list. Here is the list of people randomly selected by the researchers. Can you please help me by telling me where they live? Please also share their contact number if you can. **Thank you for your time!**
