This folder contains replication files for the analysis—including the robustness checks—for *Intergroup Boundaries and Removal Decisions*, namely:

***output* (folder)**

- Directory for analysis output.

matter_ab_main_analysis.do

- Code to analyze effect of *Matter of A-B-* on removal decisions.
- Generates statistics for Tables 3 and 4 and Figures 3 and 4.
- Uses *matter_ab_replication_data.dta*.

matter_ab_replication_data.dta

- Data set containing removal proceedings analyzed by *matter_ab_main_analysis.do*.

matter_ab_robustness_checks.do

- Code to conduct robustness checks on analysis of the effect of *Matter of A-B-* on removal decisions.
- Uses *matter_ab_robustness_data.dta*.

matter_ab_robustness_data.dta

- Data set containing removal proceedings analyzed by *matter_ab_robustness_checks.do*.

pandemic_main_analysis.do

- Code to analyze effect of COVID-19 pandemic effect on removal decisions
- Generates statistics for Tables 1 and 2 and Figures 1 and 2.
- Uses *pandemic_replication_data.dta*.

pandemic_replication_data.dta

- Data set containing removal proceedings analyzed by *pandemic_main_analysis.do*.

pandemic_robustness_checks.do

- Code to conduct robustness checks on analysis of the effect of COVID-19 pandemic on removal decisions.
- Uses *pandemic_robustness_data.dta*

pandemic_robustness_data.dta

- Data set containing removal proceedings analyzed by *pandemic_robustness_checks.do*.

replication_codebook.pdf

- Contains descriptions of variables used in *matter_ab_main_analysis.do* and *pandemic_main_analysis.do*.
