think in the cases of Mayo, Alice and Myriad, the USPTO made a great distinction between what can patentable of inventions and discoveries and what is not

I think in the cases of Mayo, Alice and Myriad, the USPTO made a great distinction between what can be patentable which include any discoveries and inventions, which are not part of nature and those unpatentable, even human genes (BRCA1 and BRCA2), to further science and medicine and always other scientist to have a chance to work on the discovery.
