README for the Replication Package for "Top Wealth in America: New Estimates under Heterogeneous Returns"

Matthew Smith, Owen Zidar, and Eric Zwick

August 24, 2022

1 Analysis Code README

This folder contains the do-files that conduct the analysis found in "Top Wealth in America: New Estimates under Heterogeneous Returns." Note that the paths still need to be adjusted given the structure of this replication package, but generally, `programs.do` contains helper programs that are used to import data, `draft_final.do` conducts the main analysis and produces the figures found in the paper, and `appendix_final.do` reproduces appendix figures and tables. The code can all be run by running `master_final.do` which configures the Stata environment and calls `master.do`, which in turn calls the other do-files.
