Random Forest Model

Degree centrality(actor B)
Degree centrality(actor A)
Cumulative conflictual events
Cumulative cooperative events
Minimum distance (log)
Ideal point distance
Conflictual events
Low State fragility index
High GDP per capita (log)
Military expenditures ratio, change
Low number of BAAD groups
Low GDP per capita (log)
Ideal point distance, change
Cooperative events
Military personnel ratio, change
Trade dependence
High State fragility index
Low Regime durability
High Regime durability
GDP ratio
Military personnel ratio
Military expenditures ratio
Low democracy
GDP ratio, change
High number of BAAD groups
High democracy
Trade dependence, change
Low democracy, change
High democracy, change
