This folder contains the data and programs necessary for reproducing the results in the paper "Complexity and Sophistication."

There are two data files and two do-files:

- The data file "main_data.dta" contains the data necessary to generate all tables and Figure 1. The data file "figure_2.dta" is necessary to generate Figure 2

- The do-file "analysis.dta" contains the programs necessary for generating all the results in the paper except for Table 8.

    - The do-file "table_8.do" generates the results shown in Table 8. The utility function has to be specified in line 7 of the code. If the utility function is CES, the CES parameter has to be specified in line 8 of the code.
