START National Consortium for the Study of Terrorism and Responses to Terrorism

A CENTER OF EXCELLENCE OF THE U.S. DEPARTMENT OF HOMELAND SECURITY BASED AT THE UNIVERSITY OF MARYLAND

WORLDPUBLICOPINION.ORG

METHODOLOGY

The questionnaire was developed by researchers drawn from the START team. Questionnaires were initially translated by the research agencies in each country and then back-translated by native Arabic, Indonesian, and Urdu speakers working with the research team. Differences were reconciled with the agencies in each country.

Interviewing was conducted face-to-face in respondents' homes using probability-based samples by experienced survey agencies in each country. Gender matching of interviewer and respondent was implemented as needed based upon the judgments of the research agencies.

The survey in Morocco was conducted December 9 – 19, 2006 among 1,000 adults 18 years and over. A multistage national probability sample was conducted in both urban and rural areas covering approximately 79 percent of the Moroccan population.

The survey in Pakistan was conducted among 1,243 Pakistanis between January 15 – February 15, 2007 employing a multi-stage probability sample that represented both urban and rural areas.
