Project Code: UNCA0002_w2
Project Name: Racial and Ethnic Minorities 2-Wave Panel
Prepared for: Marc Hetherington and Rahsaan Maxwell
Interviews Wave 1: 1300
Interviews Wave 2: 858
Field Period Wave 1: October 20, 2020 - November 02, 2020
Field Period Wave 2: December 1, 2020 - December 13, 2020
Project Manager: Sam Luks - 650.462.8009
================================================================================
YouGov originally interviewed 1,483 Black and Hispanic respondents in wave 1 who were
then matched down to a sample of 1,300 (650 each) to produce the final dataset. The
respondents were matched to a sampling frame on gender, age, race, and education. The
frame was constructed by stratified sampling from the full 2018 American
Community Survey (ACS) 1-year sample with selection within strata by weighted
sampling with replacements (using the person weights on the public use
file). YouGov then re-interviewed 858 respondents for wave 2.

In this second wave, these 858 respondents were weighted to the sampling frame using
propensity scores. The matched cases and the frame were combined and a logistic
regression was estimated for inclusion in the frame. The propensity
score function included age, gender, race/ethnicity, years of education,
and region. The propensity scores were grouped into deciles of the
estimated propensity score in the frame and post-stratified according to
these deciles.

The weights were then post-stratified on 2016 Presidential vote choice, and
a four-way stratification of gender, age (4-categories), race (4-categories), and
education (4-categories), to produce the final weight.
