COMMODITY MASTERS

Ceneral Description:

The Harmonized Commodity Master is a data tape containing a single file of commodity descriptions, classifications and cross classification needed to implement the conversion to the HS systems effective with January 1989 statistical data. Included with this package is an order form to purchase this tape. The file consists of eight separate sections each identified by a one-digit code located in the first position of the data record. All data records are fixed length of 248 characters each. The entire file is in sequence by the indicator code and the commodity number. The eight sections and the data elements associated with each section are as follows:
