Thank you for participating in this YouGov Survey. This survey asks about your opinions on economic and political issues facing the United States.

This survey is being conducted by YouGov. The study will help researchers understand what people are thinking about contemporary issues. Your response to this survey, or any individual question on the survey, is completely voluntary. You will not be individually identified and your responses will be used for statistical purposes only. Respondents who have completed the survey can win up to three $100 Amazon vouchers.

If you have questions about your rights as a participant in this survey, or are dissatisfied at any time with any aspect of the survey, you may contact YouGov at help.us@yougov.com

We will raffle an additional two $100 Amazon vouchers among all respondents that have completed the survey. The ultimate value of the voucher depends on your decision on the following: If you win a voucher, you can decide to increase the value of the second voucher that another person has won. You can give any amount between 0 and 100 dollars by which the value of your voucher will be decreased. Each dollar that you decide to give to the other individual will be doubled. This means that if you decide to give, say, $$q2_amount1, the other person will receive $$q2_amount2 and you will receive $$q2_amount1b. Likewise, if the other person decides to give, say, $$q2_amount3, you will receive $$q2_amount4 and they will receive $$q2_amount3b.

Page: q2_2c_page

Now suppose you knew how much the other winner of the voucher was going to contribute. Please indicate how much you would like to give if the other winner of the voucher gives the following amount? Remember that any amount that you decide to give to the other winner is doubled.

Most countries around the world are currently discussing the possibility of agreeing to new policies that would address the problem of global warming. We are interested in what you think about these international efforts and the United States's possible participation in such an agreement.

We will now provide you with several examples of what agreements between countries to address climate change could look like. We will always show you two possible agreements in comparison. For each comparison we would like to know which of the two agreements you prefer. You may like both alternatives similarly or may not like either of them at all. Regardless of your overall evaluation, please indicate which alternative you prefer over the other.

In total, we will show you four comparisons. People have different opinions about this issue and there are no right or wrong answers. Please take your time when reading the potential agreements. In addition to deciding which climate agreement you would prefer, we also ask you how likely you would be to vote for or against the United States joining each agreement in a referendum.

The figure below shows the features of the two possible agreements that you will be choosing between. Note that the order of the features may vary.

Experts suggest that it is less costly to reduce greenhouse gases in less developed countries than in the United States. For example, it is possible to reduce the same amount of greenhouse gases in these countries at $q5_insert percent of the cost that would be required in the United States. To take advantage of this possibility the United States would have to transfer money to other countries to reduce greenhouse gases.
