Group Proximity Data Description

GroupAgreementsByGroup.xlsx:

Microsoft Excel file with processed data, listing group proximities for each group before and after deliberation, the difference of the these group proximities, and the group size

tafelXX – 75.csv (XX = group number):

Raw data for group XX. Open in Excel by choosing File -> Import, CSV file, Delimited, then check 'Comma' as a delimiter and Finish.

Tafel nummer = group number

Alternatief [ABCD] = Solution [ABCD]

Deelnemer X = Participant X

Totaal = Total

G1000Analysis.Rmd:

R Markdown script to process the raw data and produce a report.

Change "~/G1000 data/" in line 8 of the script to the directory containing the tafelXX – 75.csv files.

Requires R and RStudio set up to knit it into a pdf file (see https://rmarkdown.rstudio.com/authoring_quick_tour.html). Also requires the ConsRank and knitr packages to be installed in R.
