Explaining Women's Skepticism toward Artificial Intelligence:

The Role of Risk Orientation and Risk Exposure

PNAS Nexus

Sophie Borwein, Beatrice Magistro, R. Michael Alvarez, Bart Bonikowski, and Peter Loewen

Below is the variable list for the AI.csv dataset:

Variable	Description
risks_AI_avg	0 to 10, with 10 strongly disagree that AI benefits > AI risks and 0 strongly agree. It's the average answer to this question for you personally and for your community.
support_company	Do you support or oppose the company's decision to adopt new generative AI tools? 1 = strongly disagree to 5 = strongly agree.
gender_bin	Binary gender: Man or Woman.
trait_risk	Binary: certain or risky. Whether respondent chose certain or risky outcome in the lottery question: "Suppose you participate in a TV show. The host offers two options. Both would be paid right away in cash. Which one would you choose? (1) Winning $1,000; (2) Winning $2,000 with a probability of 50% and $0 with a probability of 50%."
educ_short	1 = university or postgraduate; 0 = otherwise.
percent_job_gain	Experimental condition: whether the probability of net job gains after adopting AI is 30%, 50%, 70%, or 100%.
objective_threat	TLRA measure (see Supplementary Materials). Range: 0 to 1.Higher = more exposed to automation.
age_group	Age categories: 18 to 29, 30 to 44, 45 to 64, or 65 or older.
education	Education level: HS or less, Some college, University, or Postgrad.
country	Country: US or Canada.
manipulation_check2	Manipulation check: Pass or Fail.
weight	YouGov survey weights.

Below is the variable list for the dat_benefits_text.csv dataset:

Variable	Description
benefits_text	Open-ended question: what do you think are the biggest benefits of AI/automation?
gender_bin	Binary gender: Man or Woman.
gender_cat	Categorical gender: Man, Woman, Non-binary.

Below is the variable list for the dat_risks_text.csv dataset:

Variable	Description
risk_text	Open-ended question: what do you think are the biggest risks of AI/automation?
gender_bin	Binary gender: Man or Woman.
gender_cat	Categorical gender: Man, Woman, Non-binary.
