Statement on Restricted Access to Data for "Income changes do not influence political involvement in panel data from six countries"

September 24, 2021

In our manuscript "Income changes do not influence political involvement in panel data from six countries" we use nine panel data sets from six countries. Unfortunately, these data sets are not freely available and can be acquired in most cases only if access is granted by the issuing institution. In particular, the following actions need to be pursued prior to getting access to the data.

1. Data access requirements

   - BHPS & UKHLS: Registration at UK Data Service and signing of an End User Licence (`https://www.ukdataservice.ac.uk/get-data/how-to-access/conditions/eul`)
   - GLES: Registration at GESIS (`www.gesis.org`), agreement with terms of use (`https://www.gesis.org/fileadmin/upload/dienstleistung/daten/umfragedaten/_bgordnung_bestellen/2018-05-25_Benutzungsordnung_GESIS_DAS.pdf`)
   - GSS: Free download, agreement with terms of use (`http://gss.norc.org/terms-and-conditions`)
   - LISS: Registration at LISS Data Archive and signing of LISS panel Data Statement (`https://statements.centerdata.nl/liss-panel-data-statement`)
   - NLSY97: Registration at NLS Investigator (`https://www.nlsinfo.org/investigator/pages/login`)
   - POLAT: acquired by personal conversation with Eva Anduiza (PI, `eva.anduiza@uab.cat`), signing of a user agreement
   - PSID: Registration at Michigan Institute for Social Research (`https://simba.isr.umich.edu/data/data.aspx`), agreement with conditions of use (`https://simba.isr.umich.edu/U/CondUse.aspx`)
   - SHP: Registration at FORSbase (`https://forsbase.unil.ch/`), signing of a user contract

- SOEP: Signing of Agreement with DIW Berlin (https://www.diw.de/en/diw_01.c.601584.en/data_access.html), signing of data protection template (https://www.diw.de/documents/dokumentenarchiv/17/diw_01.c.38367.de/soep_dsform_de.pdf)

2. Explanation of the conditions under which the data will be made accessible

   As per requirement by the individual institutions issuing the data, it is not possible to make the data available for other researchers. As data access is free though, researchers can independently request access to the data at those institutions. All syntax, questionnaires and supporting material will be made available at the Harvard Dataverse and according to the EJPR Replication Data Policy.

   We provide replication syntax and materials for all datasets. This includes a detailed description which and how data was downloaded/acquired, which variables for which years were used and how they were recoded. In all instances, data access will be granted within a few days (if necessary) and scholars can use our materials to reproduce the tables and figures in the text and appendix. The materials can be found at:

   Jungkunz, Sebastian (2021): Replication Material for "Income changes do not influence political involvement in panel data from six countries", https://doi.org/10.7910/DVN/LPEDMN, Harvard Dataverse.
