Mentoring and schooling decisions: Causal evidence

Armin Falk, Fabian Kosse and Pia Pinger

This document explains how to reproduce the results from " Mentoring and schooling decisions: Causal evidence" published in the Journal of Political Economy.

The file “data_schooling.dta” contains the dataset (STATA format). For details on the variables, please see the respective labels and the descriptions in the paper.

The file “do_schooling.do” contains the STATA code to analyze the data and reproduce the results presented in the paper. The analyses presented in the paper were conducted using STATA 17.0.
