This document describes the replication files for **"Watering Down Environmental Regulation in China,"** by Guojun He, Shaoda Wang, and Bing Zhang.

Structure:

Each replication folder contains data and codes that are necessary to reproduce a table or a figure in the paper. The codes should be self-explanatory.

Permissions:

Both the ASIF and the ESR are proprietary datasets, and cannot be shared in their raw forms, per the request of the data providers. Therefore, we remove firm identifiers and any other information that may reveal specific firms, and provide only the relevant variables, which are sufficient to replicate all the results in our paper.

To access the original versions of these datasets with firm identifiers, please contact the National Bureau of Statistics of China, and the Ministry of Ecology and Environment of the People's Republic of China, respectively.
