Activity Report

Training Course on Quality Wheat Seed Production

5 August 2014: Fergana, Uzbekistan Fergana Valley Action Site
16 October 2014: Khujand, Tajikistan, Fergana Valley Action Site

Organized by
CRP Dryland Systems
International Center for Agricultural Research in the Dry Areas
Central Asia and the Caucasus Regional Program

Tashkent, Uzbekistan

Training course

A one day training course on "*Quality Wheat Seed Production"* for the farmers and specialists in seed production system was organized by ICARDA on 5 August 2014 in Fergana, Uzbekistan and on 16 October in Khujand, Tajikistan. The training course was organized within the framework of CRP-DS activity on "Seed Systems" in the Fergana Valley Action Site in Central Asia.

In Fergana, Uzbekistan, the event was jointly organized by ICARDA-CAC, Regional Administration in Fergana Province, Uzbekistan, and Uzbek Research Institute of Plant Industry.

In Khujand, Tajikistan, the event was jointly organized by ICARDA-CAC, District Administration of B. Gafurov District, Tajikistan, and Tajik Farming Institute.

Objective:

- Strengthening seed producers' capability in the production of different classes of wheat seed by providing related technical information

Course contents

- Existing wheat seed systems in terms of production, processing, quality testing, and storage
- Salient features wheat quality seed and important considerations in its producing
- Recommended package of production practices (variety, land preparation, seeding date and rate, fertilization, irrigation, plant protection, weed control, rouging, harvesting, post-harvest care, transportation to processing plant, etc) for quality wheat seed production.

Course delivery:

Fergana, Uzbekistan

Dr. Amir Amanov, Director of Uzbek Research Institute of Plant Industry highlighted the current status and constraints to quality wheat seed production in Uzbekistan.

Dr. Ram Sharma of ICARDA outlined the objective of the course and presented salient features of quality wheat seed, different classes of seed, and practical considerations for producing quality seed.

Prof. Nasreddin Khalilov from Samarkand State University explained different requirements in terms of agronomic practices, varietal genetic purity, physical purity, germination and vigor.

The participants were encouraged and involved in discussion during and after presentations. Lively discussions took place where the participants asked questions, shared their experiences, and discussed the constraints in seed system. The experts appreciated the questions by the farmers and provided answers.

Khujand, Tajikistan

Dr. Saidjamol Saidov (Senior Researchers) from Tajik Farming Research Institute introduced the course and highlighted the present status of wheat seed production in Tajikistan.

Dr. Ram Sharma of ICARDA outlined the objective of the course and presented salient features of quality wheat seed, different classes of seed, and practical considerations for producing quality seed.

Subject matter specialist Dr. K. Obidov and Dr. S. Suyarova from Dushanbe presented agronomic and plant protection aspects of wheat seed production in Tajikistan.

Participants:

The participants included primarily farmers involved in wheat seed production, seed certifying agencies, experts from seed testing laboratories, researchers, and policy makers from the seed sector in the action site.

Action Site	Place and Country	Male	Female	Total
Fergana Valley	Fergana, Uzbekistan	33	2	35
Fergana Valley	Khujand, Tajikistan	70	4	74

Information about individual participants has been provided in Tables 1 and 2.
