Dear Doctoral Student,

I am pleased that you are participating in the research. Please:

1. Prepare a 10-page academic paper (with single line spacing and 12-point font size).
2. Use only the literature provided in the attached bibliography (I am attaching the studies in a compressed format) - strive to use all the provided literature. The goal is to develop an original line of reasoning and a new theory. Therefore, I am not requesting a literature review based on a fixed list, but an original academic paper. It is for this specific purpose that you are being provided with the required literature!
3. Properly cite the studies within the text. To facilitate this, I am providing the sources separately with the same numbering that corresponds to the attached documents. The paper must be submitted with a bibliography, meaning you will need to compile your own text with the bibliography provided in this document.
4. You may not use any assistive tools (programs such as ChatGPT) when writing the paper, but you are free to use the internet for information gathering.
5. Please prepare the paper using the structure, length, formatting, and chapter titles specified below.

Title
Keywords (5)
Abstract (~150 words)

1. Introduction
Write the introductory chapter of the paper based on the provided literature (selected from items 1-28). Introduce the topic and its significance. The length should be approximately 500 words.

1.1. Rationale for the Study
Based on the provided literature (selected from items 1-28), write a chapter that justifies the exploration of the topic and defines the paper's objective. Define the research questions. The length should be approximately 250 words.

2. Theoretical Background
Based on the provided literature (selected from items 1-28), write the theoretical background of the paper. Review relevant theories and concepts. Clarify definitions and explore the relationships between key concepts. If relevant, elaborate on the historical development of the topic. The length should be approximately 1000 words.

3. Methodology
Based on the provided literature (selected from items 29-31), write the chapter presenting the paper's methodology. Justify your choice of the specific approach or method. Detail how you will apply the chosen method. Show how this method will help answer the research questions. Address any potential limitations or challenges of the methods. Use the following methods: a) theory construction methodology (literature item #29); b) critical discourse analysis (literature item #30); c) hermeneutic analysis (literature item #31). The length should be approximately 500 words.

4. Analysis
Based on the provided literature (selected from items 1-28), write the theoretical analysis of the paper. In your analysis, use the presented critical discourse analysis and hermeneutic analysis.

Formulate a new theoretical approach or a theoretical synthesis. For the analysis, use the literature presented in the methodology section (items 29-31). Also include comparisons and critical remarks. The length should be approximately 1500 words.

5. Discussion
Based on the provided literature (selected from items 1-28), write the discussion chapter of the paper. This means you should compare and evaluate the theories from the provided literature with the new theory developed in the previous chapter. Also, examine the practical applicability of the new theory. Also include comparisons and critical remarks. The length should be approximately 500 words.

6. Conclusion
Based on the provided literature (selected from items 1-28), write the conclusion of the paper. This means you should summarize the findings. Answer the research questions posed in the "1.1. Rationale for the Study" chapter. Present the limitations of the research. Suggest directions for future research. Also include comparisons and critical remarks. The length should be approximately 250 words.
Please send the completed paper as an attachment by January 31, 2025, to the following address: [anonymized]. Anonymize the paper before submission so that author details cannot be identified, ensuring an anonymous review. To remove metadata: right-click on the document – Properties – Details – Remove Properties and Personal Information. Please include your full name and email address in the body of the email. For any questions, you can contact Dr. Mátyás Turós, Assistant Professor, at the submission email address.
Following submission, the paper is expected to be forwarded to the journal "Különleges Bánásmód" ("Special Treatment"), which is classified as category 'A' by the MTA PTB (Hungarian Academy of Sciences, Committee on Pedagogy). The journal will then send it to professional reviewers. This means the review process and the acceptance/rejection decision will adhere to academic standards and follow their ethical principles. It also means that the paper can only be published after a positive review. If accepted, the paper will be published in a category 'A', peer-reviewed, online, Open Access national scientific journal, and will meet the following requirements.

Publication Requirements

§14
(1) When submitting the application to begin the degree-awarding procedure, the candidate must have a minimum of 5 peer-reviewed publications registered and approved in the Hungarian Scientific Works Repository (MTMT), which must be closely related to the candidate's research topic.

(2) Minimum publication requirements for initiating the degree-awarding procedure:

a) The number of published or in-press publications (verified by an editorial or publisher's declaration) must be at least 5, which can be scientific journal articles, book chapters, books, or textbooks.

b) A minimum of 70 points must be completed for the pre-degree certificate (absolutorium) (8 semesters). A deviation of plus/minus one point from the recommended point values is possible based on the quality and quantity of the publication. The candidate proposes the points, the supervisor reviews them, and the program leader gives the final approval.

I will inform you of the written outcome of the review along with the final decision. I reserve the right to arrange for publication in other, similarly classified journals.

Budapest, November 10, 2024.

Sincerely,
[anonymized]
