Significant KEGG Terms by Module
Transport and catabolism
Translation
Transcription
Signaling molecules and interaction
Signal transduction
Sensory system
Replication and repair
Nucleotide metabolism
Neurodegenerative disease
Metabolism of terpenoids and polyketides
Metabolism of cofactors and vitamins
Membrane transport
Lipid metabolism
Infectious disease: viral
Infectious disease: parasitic
Infectious disease: bacterial
Immune system
Immune disease
Glycan biosynthesis and metabolism
Global and overview maps
Folding, sorting and degradation
Environmental adaptation
Energy metabolism
Endocrine system
Endocrine and metabolic disease
Drug resistance: antineoplastic
Development and regeneration
Circulatory system
Cellular community − eukaryotes
Cell motility
Cell growth and death
Cardiovascular disease
Carbohydrate metabolism
Cancer: specific types
Cancer: overview
Amino acid metabolism
