ER30001 "1968 INTERVIEW NUMBER"

1968 Interview Number (1968 ID Number)

This variable is the 1968 family ID number. The combination of this variable and Person Number (ER30002) provides unique identification for each individual on the data file. Individuals associated with families from the Latino and Immigrant samples, added to the PSID in 1990/1992 and 1997/1999, and 2017 respectively, were assigned 1968 IDs so that they, too, have unique identifiers compatible with the PSID structure for the core (SRC and Census) sample.

ER30428 "INDIVIDUAL WEIGHT 83"

1979 Individual Weight, Updated for 1983

This variable is nonzero only for sample members associated with a 1983 panel family. Sample members born into the family in 1983 receive either the average of the Head's and spouse's weights or, in the event of a single Head, the child receives the Head's weight. Those sample members returning to a panel family after becoming nonresponse receive the same weight that they had in the last year that they had nonzero data. Refer to Section I, Part 5, of the guide to the 1993 family data, 93GUIDE.PDF, for details on the weights themselves.

ER30569 "INDIVIDUAL WEIGHT 87"

1984 Weight, Updated for 1987

This variable is nonzero only for sample members associated with a 1987 response family. Sample members born into the family in 1987 receive either the average of the Head's and spouse's weights or, in the event of a single Head, the child receives the Head's weight. For those sample members either not yet part of the family in 1979 but present by 1984 or who were main family nonresponse in 1979 and moved back into the panel in 1984, the most recent weight is brought forward to these positions. Refer to Section I, Part 5, of the guide to the 1993 family data, 93GUIDE.PDF, for details on the weights themselves.

ER30686 "CORE IND WEIGHT 90"

1989 Core Weight, Updated for 1990

This weight variable is to be used only for analysis of the core sample. If you wish to analyze both the core and Latino samples, then see ER30688. If you wish to analyze only the Latino sample, then see ER30687. This variable is nonzero only for sample members associated with a 1990 core sample family. Sample members born into the family in 1990 receive either the average of the Head's and spouse's weights or, in the event of a single Head, the child receives the Head's weight. For those sample members either not yet part of the family in 1984 but present by 1989 or who were main family nonresponse in 1984 and moved back into the panel in 1989, the most recent weight is brought forward to these positions. Refer to Section I, Part 5, of the guide to the 1993 family data, 93GUIDE.PDF, for details on the weights.

Non-comparability Notes Appendix

I-f The 1983 and later years' codings of relationship to head are much more detailed than in previous years. We hope some day to recode relationship to head for 1968-1982 in the same detail.

I-j Categories differ; see codebook for details.

I-k Field width differs.

I-l Note that the weight variables are not comparable across waves. Three types of weights (core only, Latino only and combined core-Latino) were created for 1990 through 1995 because of the addition of the Latino sample. Beginning in 1993, weighting philosophy for recontacts changed. See Section I, Part 5 of the 1993, the 1990 and the 1992 documentation or the User Guide for further information and details. Weights were retroactively recalculated for all years in 1989.
