FALL 1982 ELEMENTARY AND SECONDARY SCHOOL CIVIL RIGHTS SURVEY

FILE DOCUMENTATION

I. INTRODUCTION

This documentation is designed to accompany the Fall 1982 Elementary and Secondary School Civil Rights Survey computer file as prepared by Opportunity Systems Incorporated and DBS Corporation under contract number 300-82-0190. A review of this documentation, prior to use of the file, should ensure minimal difficulty in obtaining accurate data.

The Fall 1982 Survey requested data from approximately 3,100 school districts and 36,000 individual schools. The file reflects the most accurate data obtainable from the respondents. However, for many reasons, some incomplete or inaccurate data items remain on the file. All of these problems have been noted on the file through use of an edit code system. This system will be discussed at length in the documentation.

For those users who are unfamiliar with the Elementary and Secondary School Civil Rights Survey, the following brief synopsis of the Survey history is provided.

The Elementary and Secondary School Civil Rights Surveys are conducted by OCR to fulfill its responsibilities under Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, and Section 504 of the Rehabilitation Act of 1973. The survey has been conducted, on a national basis, since the 1967-1968 school year. It was conducted annually until the 1974-1975 school year. Beginning in 1976, it became a biennial survey.

Over the years, the survey underwent considerable changes in scope, coverage, content, and methodology. These changes reflected the expansion of OCR's responsibility as well as shifts in the civil rights issues of national concern. Initially the primary focus of the survey was to identify racially dual systems with an emphasis in the rural South. Since then, the scope of the survey has broadened to include discrimination on the basis of sex or handicap and to address such "second generation" problems as discriminatory discipline practices, tracking and ability grouping, student assignments within schools, etc.

The primary purpose of the survey is to collect data that can assist OCR in identifying school systems with potential problems. The survey, therefore, collects data which may be used, in conjunction with input from OCR regional staff, to select districts for on-site reviews. The data might also be used for a variety of other activities including:

- Complaint handling: OCR is mandated to focus considerable effort on responding to complaints. The survey data provides regional personnel with a "quick look" at schools which are the subject of a complaint.

- Litigation support: While survey data alone is not used to establish non-compliance, it may be used to support findings of OCR field investigators conducting on-site reviews. The data may, therefore, be used to support litigation activities resulting from on-site reviews.

- Policy analysis: The survey data may be used to assist OCR personnel in identifying those areas of the educational process which should be addressed by future policy statements.

- Research: The data collected by this survey may also be analyzed to provide OCR with information enabling them to redefine their data requirements.

The 1982 survey is the third in a series of three survey years (1978, 1980, 1982) using a rolling sample methodology. The survey methodology, originally designed for the 1978 survey and modified for the 1982 survey, defined two categories of districts:

A. Forced Districts.

1. Voluntary plan districts, which were the same as those in the 1978 survey.

2. Court ordered districts, which included the districts the Department of Justice specified as being under court order, the districts which specified in the 1980 survey that they were under Federal or state court order, and the districts specified as court ordered in the 1978 survey.

3. OCR "high interest" districts, which were the same as the "high interest" districts in the 1978 survey.

B. Sampled Districts.

Districts with enrollments of 1,500 and more, which were not surveyed in either the 1978 or 1980 surveys, were selected. The 1976 survey year enrollments were used. Sampling weights for these districts were computed using the draw probabilities of selection in the 1978 and 1980 survey samples. Approximately 1100 districts were selected by sampling.

Due to the sampling methodology, and in particular to the requirement that no previously surveyed district be included in the set of sampled districts, the 1982 survey sample provides poor projectability. It should be noted that two states (Vermont and Wyoming) have no districts in the survey. In addition, New York City is not included in the sample.

Each surveyed district was to complete a School System Summary Report: Form ED 101. Each school within a sampled district was to complete an Individual School Report: Form ED 102. Copies of each form are presented in Appendix A.

Exhibit A presents a list of the number of districts and schools reporting for each state.

II. TECHNICAL SPECIFICATIONS FOR USING THE FILE

The Fall 1982 Elementary and Secondary School Civil Rights Survey data is stored on a sequential file. The file was created using the DBS3A database maintenance system.

Every effort was made to obtain accurate, complete data from all schools. Some errors and inconsistencies do, however, remain and are indicated on the file by "edit flags".

The remainder of this section is divided into five sections:

A. File Structure - describing the contents of a record, the sort of the file, etc.

B. File Access - describing FORTRAN and SAS code required to read and use the file

C. Error Detection - describing the "error flags" and their use

D. Data projection - describing the method traditionally used to obtain state, regional and national projections

E. Summary Statistics - including number of records on file, JCL parameters required, etc.

A. File Structure

There are two record types in the file. The first is a district record which contains both the data from the Form ED 101 and the associated error flags. The second is a school record which contains data from the Form ED 102 and associated error flags.

The records are sorted in ascending order on district OE (Office of Education) code and school OE code within districts. The district OE code is a seven digit code, the first two digits of which are the state OE code. Exhibit B is a list of state OE codes. The last five digits uniquely identify each school district within a state. The district code within a state provides an approximate alphabetical order for district names. The school OE code is a one to five digit code which uniquely identifies each school within a district.

Data elements within the record are identified by a slot or word number. In general, a data element requires one slot, with the exception of an alphanumeric data field which may take several slots - e.g., the district name takes 8 slots. This results from the fact that one slot corresponds to one four-byte computer word and may therefore contain:

- An integer number (e.g., 1,7765, 7611523)
- A real number (e.g., 0.001, 7.6, 391.25, etc.)
- Any four alphanumeric characters (e.g., ABCD, AB2C, etc.).

The directory, given in Appendix B, describes the contents of each slot or word and indicates the corresponding item number from the survey form. In addition, for numeric data fields, the directory indicates:

- the number of non-zero responses
- the minimum (non-zero) and maximum value of the data field
- the total value of the data field when summed over all records.

Referring to Appendix B, for example, the directory indicates that slot 38 of the school record contains the number of American Indians enrolled, as reported in Item 5.A of ED Form 102. There were 12,064 schools reporting non-zero American Indians enrolled. The number of American Indians in these schools ranged between 1 and 1,027. The total American Indian enrollment in these schools was 103,355.

As a further aid to the user of the file, Appendix C provides a cross-reference of the data elements of the district and school record types to the corresponding ED Forms 101 and 102.

B. File Access

As previously mentioned, the data is stored in a sequential file. Each record on the file contains all the information pertaining to one district or school. A record is identified as a district or school record by the contents of slot 2. A one in slot 2 indicates a district record; a two indicates a school record.

Records may be easily accessed using any computer language. Described below are access techniques using FORTRAN and SAS. Exhibits C and D demonstrate the access techniques to read the file in FORTRAN and SAS correspondingly. Appendixes D and E provide comprehensive examples of FORTRAN and SAS programs with JCL, each of which processes the master file to produce a simple table.

FORTRAN

Records are accessed by using a FORTRAN unformatted read. Referring to Exhibit C, RECORD is the integer array into which each record is read. (Notice that RECORD is dimensioned to 602 which corresponds to the number of "slots" identified in Appendix B - Directory.) Whenever the READ statement is encountered, another record will be entered into the array. The data for a single record may now be processed by inserting the appropriate code in the section labeled "PROCESS DISTRICT RECORD" or "PROCESS SCHOOL RECORD". To address a particular data element, simply subscript RECORD with the slot number, given in Appendix B, for the data element of interest.

SAS

Records are accessed by using the SAS INPUT statement. Since the structure of the record varies according to the record type (district or school), two SAS INPUT statements may be required to fully read the record. The first INPUT reads the data elements common to each record type and holds the data record for another INPUT statement. The format of the second INPUT statement is dependent upon the vale of the record code, located at slot (word) two or equivalently at bytes 5 to 8.

Since SAS input is character address based, the slot numbers of the data elements must be converted to the corresponding character number using the formula CHAR = SLOT * 4 - 3. The SAS format IB4. is used to input numeric or integer values; format RB4., real numbers; and format $CHARnn for alphanumeric fields. For example, the school system (district) name, zip code and number of schools data items could be inputted into SAS using the following SAS statement:

```
INPUT @13 DISTNAME $CHAR32.  @113 ZIPCODE $CHAR5.  @121 NUMSCH  IB4. ;
```

Most SAS users of the survey file prefer to create a SAS data base to save the information required from the master file before proceeding with the actual analysis or processing of the data. Appendix F provides a very simple SAS program, which could be used to convert the data contents of the master file to a corresponding pair of SAS data sets. It is rarely necessary, however, to input the contents of the entire record.

C. Error Detection

A total of 202 edit checks were defined for the processing of the Fall 1982 Elementary and Secondary School Civil Rights Survey. These edit checks are listed in Appendix G. A computer program was then used to make the checks on each record. Each time a data item failed to pass an edit check, a separate edit flag was turned "on". Respondents were then contacted to resolve the problems indicated by the edit flags.

It should be noted that failure to pass an edit check did not necessarily mean the data was wrong. Rather, many edit flags indicated possible data problems which warranted contact with the respondent for clarification. In many cases, an apparent data inconsistency did, in fact, represent a true, existing situation. For example:

- For a given ethnicity, data indicated that the number of pupils receiving corporal punishment or suspended was greater than the number of pupils enrolled. This seemingly inconsistent data was due to the fact that discipline data referred to the previous year while enrollment data referred to the current year.

- Some schools reported zero enrollment. Upon investigation, it was determined that these schools were vocational programs having no indigenous enrollment. Students attending these schools also attended their home or sending school and were included in the enrollment figure reported by these base schools. Appendix H provides a complete list of schools reporting zero enrollment.

In other cases, respondents either could not or would not provide corrections to erroneous or incomplete data fields. For example:

- Many schools from Massachusetts cited a state law that prohibited the categorization of special education students according to the categories appearing on the ED 102 form, item 7. As a result, many of these schools reported special education data for the total line only (line 7m).

- Minnesota school districts did not report school level data for pupils in need of special language services programs (item 5b.2).

The user should keep in mind that the survey form is a legal document, which cannot be changed without authorization from the respondent. Hence, even apparently simple arithmetic errors could not be corrected without authorization.

Appendix I presents an analysis of the "errors" remaining on the data base for several form items. The report displays for each form item by state five categories of data and a list of the edit checks examined.

1. Reported. Number of respondents who reported; i.e. districts or schools.

2. Required. Number of respondents required to complete the form item.

3. Failed. Number of respondents who were required to complete the form item but failed to do so.

4. Responded. Number of respondents who were required to complete the form item and properly responded.

5. With Errors. Number of respondents who responded (category 4) to the form item but did so with one or more item related errors.

6. Errors Checked. The edit checks used to analyse the error rate for the form item (reference the Edit Check Directory, Appendix G).

Appendix J presents a very detailed documentation of errors and exceptions in the records of the final survey file. Appendix J is organized as follows:

I. Errors/exceptions
II. Districts for which full correction unobtainable
III. Districts received after error resolution cutoff date
IV. Districts deleted from original sample
V. Districts added to original sample
VI. Non-respondent districts
VII. District name changes
App. Message code key

To detect which edit flags remain "on" for a given district or school record, it is first necessary to reference the Edit Check Directory given in Appendix G. In this directory, each edit check is assigned a unique number. The edit check number is followed by the item number of the survey question involved, the slot numbers involved, and a definition of the check being made. If the check detected an error, the associated edit flag was turned "on".

The edit flags are stored in a bit array, i.e., each edit check number corresponds to a single bit in a group of computer words. If the edit flag is "on" the bit is set to 1; if the error is "off" the bit is 0. An IBM computer word contains 32 bits.

For example, if edit checks 3, 6, 8 are "on," the first word in the edit bit array would be as follows:

Bits: 1 2 3 4 5 6 7 8 9 10 . . .

Value: 0 0 1 0 0 1 0 1 0 0 . . .

To determine if an edit flag is on, a special computer routine is necessary. Exhibit E is a listing of a FORTRAN subroutine ERRON. ERRON is used to determine error flag status by the statement:

```
CALL ERRON(RECORD(ERRSLT),ERRNUM,STATUS)
```

where:

RECORD is the array containing the district or school data record

ERRSLT is the first word or slot in the edit bit array (for this file ERRSLT = 489)

ERRNUM is the edit check number

STATUS is the flag value returned by the subroutine and indicates whether the error is on or off:
if STATUS = 1, edit flag is on
if STATUS = 0, edit flag is off.

      END
```

Somewhat related to error flags are the condition codes contained in slots 521-602. For each data field, the associated condition code indicates whether input received was:

0 - blank or never entered
1 - valid data type (e.g. numeric data in field defined as numeric)
2 - invalid data type (e.g. alpha data in field defined as numeric).

For ease of processing, blank (0) and invalid (2) numeric data submissions were converted to zeros. Hence, the condition codes are used when it is necessary to distinguish between zero and blank or invalid data.

To access the condition codes, the user may invoke the subroutine CONCOD, listed in Exhibit F, by the statement:

```
CALL CONCOD(RECORD(CONSLT),SLTNUM,CODE)
```

where:

RECORD is the array containing the district or school data record

CONSLT is the beginning slot number for the condition codes (for this file CONSLT = 521)

SLTNUM is the slot number of the data field of interest

CODE is the condition code value returned by the subroutine with a value of 0, 1, or 2 corresponding to the condition code for the specified data field.

Please note that integer variables are used for the calling arguments or parameters for subroutines ERRON and CONCOD.

D. Data projections

The sampling methodology used for the 1982 survey produced a survey sample unsuitable for projectability to state, regional or national levels. The discussion of data projection is presented for the illustrative purpose of describing the general technique used to project sampled data.

As stated previously, the sampling methodology for the 1982 survey defined two categories of districts:

- Forced districts, which primarily involved districts with potential civil rights problems

- Sampled districts, which consisted of districts not sampled in the 1978 or 1980 survey with enrollments of 1500 and more.

The forced districts carry a sampling weight of one. The sampling weights for the sampled districts were computed using the draw probabilities of selection in the previous 1978 and 1980 survey samples.

C-
      LVALUE(4)=CONFLG(SLTNUM)
      CODE=IVALUE
      RETURN
      END
```

Once a district was selected for the survey, every school in the district was also surveyed. Hence, the sampling weight for the school is the same as the sampling weight for the district.

To project survey data, simply multiply the data elements of interest by the district sampling weight and aggregate to the desired level.

To obtain an estimate of the variance associated with a projected data element X, the following equation may be applied:

$$VAR(X) = \sum_{s} X_j^2 \, W_j(W_j-1)$$

where:

s is all sampled districts

X_j is the value of X in the jth sampled district

W_j is the sampling weight of the jth district.

E. Statistics

The following is a summary of some of the statistics of the 1982 Elementary and Secondary School Civil Rights Survey file:

- Number of district records on file: 3,128
- Number of school records: 36,367
- Total number of records: 39,495
- Maximum slot number currently used: 602
- Record length in words: 700
- Number of edit checks: 202

ED FORM 101 AND ED FORM 102

REPORTING REQUIREMENT:

This report is required by the U.S. Department of Education pursuant to Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, and under Section 504 of the Rehabilitation Act of 1973. Section 100.6(b) of ED Regulations (34 CFR 100) issued to carry out the purposes of Title VI of the Civil Rights Act of 1964 provides:

Compliance Reports. Each recipient shall keep such records and submit to the responsible Department official or his designee timely, complete and accurate compliance reports at such times, and in such form and containing such information as the responsible Department official or his designee may determine to be necessary to enable him to ascertain whether the recipient has complied or is complying with this Regulation.

- Please use a typewriter or print legibly in ink.
- Pupil membership should be reported as of December 1, 1982, or the nearest convenient date prior to December 15, 1982.
- If the answer for a given item is "none", enter "0" in the appropriate space. If a particular item is not applicable in your case, enter "N/A" (not applicable) with a brief explanation in the appropriate space.

DEFINITIONS

SCHOOL For the purpose of this report, a school is a division of the school system consisting of elementary and/or secondary (or equivalent) students, comprising one or more grade groups or other identifiable groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary schools are housed in the same plant. Count only units administered by a principal or equivalent.

INSTRUCTIONS FOR COMPLETING FORM ED 101

Questions 1 through 4. Self-explanatory.

Question 5. Special Education. In responding to these questions, report on the basis of *what is known to the school system at the time of reporting* concerning children who are residents of the geographic area served by this system. Do not include children who are residents of other areas even if they are being served by your system. Do not include children who are socially maladjusted or are gifted or talented.

a. How many children require evaluation? Number of children through age 21 who have been referred for evaluation to determine if they require special education but who have not yet been evaluated. This number is exclusive of those reported in b. below.

b. How many children have been evaluated as requiring special education? Number of children through age 21 who have been evaluated as requiring special education who either are enrolled in a school (i.e., reported in c. and d. below), or are not enrolled in a school. All children who require special education should be counted, including those who are sent outside this system.

c. How many children are receiving special education in this district? Number of children evaluated as requiring special education and participating in a special education program or receiving special education services provided by this school system.

d. How many children are receiving special education paid for by this district in a non-district facility? Number of children evaluated as requiring special education who, for the purpose of receiving full-time or part-time special education, participate full-time in education programs *not* operated by this school system.

CERTIFICATION. After you have reviewed the data submitted on the ED 101 form and on the ED 102 forms to be attached for each school, please sign the certification and enter the telephone number to be used in the event that questions arise regarding this report.

DEFINITIONS

SCHOOL For the purpose of this report, a school is a division of the school system consisting of elementary and/or secondary (or equivalent) students, comprising one or more grade groups or other identifiable groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary schools are housed in the same plant. Count only units administered by a principal or equivalent.

RACIAL/ETHNIC CATEGORIES Racial/ethnic designations, as used by the U.S. Department of Education, Office for Civil Rights, do NOT denote scientific definitions of anthropological origins. *For the purposes of this report, a pupil may be included in the group to which he or she appears to belong, identifies with, or is regarded in the community as belonging to. However, no person should be counted in more than one racial/ethnic category.* The manner of collecting the racial/ethnic information is left to the discretion of the institution provided that the system which is established results in reasonably accurate data.

—American Indian Or Alaskan Native: A person having origins in any of the original peoples of North America and who maintains cultural identification through tribal affiliation or community recognition.

—Asian Or Pacific Islander: A person having origins in any of the original peoples of the Far East, Southeast Asia, the Pacific Islands, or the Indian subcontinent. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.

—Hispanic: A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin—regardless of race.

—Black (Not of Hispanic Origin): A person having origins in any of the Black racial groups of Africa.

—White (Not of Hispanic Origin): A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

PROGRAMS FOR THE GIFTED OR TALENTED Those programs designed for pupils who by virtue of outstanding abilities are capable of high performance and who require differentiated educational programs and/or services beyond those normally provided by the regular school program. Such pupils include those with demonstrated achievement and/or potential ability in any of the following areas singly or in combination: 1) general intellectual ability, 2) specific academic aptitude, 3) creative or productive thinking, 4) leadership ability, 5) visual or performing arts, 6) psychomotor abilities. (Do not include honors, advanced placement, or other enrichment programs for the gifted or talented that are not special programs.)

HANDICAPPED PUPILS (STUDENTS, CHILDREN) and SPECIAL EDUCATION PUPILS For purposes of this report the terms are synonymous. A special education pupil is one with one or more of the handicapping conditions defined below *and* who has been evaluated as requiring special educational services because of this (these) condition(s).

HANDICAPPING CONDITIONS The following definitions are to be used in preparing this report:

—Educable mentally retarded (or handicapped)—a condition of mental retardation which includes pupils who are educable in the academic, social, and occupational areas even though moderate supervision may be necessary.

—Trainable mentally retarded (or handicapped)—a condition of mental retardation which includes pupils who are capable of only very limited meaningful achievement in the traditional basic academic skills but who are capable of profiting from programs of training in self-care and simple job or vocational skills.

—Hard of hearing—a hearing impairment, whether permanent or fluctuating, which adversely affects a child's educational performance but which is not included under the definition of "deaf" in this section.

—Deaf—a hearing impairment which is so severe that the child is impaired in processing linguistic information through hearing, with or without amplification, and which adversely affects educational performance.

—Speech impaired—a communication disorder, such as stuttering, impaired articulation, a language impairment, or a voice impairment, which adversely affects a child's educational performance.

—Visually handicapped—a visual impairment which, even with correction, adversely affects a child's educational performance. The term includes both partially seeing and blind children.

—Seriously emotionally disturbed—a condition exhibiting one or more of the following characteristics over a long period of time and to a marked degree, which adversely affects educational performance: an inability to learn which cannot be explained by intellectual, sensory, or health factors; an inability to build or maintain satisfactory interpersonal relationships with peers and teachers; inappropriate types of behavior or feelings under normal circumstances; a general pervasive mood of unhappiness or depression; or a tendency to develop physical symptoms or fears associated with personal or school problems. The term includes children who are schizophrenic.

—Orthopedically impaired—a severe orthopedic impairment which adversely affects a child's educational performance. The term includes impairments caused by congenital anomaly (e.g., clubfoot, absence of some member, etc.), impairments caused by disease (e.g., poliomyelitis, bone tuberculosis, etc.), and impairments from other causes (e.g., cerebral palsy, amputations, and fractures or burns which cause contractures).

—Other health impaired—limited strength, vitality, or alertness, due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, autism, or diabetes, which adversely affects a child's educational performance.

—Specific learning disability—a disorder in one or more of the basic psychological processes involved in understanding or in using language, spoken or written, which may manifest itself in an imperfect ability to listen, think, speak, read, write, spell, or to do mathematical calculations. The term includes such conditions as perceptual handicaps, brain injury, minimal brain dysfunction, dyslexia, and developmental aphasia. The term does not include children who have learning problems which are primarily the result of visual, hearing, or motor handicaps, of mental retardation, or of environmental, cultural or economic disadvantage.

—Deaf-blind—concomitant hearing and visual impairments, the combination of which causes such severe communication and other developmental and educational problems that they cannot be accommodated in special education programs solely for deaf or blind children.

—Multihandicapped—concomitant impairments (such as mentally retarded-blind, mentally retarded-orthopedically impaired, etc.), the combination of which causes such severe educational problems that they cannot be accommodated in special education programs solely for one of the impairments. The term does not include deaf-blind children. For the purposes of this report, this category should include those pupils who are severely or profoundly mentally retarded.

SPECIAL EDUCATION PROGRAMS Special education programs are those designed to meet the needs of children with one or more of the handicapping conditions above.

INSTRUCTIONS FOR QUESTIONS ON FORM ED 102

Questions 1 through 4. Self-explanatory.

Question 5. Pupil Statistics. Complete the chart for racial and ethnic categories and, where indicated, for males and females and for handicapped pupils. Refer to the definitions above of racial and ethnic categories and of the term "handicapped". Leave no blanks; where the answer is none, enter "0". Handicapped pupils counted in column 9 will also be included in columns 1–8, as appropriate.

a. Pupils in Membership. The total number of pupils in membership on or about December 1, 1982, for each racial and ethnic category and for males and females. In each box report total membership—not percentages, average daily attendance, average daily membership, or year-end enrollment. Count each pupil as one, including any who attend less than a full day, such as kindergarteners.

b. Pupils in Need of Special Language Services. Enter in b(1) the number of pupils who have been assessed as having limited or no ability to understand, speak, or read English, *and* who have a primary or home language other than English. Enter in b(2) the number of pupils reported in b(1) who are enrolled in a special language services program (i.e., English-As-A-Second-Language, High Intensity Language Training, or a bilingual program) or any non-language class taught in a language other than English. Do not count pupils enrolled in a class to learn a language other than English.

c. Pupils in Programs for the Gifted or Talented. The number of pupils enrolled in programs for the gifted or talented. Count pupils once regardless of the number of programs in which they are enrolled.

If Prior Year Data for 5.d. and 5.e. are not available, alternate reporting can be negotiated by writing or calling *Mrs. Nancy Russell, Office for Civil Rights, Department of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202-2516; Telephone (202) 245-0198.*

d. Pupils Who Received Corporal Punishment. The number of pupils who received corporal punishment during the 1981–82 school year. Corporal punishment is the infliction of physical punishment to the body of a student by a school employee for disciplinary reasons. Count pupils once regardless of the number of times they were punished.

e. Pupils Suspended. The number of pupils who were suspended from this school for at least one day during the 1981–82 school year. Suspension is the temporary exclusion of a student from school for disciplinary reasons for one full school day or longer. This would also include in-school suspensions that remove a student from his or her regular classes for one full school day or longer. Count pupils once regardless of the number of times they were suspended.

Question 6. Self-explanatory.

Question 7. Special Education Programs. Please read the definitions of the handicapping conditions on the first page of this instruction sheet. Do not complete darkened areas.

- Count pupils participating in special education programs operated *at this school only*. Include those pupils who receive special education services in their regular classrooms as well as those who receive such services in special classrooms.
- If any child participates in two or more programs, include him or her in the one program in which he or she spends the most time. Example: John Doe spends 10 hours per week in a program for the educable mentally retarded (EMR) and 6 hours per week in a program for the orthopedically impaired; he would be reported in line (a) for EMR, since he spends most of his time in that program.
- *In column 1*, enter in each row the total number of pupils participating in each program, for rows a through l. In row m, enter the total of rows a through l.
- *In column 2 through 6*, enter the number of pupils in each racial/ethnic category in rows a, b, e, g, and j (racial/ethnic data is not needed for the other rows). For each row in which data must be entered, the entries in columns 2 through 6 must equal the entry in column 1.
- *In columns 7 and 8*, enter the number of male and female pupils in the special education programs defined in rows a, b, e, g, and j. For each of these programs, the sum of columns 7 and 8 must equal the entry in column 1.
- *In column 9*, enter for the programs defined in rows a, b, e, g, and j, the number of pupils who have also been identified in item 5b(1) as requiring special language services programs. Any such pupils will already have been counted in columns 2 through 8.
- *In columns 10 and 11*, enter the number of students who spend only a portion of the day in special education in column 10 and those who spend a full school day in special education in column 11. The sum of columns 10 and 11, for each row, must equal the total in column 1.

Question 8. Selected Course Enrollment. Complete the chart for pupils enrolled in all-male classes, all-female classes, and for males and females in mixed classes in (a) home economics, (b) industrial arts, and (c) physical education.

- Enter the number enrolled in grades 7 through 9. For example, if this school serves grades 6–7–8, include only those pupils in grades 7 and 8. In a, include occupational home economics courses.

Question 9. High School Graduates. Complete the chart for those who received a regular high school diploma during the 1981–82 school year. For purposes of this question, a high school diploma is a diploma granted upon the successful completion of a prescribed secondary program of studies. This includes, where required as a prerequisite, the successful completion of a minimum competency test.

- This question is not to be answered by elementary schools, middle schools, or junior high schools.
- Do not include those who received other than a high school diploma, such as those who received a special diploma, a certificate of attendance, or a certificate of completion.
- Provide the information by racial/ethnic categories in columns 1 through 5, the total in column 6, and by sex in columns 7 and 8.

Please check the completeness and accuracy of each item reported. Errors or omissions may require a refiling of this form.

FILE DOCUMENTATION

I. Errors/Exceptions

   A. General Categorical
   B. State-Specific
   C. District/School-Specific
   D. Districts/Schools with Non-flagged Exceptions
   E. Districts/Schools Reporting Corporal Punishment and Suspension Data for the 1982-83 School Year

II. Districts for which Full Correction Unobtainable

III. Districts Received after Error Resolution Cutoff Date

IV. Districts Deleted from Original Sample

V. Districts Added to Original Sample

VI. Non-Respondent Districts

VII. District Name Changes

Appendix

I.A. General Categorical Exceptions

There are records in the data file that contain error flags indicating the data do not conform to the edit criteria as expected, yet the data are accurate for the reporting school or district. These exceptions are not documented for each individual case, but are described categorically below:

- Vocational schools and career centers will show an enrollment of zero (Item 5a) when the attending students are enrolled in and reported by their home or sending schools.

- Vocational schools and career centers offering a grade 12 will show zero graduates (Item 9) when the students receive high school diplomas from their home or sending schools.

- Homebound programs, hospital schools, and jail/detention center school programs may report no third grade pupil assignment data (Item 6d) because there are no actual classroom settings.

- High schools that are totally ungraded will not show a grade 12 as offered but may report high school graduates (Item 9) if they are senior high schools.

- School level data for corporal punishment (Item 5d) and/or suspensions (Item 5e) may exceed the pupil membership data correspondingly by ethnicity or sex due to the retrospective nature of the discipline data items (reported for the previous year) compared to the current nature of the enrollment data (reported for the present school year).

I.B. State-Specific Exceptions

Statewide exceptions for districts/schools are listed below:

In Massachusetts, respondents cite the existence of a state statute that prohibits the categorization of special education students according to the categories used on the ED 102 form. Per OCR direction, the special education data item (Item 7) on the ED 102 form was not subjected to error resolution for Massachusetts respondents. All data were entered on the file in the manner it were reported by the schools. As a result, some Massachusetts schools will report data for the total number of special education students only (line 7m).

Minnesota school districts' data were reported centrally by the State Education Agency. The SEA did not report school level data for pupils in need of special language services programs (Item 5b.1) by ethnicity, and did not report any data for pupils enrolled in special language services programs (Item 5b.2).

Minnesota school data reports non-resident students in special education (Item 7) but not in pupil membership (Item 5a.). Therefore, many schools show discrepancies in counts by ethnicity, sex, and total between these two items.

Minnesota district records do not reflect the non-residents receiving special education within the schools. Therefore, discrepancies exist between the district level report for children requiring evaluation and children receiving special education compared to the sum reported by the schools as receiving special education.

Eight states apparently have a policy or statutory prohibition against the use of corporal punishment because all of the reporting schools in these states report zero for corporal punishment (Item 5d). The states are: Hawaii, Maine, Massachusetts, New Hampshire, New Jersey, Rhode Island, South Dakota, and Utah.

I.C. District/School - Specific Exceptions

In addition to the general categorical exceptions listed in Section I.A. and the statewide exceptions in Section I.B., there are specific data items throughout the file that appear in error, but are in fact, correct. The districts/schools retaining these "legitimate errors" are listed below. A message code corresponding to the appropriate explanation for the exception has been entered for each flagged item. The message code key is provided in Appendix 1.

I.D. Districts/Schools with Non-flagged Exceptions

At the district/school level, certain data entries do not conform to the survey specifications. These items do not appear in error on the file but are noted here because they contain data somewhat different from the data required.

MICHIGAN

3212000 Detroit

Entries for corporal punishment (Item 5d) and pupils suspended (Item 5e) are estimates, not actual counts.

OHIO

4504375 Cincinnati

Special education data were submitted for June 1, 1983. Original data were reported erroneously and could not be reconstructed accurately for the requested reporting date.

TENNESSEE

5203180 Nashville/Davidson County

Entries for corporal punishment (Item 5d) and pupils suspended (Item 5e) are estimates, not actual counts.

WASHINGTON

5707710 Seattle

Physical education data (Item 8c) are reported for June 1983. Original data were reported erroneously and could not be reconstructed accurately for the requested reporting date.

WISCONSIN

5909600 Milwaukee

The school district does not differentiate educable mentally retarded from trainable mentally retarded. Item 7a, although intended only for the educable mentally retarded, includes trainable mentally retarded students as well.

I.E. Districts/Schools Reporting Corporal Punishment and Suspension Data for the 1982-83 School Year

The districts and schools listed below have received permission from OCR to report discipline data (ED 102 Item 5d for Corporal Punishment, and ED 102 Item 5e for Pupils Suspended) for the current school year, in lieu of reporting for the 1981-82 school year.

MESSAGE CODE KEY

01 ED 101 Item 5a. Children Requiring Special Education Evaluation

It has been verified that the number of children that require evaluation for placement in special education programs is greater than the number of children who have undergone an evaluation (ED 101, Item 5b).

02-01 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (Item 7m, Ed 102) is accounted for by the fact that 35 students receive special education services in a homebound program and have not been reported on any individual school form.

02-02 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (Item 7m, Ed 102) is accounted for by the fact that a number of children are receiving monitored special education by consultants in non-educational settings. District receives funding for them but feel they do not belong in a defined, contained setting.

02-03 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepcancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (Item 7m, Ed 102) is accounted for by the fact that 7 students receive special education services provided by the district in a non-district facility.

02-04 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (Item 7m, Ed 102) is accounted for by the fact that this district belongs to a cooperative with other districts for special education programs. There are more non-resident students receiving special education in this district than there are resident students receiving special education from non-district schools in the cooperative.

02-05 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (Item 7m, Ed 102) is accounted for by the fact that 8 pre-kindergarten children are receiving special education at school #1757 but are not counted in the schools' total for special education.

02-06 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (Item 7m, Ed 102) is accounted for by the fact that some non-enrolled students are receiving special education in non-district facilities from district special education teachers.

02-07 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (Item 7m, Ed 102) is accounted for by the fact that there is a duplicate count for some students who receive special education both at the vocational school and the home school.

02-08 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (Item 7m, Ed 102) is accounted for by the fact that 49 special education students at Worcester County Vocational Center are also counted at their home schools (duplicate count for special education).

02-09 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (Item 7m, Ed 102) is accounted for by the fact that 143 students at Graff Vo-Tech receive special education services at Graff and at their home schools.

02-10 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (Item 7m, Ed 102) is accounted for by the fact that 108 students receive special education in facilities that are not considered schools and therefore, are not reported.

02-11 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (Item 7m, Ed 102) is accounted for by the fact that 104 private school children are receiving special education in district facilities but are not reported by the district schools.

02-12 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (Item 7m, Ed 102) is accounted for by the fact that many non-resident children are reported receiving special education by district schools but are not included in the District Summary Report.

02-13 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (Item 7m, Ed 102) is accounted for by the fact that non-resident students were reported by the schools, but not by the district.

02-14 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (Item 7m, Ed 102) is accounted for by the fact that 8 pre-school children and 8 out of district pre-school children are served by special education. Six children are served at Grande Ronde Child Center.

02-15 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (Item 7m, Ed 102) is accounted for by the fact that 188 students received special education in either a homebound program or a parochial school.

02-16 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (Item 7m, Ed 102) is accounted for by the fact that 5 students are receiving special education in a homebound program, and 4 students in private schools are receiving special education from the district.

02-17 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (Item 7m, Ed 102) is accounted for by the fact that 15 pre-school children receive special education in speech and hearing in a head-start program run by Benton County staff.

02-18 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (Item 7m, Ed 102) is accounted for by the fact that 67 pre-school children receiving speech education at home by an itinerant teacher. They have IEP's and are included in the number of special education children for state and federal funding.

02-19 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepcancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (sum of Item 7m, Ed 102 Form) is accounted for by the fact that 13 students receive special education services in a homebound program and have not been reported on any individual school form.

02-20 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (sum of Item 7m, Ed 102 Form) is accounted for by the fact that 5 students receive special education services in a homebound program and have not been reported on any individual school form.

02-21 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (sum of Item 7m, Ed 102 Form) is accounted for by the fact that 21 students receive special education services in a homebound program and have not been reported on any individual school form.

02-22 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (sum of Item 7m, Ed 102 Form) is accounted for by the fact that 18 students receive special education services in a homebound program and have not been reported on any individual school form.

02-23 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (sum of Item 7m, Ed 102 Form) is accounted for by the fact that 89 students receive special education services in a homebound program and have not been reported on any individual school form.

02-24 ED 101 Item 5c. Children Receiving Special Education in the District

The discrepancy between the number of students receiving special education in the district as reported on the summary form and the number of students receiving special education reported by the individual schools (sum of Item 7m, Ed 102 Form) is accounted for by the fact that 5 students receive special education services in a homebound program and have not been reported on any individual school form.

03 Item 5d. Pupils who Received Corporal Punishment

This school does not maintain records indicating the racial/ethnic breakdown of students who received corporal punishment during the 1981-82 school year.

04 Item 5d. Pupils who Received Corporal Punishment

This school does not maintain records of students who received corporal punishment during the 1981-82 school year.

05 Item 5e. Pupils Suspended

This school does not maintain records indicating the racial/ethnic breakdown of pupils suspended during the 1981-82 school year.

06 Item 5e. Pupils Suspended

This school does not maintain records of pupils suspended during the 1981-82 school year.

07 Item 6. Pupil Assignment for Third Grade

This school offers grade 3 but does not have any classes which are predominantly made up of third grade students.

08 Item 8a. Selected Course Enrollment

This school reports only students of one sex under mixed home economics courses. Students of the opposite sex are enrolled in the classes, but have not been reported because they are in grade levels other than 7 through 9.

09 Item 8b. Selected Course Enrollment

This school reports only students of one sex under mixed industrial arts courses. Students of the opposite sex are enrolled in the classes, but have not been reported because they are in grade levels other than 7 through 9.

10 Item 8c. Selected Course Enrollment

This school reports only students of one sex under mixed physical education courses. Students of the opposite sex are enrolled in the classes, but have not been reported because they are in grade levels other than 7 through 9.

11 Item 8c. Selected Course Enrollment

There are more male students enrolled in physical education courses than are reported in membership at this school (Item 5a. col. 7). Since some students are enrolled in more than one class they have been counted in each class in which they participate.

12 Item 8c. Selected Course Enrollment

There are more female students enrolled in physical education courses than are reported in membership at this school (Item 5a. col. 8). Since some students are enrolled in more than one class they have been counted in each class in which they participate.

13 Item 9. High School Graduates

This school offers grade 12 but is a special school and does not award high school diplomas.

14 Item 9. High School Graduates

Since this school was not in operation during the 1981-82 school year, no high school diplomas were awarded.

15 Item 9. High School Graduates

This school does not award high school diplomas; students graduate from their home schools.

16 Item 9. High School Graduates

This school did not offer a grade 12 during the 1981-82 school year.

17 Item 9. High School Graduates

Since this is a new school it could not award high school diplomas for the 1981-82 school year.

18 The discrepancy between this item and pupil membership (Item 5a) in this category is accounted for by the fact that data for the two items were collected on different dates.

19 The discrepancy between this item and pupil membership (Item 5a) in this category is accounted for by the fact that students enrolled in other schools participate in this program/class.

20 Item 5a. Pupils in Membership

There are zero students listed in membership at this school because the students have been counted in the membership of their home or sending schools.

21 Item 9. High School Graduates

This school does not award high school diplomas.

22 Data for this item were not available.

23 Item 8a. Selected Course Enrollment

There are more female students enrolled in home economic courses than are reported in membership at this school (Item 5a. col.8). Since some students are enrolled in more than one class they have been counted in each class in which they participate.

24 Item 9. High School Graduates

This school offered a grade 12 and awarded high school diplomas for the 1981-82 school year; however, it does not offer a grade 12 for the current year.

25 Item 9. High School Graduates

This school does not award regular high school diplomas.

26 Item 9. High School Graduates

This school has a graduating class every other year and did not award high school diplomas for the 1981-82 school year.

27 The ethnic/racial breakdown does not sum to the total column due to the fact that the parents of some students have insisted their children not be classified under any ethnic category.

28 This school offers a grade 3, but did not have any third grade students at the time of this report.

29 Item 5b2. Pupils Enrolled in Special Language Services Programs

There are more pupils enrolled in special language services programs than in need of special language services programs in columns 1,4,5 and 6. This situation occurs as a result of State law (reference Lau/Nichols and continued rulings) requiring a bilingual class be offered for every 10 bilingual students. Each class must include a percentage of non-bilingual students, even though the students do not need the special services.

30 There are more males enrolled in industrial art courses than are reported in membership at this school (Item 5a. col.7). Since some students are enrolled in more than one class, they have been counted in each class in which they participate.
