FINAL FILE DOCUMENTATION

I. Introduction

This documentation is designed to accompany the 1986 Elementary and Secondary School Civil Rights Survey computer file as prepared by Opportunity Systems Incorporated and DBS Corporation under contract number 300-86-0062. Two versions of the survey data file have been created: a sequential data file and a SAS data file. A review of this documentation, prior to use of either the sequential or SAS data file, should ensure minimal difficulty in obtaining accurate data.

The Fall 1986 Elementary and Secondary School (E&S) Civil Rights Survey was conducted to obtain data on the characteristics of students enrolled in public schools throughout the nation. The information is required by the Office for Civil Rights (OCR) to fulfill its responsibilities under Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, and Section 504 of the Rehabilitation Act of 1973.

The survey instrument was comprised of two forms: an ED 101 form completed by school districts and an ED 102 form completed by individual schools. Copies of the forms are presented in Appendix A. The districts selected to participate in the survey were statistically sampled from a universe of approximately 16,000 districts. The sample selection process was designed to meet the objectives of the survey and to provide statistical accuracy and projectability of the data.

The file reflects the most accurate data obtainable from the respondents. However, for many reasons, some incomplete or inaccurate data items remain on the file. All of these problems have been noted on the file through use of an edit code system. This system will be discussed at length in the documentation. In addition, particular district or school records that contain discrepancies are discussed.

II. Description of the Survey

The Elementary and Secondary School Civil Rights Surveys are conducted by the Office for Civil Rights (OCR) to fulfill its responsibilities under Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, and Section 504 of the Rehabilitation Act of 1973. The survey has been conducted, on a national basis, since the 1967-68 school year. It was conducted annually until the 1974-75 school year. Beginning in 1976, it became a biennial survey.

Over the years, the survey underwent considerable changes in scope, coverage, content, and methodology. These changes reflected the expansion of OCR's responsibility as well as shifts in the civil rights issues of national concern. Initially the primary focus of the survey was to identify racially dual systems. Since then, the scope of the survey has broadened to include discrimination on the basis of sex or handicap and to address such *second generation* problems as discriminatory discipline practices, tracking and ability grouping, student assignments within schools, classrooms, etc. The survey scope of the 1984 and 1986 E&S surveys is identical and virtually unchanged from that of the 1982 E&S survey.

The primary purpose of the survey is to collect data that can assist OCR in identifying school systems with potential problems. The survey, therefore, collects data which may be used, in conjunction with input from OCR regional staff, to select districts for on-site reviews. The data might also be used for a variety of other activities including:

- Complaint handling: OCR is mandated to focus considerable effort on responding to complaints. The survey data provides regional personnel with a *quick look* at districts or schools which are the subject of a complaint.
- Litigation support: While survey data alone is not used to establish noncompliance, it may be used to support findings of OCR field investigators conducting on-site reviews. The data may, therefore, be used to support litigation activities resulting from on-site reviews.
- Policy analysis: The survey data may be used to assist OCR personnel in identifying those areas of the educational process which should be addressed by future policy statements.
- Research: The data collected by this survey may also be analyzed to provide OCR with information enabling them to redefine their data requirements.

The survey instrument is comprised of two forms: a district level form (ED101) and a school level form (ED102). Each district selected to participate in the survey completes an ED101 form; and generally, every school within selected districts completes an ED102 form. The survey forms reflect the important issues and direct responsibilities of OCR.

For the 1986 Survey, the major design consideration of the survey was the sampling process used to select districts to be surveyed. A secondary design consideration was the subsampling of schools within large districts, i.e. the schools required to complete an ED102 form in large districts could themselves be a sample of schools within the district. A detailed discussion of the 1986 survey design follows.

The universe, from which the districts were to be sampled, was defined to be all public schools in the nation (fifty states and the District of Columbia). A 1984 universe file of all school districts was constructed using the 1982 universe file from which the previous 1984 E&S survey was drawn, the data from the 1984 E&S survey, and the 1982 district universe file maintained by the National Center for Education Statistics (NCES). The 1982 universe file had been created by merging the data from the 1976, 1978, 1980 and 1982 OCR E&S surveys with the 1980 NCES district universe file. The 1982 NCES file is formally identified as the Common Core of Data Universe of Public School Districts, 1983-84, with data as of October 1, 1982.

In order to minimize costs and to reduce respondent burden, a sampling methodology was employed to select districts for inclusion in the survey. The universe of public school districts contained 15,830 districts with 81,647 schools and total enrollment of 40,275,146 students. In sampling from this universe, the basic objective was to select a minimum number of districts that met a set of selection factors that represented the criteria which are to be satisfied to meet the needs of OCR.

The set of selection factors used to draw the sample basically were of two kinds: (1) minimum percent coverage of a specific population variable and (2) maximum percent standard deviation (PSD) of a projection of a population variable from the sample to the universe total.

The set of selection factors used in drawing the sample was as follows:

1. 75% coverage and 3% PSD of each of the following nationwide minority student components - American Indian, Asian/Pacific, Black, and Hispanic.
2. 58% coverage and 3% PSD of the total student population.
3. 10% PSD of the student population for each individual state.

A computer program known as OPTSAM was used to develop the set of probabilities (one for each district) and to draw the sampled districts in such a way as to satisfy the above selection factors while attempting to minimize the costs of conducting the survey. As a result of running OPTSAM, 3,455 districts, containing 37,313 schools and 23,544,704 students, were selected from the universe.

The inverse of the probability associated with each district's selection in the sampling process was used as the district's weight in the survey, a value used for projection purposes. Since the set of districts which responded to the survey differed from the set of districts that were initially selected by the sampling process, it became necessary at the end of the survey to *reweight* the sampled districts. The original weights were adjusted upwards by a small value to compensate for the nonresponding or otherwise missing districts. Appendix B provides a detailed discussion of the process used to *reweight* the sampled (reporting) districts from the final file.

Exhibit 1 presents a list of the number of districts and schools reporting for each state and the nation.

The second design consideration associated with the 1986 E&S Survey was the continuation of the concept of subsampling schools within selected districts. Normally a district selected for the survey must complete and submit an ED102 form for each school within the district. For the 1986 E&S Survey, districts with more than 100 schools were given the option to subsample schools, as follows:

1. Special schools (i.e. special education schools, vocational schools, disciplinary schools, etc.) were specifically included in the subsample and had to complete the ED102 forms.
2. The remaining schools in the district were to be listed in alphabetical order and every other school was to be selected for the subsample.

Forty-seven of the districts selected to participate in the 1986 E&S Survey were eligible to subsample schools within their district; however, only ten elected to subsample, i.e. Baltimore City, Baltimore County, Chicago, Detroit, Fairfax County, Hawaii, Memphis, Montgomery County, Nashville, and San Diego.

Since complete district level data for the ten subsampling districts was unavailable by direct aggregation of the school records within the district, the following methodology was used to project district level values for the subsampling districts:

1. The special schools, which were required to be sampled, were identified and not included in the weighting calculations. Technically their weight was one (1.00).
2. The total number of regular schools in the district was determined as the number of schools in the district less the number of special schools. The number of schools in the district is provided on the district form (ED 101) in Item 3.
3. The weighting factor was calculated to be the total number of regular schools divided by the number of subsampled (selected) regular schools.
4. The district level data was then estimated by multiplying the regular schools' reported data by the weighting factor and adding the special school data to this weighted regular school data.

If the subsampling instructions had been followed exactly, the weighting factor for the regular schools from the subsampling districts would have equaled 2.00, since the districts were to select every other regular school from an alphabetic list of the schools within the district. In fact, the calculated weights varied from 1.88 to 2.22.

The final file contains the actual data submitted by the schools reporting from the subsampling districts. The file also contains district summary data, which

EXHIBIT 1

NUMBER OF DISTRICTS AND SCHOOLS ON FILE BY STATE

aggregates the data reported by the subsample of schools after the school level data has been projected using the weighting factor for each school. For districts, which did not subsample schools within their district, the district summary data represents the simple aggregation of the school level data to a district level.

III. Technical Specifications for Using the File

Two versions of the 1986 Elementary and Secondary School Civil Rights Survey data file have been created:

- a sequential data file
- a SAS data file.

The sequential file was created using the DBS3A editing and data base maintenance system. After it was final, the SAS file was created from the sequential file using a SAS program.

Every effort was made to obtain accurate, complete data from all schools. Some errors and inconsistencies do, however, remain and are indicated on the sequential file by *edit flags*.

The remainder of this section is divided into five sections:

A. File Structure - describing the contents of a record, the sort of the file, etc.

B. File Access - describing FORTRAN and SAS code required to read and use the files

C. Error Detection - describing the *error flags* on the sequential file and their use

D. Data Projection - describing the method used to obtain state, regional and national projections

E. Summary Statistics - including number of records on file, JCL parameters required, etc.

A. File Structure

There are two versions of the data file, a sequential file and a SAS file. An understanding of the file structure of the sequential file is required before the file can be properly used, since there are three record types and the identification of the individual data elements is dependent upon their location within each record type. The SAS file, however, contains a single *record* type and the SAS data set itself is self-documenting, since each data element contains the data value, a variable type of numeric or character, and a descriptive label. The discussion of the file structure presented below, therefore, concentrates on the sequential file. A brief discussion of the SAS file is presented at the section's end.

Three record types are in the sequential file. The first is a district record, which contains both the data from the Form ED 101 and the associated error flags. The second is a school record, which contains data from the Form ED 102 and associated error flags. The third is a district summary record, which contains district level data corresponding to the data reported on the district Form ED 101 and the summation of the school level data reported on the school Form ED 102. For the subsampling districts, the district and school record types reflect the data as reported; the district summary record type reflects the data after the individual school records have been projected using the weighting factor for each of the schools.

The records are sorted in ascending order on district OE (Office of Education) code, record type (district, school and summary), and school OE code for the school records within districts. Each district contains a single district record, one to several school records, and a single district summary record. The district OE code is a seven digit code, the first two digits of which are the state OE code. Exhibit 2 is a list of state OE codes. The last five digits uniquely identify each school district within a state. The district code within a state provides an approximate alphabetical order for district names. The school OE code is a one to five digit code which uniquely identifies each school within a district.

Data elements within the record are identified by a slot or word number. In general, a data element requires one slot, with the exception of an alphanumeric data field which may take several slots, e.g. the school name takes 8 slots. This results from the fact that one slot corresponds to one four-byte computer word and may therefore contain:

- An integer number (e.g., 1, 7765, 7611523)
- A real number (e.g., 0.001, 7.6, 391.25, etc.)
- Any four alphanumeric characters (e.g., ABCD, AB2C, etc.).

For SAS programs, the contents of a four-byte computer word correspond to the SAS formats IB4., RB4., and $CHAR4., respectively.

The file directory, given in Appendix C, describes the contents of each slot or word and indicates the corresponding item number from the survey form. The byte location corresponding to each word is also provided, since this information is of particular value to SAS programmers who wish to use the sequential file directly. In addition, for numeric data fields in each record type, the directory indicates:

- the number of non-zero responses
- the minimum (non-zero) and maximum value of the data field
- the total value of the data field when summed over all records.

Referring to Appendix C, for example, the directory indicates that word 37 of the school record contains the number of American Indians enrolled, as reported

EXHIBIT 2

STATE OE CODES

State	OE Code	State	OE Code
Alabama	10	Missouri	35
Alaska	11	Montana	36

Minnesota	33	West Virginia	58
Mississippi	34	Wisconsin	59
		Wyoming	60

in Item 5.A of Form ED 102. There were 16,429 schools reporting non-zero American Indians enrolled. The number of American Indians in these schools ranged between 1 and 1,203. The total American Indian enrollment in these schools was 250,304.

Continuing with this example, the directory for the summary record shows that word 37 of the summary record represents the same value, American Indians enrolled; however, the data is based upon district level information. There were 2,360 districts reporting non-zero American Indians enrolled. The number of American Indians in these districts ranged between 1 and 8,896. The total American Indian enrollment in these districts was 251,714. The difference in the total American Indian enrollment as reported in the school directory versus the summary directory is the result of the projection of the school data from the subsampling districts.

The file directory shows that the first three words or data elements for each record type are logically equivalent. These three data elements represent *keys* which uniquely identify every single record in the data file as follows:

1 - District OE code
2 - Record type code (1=district, 2=school, 3=summary)
3 - School OE code (0 if district or summary record type).

The summary record type duplicates, as much as possible, the arrangement of the data in the corresponding district and school record types.

As a further aid to the user of the file, Appendix D provides a cross-reference of the data elements of the district and school record type to the corresponding ED Forms 101 and 102.

Appendix E contains a listing of the contents of the SAS data file with the assigned SAS data set name of ELSEC86. The SAS data file contains a single type of record, which corresponds to the school record types of the sequential file. Each SAS variable has a *label* associated with it that describes the variable. Each SAS observation (record) is uniquely identified by the numeric variables DIS_CODE and SCH_CODE, which correspond to the district and school OE codes. The file is sorted in ascending order on the district code and school code within districts.

The contents of each SAS observation represent the data elements of the corresponding school record in the sequential type and to the data elements of the district record associated with the school record. The alphanumeric variables of the district record, i.e. the district name and address, are duplicated in every school observation within the district. The numeric variables of the district record, however, are provided only in the first school observation corresponding to a single district; in the remaining school observations of the district, the district numeric variables are set to zero. The SAS variable FIRST.DIS_CODE may be used to distinguish the first

school observation from the other school observations within a district. The explanation for setting the district variables to zero for school records beyond the first is to allow the user to apply SAS procedures such as PROC MEANS to the SAS data set without inadvertently summing the district variables more than once.

Because the SAS file only presents school records, the user must be careful in processing school records to obtain district level aggregations for the sub-sampling districts. The SAS variable SUB_SAMP indicates if a district is a sub-sampling district. The SAS variable SUB_SCHL indicates if a school, within a sub-sampling district, is a sub-sampled school, whose data values must be weighted by its sub-sample weight (SAS variable SUB_WGT) before aggregation to district level values. A more detailed explanation with sample SAS code is presented in the section below titled *File Access*.

B. File Access

As mentioned previously, there are two versions of the data file, a sequential file and a SAS file. Each record on the sequential file contains all the information pertaining to one district, one school or one district summary. A record is identified as to record type by the value of the record type variable in word or slot number 2. A numeric or integer one in word 2 indicates a district record; a two, a school record; and a three, a district summary record. Each record (or SAS observation) on the SAS file contains all the information pertaining to a single school, plus some additional district level information.

The records of the sequential data file may be easily accessed using any computer language, including SAS. Described below are access techniques using FORTRAN and SAS. Exhibits 3 and 4 demonstrate the access techniques to read the sequential file using FORTRAN and the SAS file using SAS, respectively. Appendices F and G provide comprehensive examples of FORTRAN and SAS programs with JCL, each of which processes the final data to produce simple tables.

FORTRAN

Records are accessed by using a FORTRAN unformatted read. Referring to Exhibit 3, RECORD is the integer array into which each record is read. (Notice that RECORD is dimensioned to 602 which corresponds to the last number used to store data as identified in Appendix C, File Directory.) Whenever the READ statement is encountered, another record will be entered into the array. The data for a single record may now be processed by inserting the appropriate code in the section labeled *PROCESS DISTRICT RECORD*, *PROCESS SCHOOL RECORD*, or *PROCESS SUMMARY RECORD*. To address a particular data element, simply subscript RECORD with the word number, given in Appendix C, for the data element of interest.

C-
  900 CONTINUE
      .                                          User code for end of file
      .                                          processing if required
      .
      STOP
      END
```

For example, if one wished to print the school name and minority pupil membership, one would refer to Appendix C to determine:

Words 4-11	=	School name
Word 37	=	American Indian, pupils in membership
Word 38	=	Asian/Pacific Islander, pupils in membership
Word 39	=	Hispanic, pupils in membership
Word 40	=	Black, pupils in membership.

The following code might then be inserted in the section of code labeled *PROCESS SCHOOL RECORD:*

```
      MINPUP = RECORD(37) + RECORD(38) + RECORD(39) + RECORD(40)
      WRITE(6,10) (RECORD(I), I=4,11), MINPUP
10    FORMAT (' ',8A4,I10)
```

After processing all data, control of the program in Exhibit 3 will go to 900. At this point any wrap-up processing, such as the printing of accumulated state or national totals, could be performed.

Whenever district level information is required using the data recorded in the school records, the user is advised to obtain the required district level data from the district summary records (record type 3.) The school data from the sub-sampling districts was weighted by the sub-sample weight prior to its aggregation into the corresponding district's summary record. However for users who need to produce their own aggregations of school level data, the following example of FORTRAN code may be used to weight the sub-sampled school data prior to aggregation:

```
      MINPUP = RECORD(37) + RECORD(38) + RECORD(39) + RECORD(40)
      WHIPUP = RECORD(41)
      DOWGT  = ((RECORD(332).EQ.1).AND.(RECORD(334).EQ.1))
      IF (DOWGT) MINPUP = INT(FLOAT(MINPUP)*SUBWGT+0.5)
      IF (DOWGT) WHIPUP = INT(FLOAT(WHIPUP)*SUBWGT+0.5)
      TOTPUP = MINPUP + WHIPUP
```

where the following FORTRAN data type statements apply:

```
      INTEGER MINPUP,WHIPUP,TOTPUP,RECORD(602)
      LOGICAL DOWGT
      REAL SUBWGT
      EQUIVALENCE (RECORD(333),SUBWGT)
```

Note that the sub-sample weight (SUBWGT above) is a real number. The EQUIVALENCE statement used above *transfers* the contents of the weight value from the INTEGER element RECORD(333) into the REAL element SUBWGT.

SAS

Observations (or records) are accessed by using a series of SAS commands. Referring to Exhibit 4, the SAS file would be read into the work file WORK.ELSEC86 from the stored SAS data set MASTFILE.ELSEC86. The SAS data set name MASTFILE.ELSEC86 is a two-level name. The first level, *MASTFILE*, corresponds to the DD statement which names the SAS data file in the JCL job. The second level, *ELSEC86*, is the internal SAS data set name and must be specifically referenced in one's SAS program.

The SAS variable names as described in Appendix E would automatically be invoked through the SET command. The data for a single observation can be processed by inserting the appropriate code in the section labeled *PROCESS SCHOOL OBSERVATION*. To process data for the first school record appearing within a district, insert the appropriate code in the section labeled *PROCESS NEW DISTRICT*. To address a particular SAS variable, simply use the variable name as given in Appendix E for the variable of interest.

Using the example described above in the *FORTRAN* section, the following SAS code could be used to print the school name and minority pupil membership:

```
MINPUP = MEM_AI + MEM_AS + MEM_HI + MEM_BL;
PUT SCH_NAME $CHAR32.  MINPUP 10.;
```

Users, who need to obtain district level aggregations from the school records corresponding to the sub-sampling districts, must first weight the school data prior to aggregation to a district level total. To determine if a district is one of the sub-sampling districts, the user must use the SAS variable SUB_SAMP; a value of one indicates a sub-sampling district. To determine if a school within a sub-sampling district is a special school or a regular school, the user must use the SAS variable SUB_SCHL; a value of one indicates a regular, sub-sampled school. A sub-sampled school is one which was sampled from the sub-sampling district's regular schools; a special school is one which was required to report from the sub-sampling district. The weight associated with the sub-sampled school is available in the SAS variable SUB_WGT.

SET MASTFILE.ELSEC86 END=ENDFILE;                   Input observation from SAS data
BY DIS_CODE;                                        set.  MASTFILE is the dd name of
    .                                               the SAS data file.  "BY" statement
    .                                               allows test for first and last
    .                                               school observation in district.

* PROCESS NEW DISTRICT;

IF FIRST.DIS_CODE THEN DO;
    .                                               User code to process beginning of
    .                                               district's school records.
    .
    END;

* PROCESS SCHOOL OBSERVATION;

    .                                               User code to process school data
    .
    .

* PROCESS END OF DISTRICT;

IF LAST.DIS_CODE THEN DO;
    .                                               User code to process end of
    .                                               district's school records.
    .
    END;

* END OF FILE PROCESSING;

IF ENDFILE THEN DO;
    .                                               User code for end of file
    .                                               processing if required
    .
    END;
```

Using the example described above in the *FORTRAN* section, the following SAS code may be used to weight the minority and white pupil enrollments from the sub-sampled school records:

```
MINPUP = MEM_AI + MEM_AS + MEM_HI + MEM_BL;
WHIPUP = MEM_WH;
IF SUB_SAMP = 1 AND SUB_SCHL = 1 THEN DO;
     MINPUP = INT((MINPUP * SUB_WGT) + 0.5);
     WHIPUP = INT((WHIPUP * SUB_WGT) + 0.5);
     END;
TOTPUP = MINPUP + WHIPUP;
```

The SAS program example provided in Appendix G produces a report, which displays for each district in the data file, the district name, the sampling weight, the total enrollment in the district, and the minimum and maximum school enrollments within the district. Note that because of the size of the file it is often more efficient to DROP variables or to only KEEP those variables of interest. In addition, SAS files containing fewer variables can be created and saved for later use.

C. Error Detection

A total of 297 edit checks were defined for the processing of the 1986 Elementary and Secondary School Civil Rights Survey. Appendix H contains the Edit Check Directory which defines each edit check. A computer program (DBS3A) was used to make the checks on each record. Each time a data item failed to pass an edit check, a separate edit flag was turned *on*. Respondents were then contacted to resolve the problems indicated by the edit flags.

It should be noted that failure to pass an edit check did not necessarily mean the data was wrong. Rather, many edit flags indicated possible data problems which warranted contact with the respondent for clarification. In many cases, an apparent data inconsistency did, in fact, represent a true, existing situation. For example:

- For a given ethnicity, data indicated that the number of pupils receiving corporal punishment or suspended was greater than the number of pupils enrolled. This seemingly inconsistent data was due to the fact that discipline data referred to the previous year while enrollment data referred to the current year.
- Some schools reported zero enrollment. Upon investigation, it was determined that these schools were vocational programs having no indigenous enrollment. Students attending these schools also attended their home or sending school and were included in the enrollment

figure reported by these base schools. Appendix I provides a complete list of schools reporting zero enrollment.

The user should keep in mind that the survey form is a legal document, which cannot be changed without authorization from the respondent. Hence, even apparently simple arithmetic errors could not be corrected without authorization. For this reason, the user in analyzing data available by race/ethnicity or by sex, should use a computed total based upon the summation of the data by race or sex instead of the reported total.

Appendix J presents an analysis of the *errors* remaining on the data base for several form items. The report displays, for each form item by state, the following five categories of data and a list of the edit checks examined:

1. Reported. Number of respondents who reported; i.e. districts or schools.
2. Required. Number of respondents required to complete the form item; e.g. only schools offering the 12th grade are required to complete the high school graduates form item.
3. Failed. Number of respondents who were required to complete the form item but failed to do so; e.g. schools offering the 12th grade who did not complete the high school graduates form item.
4. Responded. Number of respondents who were required to complete the form item and properly responded.
5. With Errors. Number of respondents who responded (category 4) to the form item but did so with one or more item related errors.
6. Errors Checked. The edit checks used to analyze the error rate for the form item (reference the Edit Check Directory in Appendix H for a description of the edit check.)

Appendix K presents a very detailed documentation of errors and exceptions in the records of the final survey file. Appendix K is organized as follows:

I. Errors/exceptions
II. Districts for which full correction unobtainable
III. Districts with corrections received after error resolution cut-off date
IV. Districts originally sampled but not on final file
V. Districts on final file involved in consolidations
VI. Message code key

To detect which edit flags remain *on* for a given district or school record, it is first necessary to reference the Edit Check Directory given in Appendix H. In this directory, each edit check is assigned a unique number. The edit check (error)

number is followed by the item number of the survey question involved, the word numbers involved, and a definition of the check being made. If the check detected an error, the associated edit flag was turned *on*.

The edit flags are stored in a bit array, i.e., each edit check number corresponds to a single bit in a group of computer words. If the edit flag is *on*, the bit is set to 1. If the error is *off*, the bit is 0. An IBM computer word contains 32 bits.

For example, if edit checks 3, 6, 8 are *on*, the first word in the edit bit array would be as follows:

Bits:	1	2	3	4	5	6	7	8	9	10	.	.	.
Value:	0	0	1	0	0	1	0	1	0	0	.	..	

To determine if an edit flag is on, a special computer routine is necessary. Exhibit 5 is a listing of a FORTRAN subroutine ERRON. ERRON is used to determine error flag status by the statement:

```
CALL ERRON(RECORD(ERRSLT),ERRNUM,STATUS)
```

where:

RECORD is the array containing the district or school data record

ERRSLT is the first word or slot in the edit bit array (for this file ERRSLT = 489)

ERRNUM is the edit check number

STATUS is the flag value returned by the subroutine and indicates whether the error is on or off:

if STATUS = 1, edit flag is on
if STATUS = 0, edit flag is off.

Somewhat related to error flags are the condition codes contained in slots 521-602. For each data field, the associated condition code indicates whether input received was:

- 0 - blank or never entered
- 1 - valid data type (e.g. numeric data in field defined as numeric)
- 2 - invalid data type (e.g. alpha data in field defined as numeric)
- 4 - intentionally left blank.

For ease of processing, blank (0), invalid (2), and blank (4) numeric data submissions were converted to zeros. Hence, the condition codes are used when it is necessary to distinguish between zero and blank or invalid data.

EXHIBIT 5

SUBROUTINE ERRON USED TO DETERMINE IF ERROR IS ON OR OFF

```
C-
C-*****************************************************************************
C- ERRON - SUBROUTINE
C-*****************************************************************************
C-
C-SUBROUTINE ERRON DETERMINES IF AN ERROR BIT IS ON OR OFF.

      STATUS=0
      IF (IVALUE.NE.0) STATUS=1
C-
      RETURN
      END
```

To access the condition codes, the user may invoke the subroutine CONCOD, listed in Exhibit 6, by the statement:

```
CALL CONCOD(RECORD(CONSLT),SLTNUM,CODE)
```

where:

RECORD is the array containing the district or school data record

CONSLT is the beginning slot number for the condition codes (for this file CONSLT = 521)

SLTNUM is the slot number of the data field of interest

CODE is the condition code value returned by the subroutine with a value of 0, 1, 2, or 4 corresponding to the condition code for the specified data field.

Please note that integer variables must be used for the calling arguments or parameters for subroutines ERRON and CONCOD.

D. Data Projection

The sampling methodology used for the 1986 survey produced a survey sample projectable to the state, regional or national level. Projections are to the universe of all public school districts. As described above in Section II, the sampling weights for the sampled districts were computed, with some adjustment, from the inverse of the draw probabilities of selection of the district in the survey. For example, if the district was assigned a probability of selection in the survey of 0.25, then the corresponding sample weight is 4.00, the inverse of 0.25.

The survey data is projected by first multiplying the school or district level data elements by the corresponding district's sampling weight and then aggregating to the required state or national level. Reported school level data from subsampling districts whose schools were subsampled must first be weighted by the individual school's weighting factor.

Users of the sequential file for projection purposes are advised to limit their processing to the district summary records (record type 3) to avoid the necessity to weight the school data corresponding to the subsampling districts. The following FORTRAN code could be used to project the total minority enrollment from the summary record:

EXHIBIT 6

SUBROUTINE CONCOD USED TO DETERMINE VALUE OF CONDITION CODE

```
C-
C-**************************************************************************
C- CONCOD - SUBROUTINE
C-**************************************************************************
C-
C-SUBROUTINE CONCOD RETURNS THE VALUE OF A CONDITION CODE BYTE.
C-
      SUBROUTINE CONCOD(CONFLG,SLTNUM,CODE)
      LOGICAL*1 CONFLG(1)
      INTEGER SLTNUM,CODE
C-
C-DECLARE LOCAL VARIABLES AND INITIALIZE
C-
      INTEGER IVALUE
      LOGICAL*1 LVALUE(4)
      EQUIVALENCE (IVALUE,LVALUE(1))
      DATA IVALUE/0/
C-
C-RETURN BINARY VALUE OF CONDITION CODE BYTE.
C-
      LVALUE(4)=CONFLG(SLTNUM)
      CODE=IVALUE
      RETURN
      END
```

```
MINPUP = RECORD(37) + RECORD(38) + RECORD(39) + RECORD(40)
MINPUP = INT(FLOAT(MINPUP)*WEIGHT+0.5)
TOTMIN = MINPUP + TOTMIN
```

where the following FORTRAN data type statements apply:

```
INTEGER MINPUP,TOTPUP,RECORD(602)
REAL WEIGHT
EQUIVALENCE (RECORD(33),WEIGHT)
```

Please note that the sampling weight is in word 331 of the district and school record types, but in word 33 for the district summary record type.

Users of the SAS file for projection purposes must be concerned with weighting the data corresponding to the sub-sampled schools from the subsampling districts before applying the projection weight. The following SAS code could be used to project the total minority enrollment from the school record:

```
MINPUP = MEM_AI + MEM_AS + MEM_HI + MEM_BL;
IF SUB_SAMP = 1 AND SUB_SCHL = 1 THEN
     MINPUP = INT((MINPUP * SUB_WGT) + 0.5);
MINPUP = INT((MINPUP * WEIGHT) + 0.5);
TOTPUP = TOTPUP + MINPUP;
```

Note that the sampling weight is a real number. The FORTRAN and SAS program examples in Appendices F and G access and use the sampling weights for report purposes. It is often necessary to round off the projected numbers since a real number is being used to project what are realistically integer values, e.g. students or schools.

The chart below compares the reported data to the projected data for the entire nation. The 1984 estimated universe data, from which the 1986 survey sample was drawn, is also presented as evidence of the validity of the projection of the survey data.

Data Element	Reported	Projected	Universe
Number of districts	3,378	15,777	15,830
Number of schools	37,298	82,999	81,647
Total Enrollment	23,386,577	41,156,036	40,275,146

E. Summary Statistics

The following is a summary of some of the statistics of the 1986 Elementary and Secondary School Civil Rights Survey sequential file:

- Number of district records:	3,378
- Number of school records:	36,260
- Number of summary records:	3,378
- Total number of records:	43,016
- Maximum word number currently used	602
- Maximum word number containing survey data:	480
- Record length in words:	700
- Number of edit checks:	297
- Data set name (DSN)	OCR.ELSEC86.DATABASE.FINAL
- DCB parameters:	RECFM = VBS
	LRECL = 2804
	BLKSIZE = 11220
	DEN = 4

The summary statistics for the SAS file are, as follows:

- Number of observations:	36,260
- Number of variables:	470
- SAS database name	OCR.ELSEC86.DATABASE.SASFINAL
- SAS data set name:	ELSEC86

APPENDIX A

Fall 1986 Elementary and Secondary School Civil Rights Survey
ED Form 101 and ED Form 102

REPORTING REQUIREMENT

[illegible]

Compliance Report. Each recipient [illegible]

[illegible]

Form Approved
OMB No. [illegible]
Expiration Date: [illegible]

Fall 1986
Elementary and Secondary School Civil Rights Survey
SCHOOL SYSTEM SUMMARY REPORT ED101

Office for Civil Rights
U.S. Department of Education
Washington, DC 20202-2516
Due December 15, 1986

GENERAL INSTRUCTIONS

- Please use a typewriter or print legibly in ink.
- Full membership should be reported as of October 1, 1986 or the nearest convenient date prior to December 15, 1986.
- If the answer for a given item is "none", enter "0" in the appropriate space.
- If a particular item is not applicable in your case, enter "N/A".
- Copies of this ED101 form and all ED102 forms for the district must be retained in the district office for two years from the due date (until December 15, 1988).

DEFINITION

SCHOOL For the purpose of this report, a school is a division of the school system consisting of elementary and/or secondary (or equivalent) students comprising one or more grade groups or other identifiable groups organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary schools are housed in the same plant. Count only units administered by a principal or equivalent.

INSTRUCTIONS FOR COMPLETING FORM ED101

Questions 1, 2, 3 Self-explanatory.

Question 4 COURT ORDER STATUS If you are uncertain as to whether or not your school system is currently subject to a Federal or State court order requiring your system to desegregate or implement a plan for desegregation, you should contact the Clerk of the appropriate Federal or State court to determine this information.

Question 5 SPECIAL EDUCATION For the purposes of this survey, a special education pupil is (a) a student whose residence is within the geographic area served by the school system, (b) who is within the age group served by the school system, and (c) who has one or more of the following disabling conditions and requires special education services because of the disability: mental retardation, hearing impairment, visual impairment, speech impairment, orthopedic impairment, other health impairment, such as limited strength, vitality or alertness due to a heart condition, tuberculosis, rheumatic fever, etc., serious emotional disturbance, and/or a specific learning disability. Exclude children who are socially maladjusted or gifted/talented. Report on the basis of what is known to the school system at the time of reporting. Do not include children who are residents of other school districts, even if they are being served by your district.

a. How many children are awaiting initial evaluation? Number of pupils who have been referred for evaluation (to determine if they require special education) for the *first* time and who have not yet been evaluated. This number is exclusive of those reported in b, below. It does not include children being re-evaluated.

b. How many children have been identified as needing special education services? Number of children who have been evaluated as needing any type of special education program, either full-time or part-time.

c. How many children are placed in special education programs *in this district*? Include only those children who were identified in b, above. Combine the children being served on full-time and part-time bases. Include all children in the district who are presently enrolled in special education, whether they were evaluated in the past or for the first time this school year.

d. How many children are placed in special education programs in a nondistrict facility? Number of children evaluated as requiring special education and receiving special education services in a facility not operated by this school system. Combine children being served on a full-time and part-time bases.

CERTIFICATION After you have reviewed the data submitted on the ED101 form and on the ED102 forms to be attached for each school, please sign the certification and enter the telephone number to be used in the event that questions arise regarding this report.

_____
City/Post Office State Zip

3 SCHOOLS Total number of schools in this system For each school, attach a completed Form ED102 . . . . . ____

4. COURT ORDER STATUS Is this school system currently subject to a Federal or State court order requiring it to develop or implement a plan for pupil desegregation? . . . . . ____

5 SPECIAL EDUCATION Please refer to the instruction sheet.

a How many children are awaiting initial evaluation? . . . . . ____

b How many children have been identified as requiring special education? . . . . . ____

c. How many children are receiving special education in this district? . . . . . ____

d. How many children are receiving special education in a nondistrict facility? . . . . . ____

CERTIFICATION I certify that the information given on this form and on the attached ED 102 forms is true and correct to my knowledge and belief (A willfully false statement is punishable by law [U.S. Code, Title 18, Section 1001].)

Signature of Superintendent or Authorized Agent | Title | (Area Code) Telephone No. | Date Signed

REPORTING REQUIREMENT

This report is required by the U.S. Department of Education pursuant to Title VI of the Civil Rights Act of 1964. Title IX of the Education Amendments of 1972 and under Section 504 of the Rehabilitation Act of 1973. Section 100.6(b) of ED Regulations (34CFR 100) issued to carry out the purposes of Title VI of the Civil Rights Act of 1964 provides:

Compliance Reports. Each recipient shall keep such records and submit to the responsible Department official or his designee timely, complete and accurate compliance reports at such times, and in such form and containing such information as the responsible Department official or his designee may determine to be necessary to enable him to ascertain whether the recipient has complied or is complying with this regulation.

Elementary and Secondary School Civil Rights Survey
INDIVIDUAL SCHOOL REPORT: ED102

Office for Civil Rights
U.S. Department of Education
Washington, DC 20202-2516

Due December 15, 1986

GENERAL INSTRUCTIONS

- This form is to be completed for each individual school in the district.
- Please use a typewriter or print legibly in ink.
- Pupil membership should be reported as of October 1, 1986, or the nearest convenient date prior to December 15, 1986.
- If the answer for a given item is "none" or if all elements of a matrix are "0", enter "0" in the appropriate space or in the total column only (in the case of a matrix). If an item is not applicable, enter "N/A" (not applicable) in the appropriate space or in the total column only (in the case of a matrix).
- A copy of this form must be retained at the district office for two years from due date (until December 15, 1988).

DEFINITIONS

SCHOOL For the purpose of this report, a school is a division of the school system consisting of elementary and/or secondary (or equivalent) students, comprising one or more grade groups or other identifiable groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary schools are housed in the same plant. Count only units administered by a principal or equivalent.

RACIAL/ETHNIC CATEGORIES Racial/ethnic designations, as used by the U.S. Department of Education, Office for Civil Rights, do NOT denote scientific definitions of anthropological origins. *For the purposes of this report, a pupil may be included in the group to which he or she appears to belong, identifies with, or is regarded in the community as belonging to. However, no person should be counted in more than one racial/ethnic category.* The manner of collecting the racial/ethnic information is left to the discretion of the institution provided that the system which is established results in reasonably accurate data.

- American Indian or Alaskan Native: A person having origins in any of the original peoples of North America and who maintains cultural identification through tribal affiliation or community recognition.
- Asian or Pacific Islander: A person having origins in any of the original peoples of the Far East, Southeast Asia, the Pacific Islands, or the Indian subcontinent. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.
- Hispanic: A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin—regardless of race.
- Black (Not of Hispanic Origin): A person having origins in any of the Black racial groups of Africa.
- White (Not of Hispanic Origin): A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

PROGRAMS FOR THE GIFTED OR TALENTED Those programs designed for pupils who by virtue of outstanding abilities are capable of high performance and who require differentiated educational programs and/or services beyond those normally provided by the regular school program. Such pupils include those with demonstrated achievement and/or potential ability in any of the following areas singly or in combination: 1) general intellectual ability, 2) specific academic aptitude, 3) creative or productive thinking, 4) leadership ability, 5) visual or performing arts, 6) psychomotor abilities.

HANDICAPPED PUPILS (STUDENTS, CHILDREN) and SPECIAL EDUCATION PUPILS For purposes of this report the terms are synonymous. A special education pupil is one with one or more of the handicapping conditions defined below *and* who has been evaluated as requiring special educational services because of this (these) condition(s).

HANDICAPPING CONDITIONS The following definitions are to be used in preparing this report:

- Educable mentally retarded (or handicapped)—a condition of mental retardation which includes pupils who are educable in the academic, social, and occupational areas even though moderate supervision may be necessary.
- Trainable mentally retarded (or handicapped)—a condition of mental retardation which includes pupils who are capable of only very limited meaningful achievement in the traditional basic academic skills but who are capable of profiting from programs of training in self-care and simple job or vocational skills.
- Hard of hearing—a hearing impairment, whether permanent or fluctuating, which adversely affects a child's educational performance but which is not included under the definition of "deaf" in this section.
- Deaf—a hearing impairment which is so severe that the child is impaired in processing linguistic information through hearing, with or without amplification, which adversely affects educational performance.
- Speech impaired—a communication disorder, such as stuttering, impaired articulation, a language impairment, or a voice impairment, which adversely affects a child's educational performance.
- Visually handicapped—a visual impairment which, even with correction, adversely affects a child's educational performance. The term includes both partially seeing and blind children.
- Seriously emotionally disturbed—a condition exhibiting one or more of the following characteristics over a long period of time and to a marked degree, which adversely affects educational performance: an inability to learn which cannot be explained by intellectual, sensory, or health factors; an inability to build or maintain satisfactory interpersonal relationships with peers and teachers; inappropriate types of behavior or feelings under normal circumstances; a general pervasive mood of unhappiness or depression; or a tendency to develop physical symptoms or fears associated with personal or school problems. The term includes children who are schizophrenic.
- Orthopedically impaired—a severe orthopedic impairment which adversely affects a child's educational performance. The term includes impairments caused by congenital anomaly (e.g., clubfoot, absence of some member, etc.), impairments caused by disease (e.g., poliomyelitis, bone tuberculosis, etc.), and impairments from other causes (e.g., cerebral palsy, amputations, and fractures or burns which cause contractures).

- Other health impaired—limited strength, vitality, or alertness, due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, autism, or diabetes, which adversely affects a child's educational performance.

- Specific learning disability—a disorder in one or more of the basic psychological processes involved in understanding or in using language, spoken or written, which may manifest itself in an imperfect ability to listen, think, speak, read, write, spell, or to do mathematical calculations. The term includes such conditions as perceptual handicaps, brain injury, minimal brain dysfunction, dyslexia, and developmental aphasia. The term does not include children who have learning problems which are primarily the result of visual, hearing, or motor handicaps, of mental retardation, or of environmental, cultural or economic disadvantage.

- Deaf-blind—concomitant hearing and visual impairments, the combination of which causes such severe communication and other developmental and educational problems that they cannot be accommodated in special education programs solely for deaf or blind children.

- Multihandicapped—concomitant impairments (such as mentally retarded-blind, mentally retarded-orthopedically impaired, etc.), the combination of which causes such severe educational problems that they cannot be accommodated in special education programs solely for one of the impairments. The term does not include deaf-blind children. For the purposes of this report, this category should include those pupils who are severely or profoundly mentally retarded.

SPECIAL EDUCATION PROGRAMS. Special education programs are those designed to meet the needs of children with one or more of the handicapping conditions above.

INSTRUCTIONS FOR QUESTIONS ON ED102

Questions 1 through 3. Self-explanatory.

Question 4. GRADES OFFERED. In the boxes provided, check all grades offered in this school. Please note: The second box is to be checked by schools that offer only special education classes.

Question 5. PUPIL STATISTICS. Complete the chart for racial and ethnic categories and, where indicated, for males and females. Refer to the definitions above of racial and ethnic categories. Leave no blanks; where the answer is none, enter "0".

a. *Pupils in Membership.* The total number of pupils in membership on or about October 1, 1986, for each racial and ethnic category and for males and females. In each box report total membership—not percentages, average daily attendance, average daily membership, or year-end enrollment. Count each pupil as one, including any who attend less than a full day, such as kindergarteners.

b. *Pupils in Need of Language Assistance Programs.* Enter in b(1) the number of national origin minority pupils who are so limited in their English proficiency that they cannot effectively or equally participate in the school's regular instruction program. Enter in b(2) the number of pupils reported in b(1) who are enrolled in a program of language assistance (i.e., English-as-a-Second-Language, High Intensity Language Training, or a bilingual education program). Do not count pupils enrolled in a class to learn a language other than English.

c. *Pupils in Programs for the Gifted or Talented.* The number of pupils enrolled in programs for the gifted or talented. *Count pupils once regardless of the number of programs in which they are enrolled.*

d. *Pupils Who Received Corporal Punishment.* The number of pupils who received corporal punishment during the 1985–86 school year. Corporal punishment is the infliction of physical punishment to the body of a student by a school employee for disciplinary reasons. *Count pupils once regardless of the number of times they were punished.*

e. *Pupils Suspended.* The number of pupils who were suspended from this school for at least one day during the 1985–86 school year. Suspension is the temporary exclusion of a student from school for disciplinary reasons for one full school day or longer. *Count pupils once regardless of the number of times they were suspended.*

Question 6. PUPIL ASSIGNMENT. This question is to be completed by all schools that offer any two elementary grades between and including one through six. Select the lowest of those grades that your school offers and the highest. Do not include kindergarten. For example, if your school offers K–12, select grades one and six for the chart. If your school offers 1–5, select grades one and five.

Question 7. SPECIAL EDUCATION PROGRAMS. Please read the definitions of the handicapping conditions on the first page of this instruction sheet. Do not complete darkened areas.

- Count pupils participating in special education programs operated at this school only. Include those pupils who receive special education services in their regular classrooms as well as those who receive such services in special classrooms.
- If any child participates in two or more programs, include him or her in the one program in which he or she spends the most time. Example: John Doe spends 10 hours per week in a program for the educable mentally retarded and 6 hours per week in a program for the orthopedically impaired; he would be reported in line (a) for the educable mentally retarded, since he spends most of his time in that program.
- *In column 1,* enter in each row the total number of pupils participating in each program, for rows a through l. In row m, enter the total of rows a through l.
- *In column 2 through 6,* enter the number of pupils in each racial/ethnic category in rows a, b, e, g, and j (racial/ethnic data is not needed for the other rows). For each row in which data must be entered, the entries in columns 2 through 6 must sum to the entry in column 1.
- *In columns 7 and 8,* enter the number of male and female pupils in the special education programs defined in rows a, b, e, g, and j. For each of these programs the sum of columns 7 and 8 must equal the entry in column 1.
- *In column 9,* enter for the programs defined in rows a, b, e, g, and j, the number of pupils who have also been identified in item 5b(1) as limited in English proficiency. Any such pupils will already have been counted in columns 2 through 8.
- *In columns 10 and 11,* enter the number of students who spend only a portion of the day in special education in column 10 and those who spend a full school day in special education in column 11. The sum of columns 10 and 11, for each row, must equal the total in column 1.

Question 8. SELECTED COURSE ENROLLMENT. Complete the chart for pupils enrolled in all-male classes, all-female classes, and for males and females in mixed classes in (a) home economics, (b) industrial arts, and (c) physical education.

- Enter the number enrolled in grades 7 through 9. For example, if this school serves grades 6-7-8, include only those pupils in grades 7 and 8. In (a), include occupational home economics.

Question 9. HIGH SCHOOL GRADUATES. Complete the chart for those who received a regular high school diploma during the 1985–86 school year. A high school diploma, for purposes of this question, is a diploma granted upon the successful completion of a prescribed secondary program of studies. This includes, where required as a prerequisite, the successful completion of a minimum competency test.

*This question is not to be answered by elementary schools, middle schools, or junior high schools.

*Do not include those who received other than a high school diploma, such as those who received a special diploma, a certificate of attendance, or a certificate of completion.

Please check the completeness and accuracy of each item reported. Errors or omissions may require a refiling of this form.

Fall 1986 Elementary and Secondary School Civil Rights Survey
INDIVIDUAL SCHOOL REPORT ED102
Due December 15, 1986

4. GRADES OFFERED

- If this school is *totally ungraded*, check here ☐ .
- If this school offers *only* special education, check here ☐ .
- If this school is *partially* or *totally graded*, check the grades offered in the boxes below:

☐ Pre-K ☐ K ☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐ 6 ☐ 7 ☐ 8 ☐ 9 ☐ 10 ☐ 11 ☐ 12

5. PUPIL STATISTICS Before you begin, please review the definitions and instructions on the instruction sheet of this form.

Columns 1 through 5 must equal column 6

Columns 7 and 8 must equal column 6

	1	2	3	4	5	6	7	8
	AMERICAN INDIAN OR ALASKAN NATIVE	ASIAN OR PACIFIC ISLANDER	HISPANIC	Not of Hispanic Origin: BLACK	Not of Hispanic Origin: WHITE	TOTAL	Total MALE	Total FEMALE
a Pupils in Membership								
b (1) Pupils in Need of Language Assistance Programs								
b (2) Pupils Enrolled in Language Assistance Programs								
c Pupils in Programs for the Gifted or Talented								
d Pupils Who Received Corporal Punishment								
e Pupils Suspended								

6. PUPIL ASSIGNMENT Consult the instruction sheet for instructions. This table is to be completed for all elementary entry- and exit-level classrooms in schools that offer any two of the grades one through six, inclusive. Kindergarten is NOT to be included. Complete the table for *classrooms* in the lowest grade and in the highest grade of those to be counted (grades three and six if this school offers grades three through eight).

If two grades are combined in one classroom, count only those students in the entry- or exit-level class. Place the number of students in each racial/ethnic category in the proper column. For each reported classroom, enter "zero" as appropriate. Do not leave any of the racial/ethnic category columns blank.

For additional classes, duplicate chart on separate paper and continue. Be sure to make three carbon (or other) copies of extra pages and attach to the returned forms as appropriate.

	1	2	3	4	5	6	7

SECTION II-TO BE COMPLETED BY ALL SCHOOLS OFFERING ANY SPECIAL EDUCATION PROGRAM

7. **SPECIAL EDUCATION PROGRAMS** If this school offers any special education programs, the table below must be completed. If no special education programs are offered, check this box ☐ and proceed to Section III. The instruction sheet of this form (General Instructions) defines the handicapping conditions and provides instructions for this question.

Special Education Programs	1	2	3	4	5	6	7	8	9	10	11
	PUPILS PARTICIPATING IN SPECIAL EDUCATION										
	Total	BY RACIAL/ETHNIC CATEGORY					BY SEX				
		American Indian or Alaskan Native	Asian or Pacific Islander	Hispanic	Not of Hispanic Origin		Total Male	Total Female	Limited or Non English Speaking	PART TIME	FULL TIME
					Black	White					
(a) Educable Mentally Retarded											
(b) Trainable Mentally Retarded											
(c) Hard of Hearing											
(d) Deaf											
(e) Speech Impaired											
(f) Visually Handicapped											
(g) Seriously Emotionally Disturbed											
(h) Orthopedically Impaired											
(i) Other Health Impaired											
(j) Specific Learning Disability											
(k) Deaf-Blind											
(l) Multihandicapped											
(m) Total of lines (a) through (l)											

SECTION III—TO BE COMPLETED BY SCHOOLS OFFERING ANY GRADE 7-12

- This section need not be completed by schools whose highest grade offered is 6 or below
- If this school is totally or partially ungraded, this section should be completed if any secondary-level courses are offered.

8. **SELECTED COURSE ENROLLMENT** Please read the instructions on the instruction sheet of this form. Enter number of pupils in appropriate boxes

	Number of Pupils Enrolled in				Total Enrollment
	All-Male Classes	All-Female Classes	Mixed Classes		
			Male	Female	
a Home Economics Courses—Grades 7 through 9					
b Industrial Arts Courses—Grades 7 through 9					
c Physical Education Courses—Grades 7 through 9					

9. **HIGH SCHOOL GRADUATES** Refer to the instructions on the instruction sheet of this form

Columns 1 through 5 must equal column 6

Columns 7 and 8 must equal column 6

	1	2	3	4	5	6	7	8

APPENDIX B

Reweighting the File

REWEIGHTING THE FILE

Under Contract Number 300-84-0236, DBS Corporation developed the 1986 Elementary and Secondary School Survey sample by selecting a group of districts from a *universe file*. Each selected district had a selection probability whose inverse represents the projection weight. The sampled districts and schools were mailed questionnaires and their responses have been processed during the current contract (Contract Number 300-86-0062).

These actual responses differ from the sampled districts for a variety of reasons, including:

1. A sampled district did not respond, responded too late for processing, or responded partially
2. A sampled district had closed
3. A sampled district consolidated with another district or districts:
    a. The sampled district consolidated with another sampled district
    b. The sampled district consolidated with a district not in the sample
4. A district responded which was not in the sample.

These differences mean that we have to revise the weights which were originally computed when the sample was developed. There are two basic observations that are relevant:

1. The total number of children is constant irrespective of how districts are organized and grouped
2. The total number of districts is not constant because there can be closings, consolidations, etc.

Therefore, we could employ different weighting systems depending upon which factor(s) we are projecting.

The 1986 survey sample originally consisted of 3,455 districts, representing an estimated 37,313 schools and 23,544,704 students. The final survey file contained responses from 3,378 districts, representing 37,298 schools and a student enrollment of 23,386,577. In the following sections, we provide the procedures that were carried out in reweighting the 1986 E&S file.

CLOSED

If a school district has closed, we drop it since the children are to be found in another district. Therefore, we reduce the projection total (based on the sampling data not the reported data) by the amounts from the closed districts. We do this since the children from the closed districts will be found in other districts whose reported totals will increase correspondingly.

We also treated non response as closed since this is a compulsory survey and we acted as if non response was the result of closure or fundamental change in the condition of the district. Districts, which reported late or submitted incomplete or partial forms, were treated as non-respondents for the purpose of reweighting the survey file.

It should be emphasized that the projection total towards which we are reweighting is the total *after* subtracting the enrollment projections from the closed and non respondent districts. This is done because the children are still somewhere and will appear in some other district's enrollment total. Therefore, we do not want the projection total of the residual 1984 sampling data to double count these children who will be reported in the 1986 E&S Survey in some other district.

To be numerically specific, the projected total number of students using the 1986 E&S sample data was 41,645,154. (It should be noted that the 1986 E&S sample data that was used was actually population data from 1984 or earlier years.) There were 3,455 districts initially selected. After all the non responding, late and partial districts were *removed* from the file, we had 3,402 remaining. In addition to the non-respondent districts, 29 districts were *lost* due to consolidation with other districts giving us 3,373 districts.

We then added the districts with new codes, mergers, consolidations, etc. to achieve a new total of 3,378. These 5 newly added districts received their weights from a heuristic process based on the actual facts of their situation. This process is described below in the *Consolidation* section.

Using the original weights for the 3,373 districts sampled and on the final file, the projected total was 41,331,515 students. The ratio of the original projection total to this number is 1.00759. This number is the *adjustment* or *inflation* factor which multiplies each weight in the sample. The adjusted weights were used for subsequent projections to the estimated 1986 totals. It is clear that this process is a theoretical refinement of very slight numerical consequence.

RESPONSE BUT NOT IN SAMPLE

Give such districts a weight of *0* since they aren't part of the sample. For the 1986 E&S final file, no districts were in this category.

CONSOLIDATION

In this section, we provide a heuristic approach to handling an uncertain and imprecise situation. There were serious problems in implementing this approach because the *facts of each district's history* are often unknown to OCR. This is a complicated issue. Here we shall *track* the children and reweight each *cluster* so that the children who were in the initial sample are still being projected.

Let Wi equal the weight for each district in the consolidation cluster, with i indexing the districts in the cluster. If a district in the cluster was not in the sample, then it has a $Wi = 0$. Let M denote the number of districts in the cluster. Let Ni be the enrollment for each district in the cluster from the sampling universe. If the district was not in the sample, we still have its enrollment from the sampling universe.

We shall construct the weight for the cluster (i.e. the single district comprised of the old districts that consolidated or were absorbed) as follows:

Let W (TOTAL) = consolidated weight

N (TOTAL) = consolidated enrollment from sample universe, *not* reported on 1986 file.

Then the weighted average of the weights is formed as follows:

$$W(\text{TOTAL}) = \frac{\sum_{i=1}^{M} Wi \times Ni}{\sum_{i=1}^{M} Ni}$$

We use this weight, W (TOTAL), to project the enrollments from the consolidated district.

Projections are to be done using these weights for any measure related to students. The one area with a potentially different weighting approach is the projected number of districts. Here the closed districts and consolidated districts really have reduced the total number of districts. (We must wait for a new NCES universe to identify newly formed districts that are not consolidations, etc. that we already discovered.)

Expiration 6/87

SECTION I—TO BE COMPLETED BY ALL SCHOOLS

1. SCHOOL SYSTEM NAME _____

2. SCHOOL NAME 4-11

3. SCHOOL ADDRESS 12-18
Street or P.O. Box

City, Post Office	County	State	Zip
			19-20

SPACE FOR LABEL

4. GRADES OFFERED
- If this school is *totally ungraded*, check here ☐ 21
- If this school offers *only* special education, check here ☐ 22
- If this school is *partially* or *totally graded*, check the grades offered in the boxes below:

☐ Pre-K	☐ K	☐ 1	☐ 2	☐ 3	☐ 4	☐ 5	☐ 6	☐ 7	☐ 8	☐ 9	☐ 10	☐ 11	
23	24	25	26	27	28	29	30	31	32	33	34	35	3

5. PUPIL STATISTICS Before you begin, please review the definitions and instructions on the instruction sheet of this form.

Columns 1 through 5 must equal column 6

Columns 7 and 8 must equal column 6

	1 AMERICAN INDIAN OR ALASKAN NATIVE	2 ASIAN OR PACIFIC ISLANDER	3 HISPANIC	4 Not of Hispanic Origin: BLACK	5 Not of Hispanic Origin: WHITE	6 TOTAL	7 Total MALE	8 Total FEMALE
a Pupils in Membership	37	38	39	40	41	42	43	44
b (1) Pupils in Need of Language Assistance Programs	45	46	47	48	49	50		
b (2) Pupils Enrolled in Language Assistance Programs	53	54	55	56	57	58		
c Pupils in Programs for the Gifted or Talented	61	62	63	64	65	66	67	68
d Pupils Who Received Corporal Punishment	69	70	71	72	73	74	75	76
e Pupils Suspended	77	78	79	80	81	82	83	84

6. PUPIL ASSIGNMENT Consult the instruction sheet for instructions. This table is to be completed for all elementary entry- and exit-level classrooms in schools that offer any two of the grades one through six, inclusive. Kindergarten is NOT to be included. Complete the table for *classrooms* in the lowest grade and in the highest grade of those to be counted (grades three and six if this school offers grades three through eight).

If two grades are combined in one classroom, count only those students in the entry- or exit-level class. Place the number of students in each racial/ethnic category in the proper column. For each reported classroom, enter "zero" as appropriate. Do not leave any of the racial/ethnic category columns blank.

For additional classes, duplicate chart on separate paper and continue. Be sure to make three carbon (or other) copies of extra pages and attach to the returned forms as appropriate.

		1 Teacher's Initials or ID Number	2 Grade	3 AMERICAN INDIAN OR ALASKAN NATIVE	4 ASIAN OR PACIFIC ISLANDER	5 HISPANIC	6 Not of Hispanic Origin: BLACK	7 Not of Hispanic Origin: WHITE

SECTION III—TO BE COMPLETED BY SCHOOLS OFFERING ANY GRADE 7-12

- This section need not be completed by school's whose highest grade offered is 6 or below.
- If this school is totally or partially ungraded, this section should be completed if any secondary-level courses are offered.

8 SELECTED COURSE ENROLLMENT Please read the instructions on the instruction sheet of this form. Enter number of pupils in appropriate boxes.

	Number of Pupils Enrolled in				Total Enrollment
	All Male Classes	All-Female Classes	Mixed Classes		
			Male	Female	
a Home Economics Courses—Grades 7 through 9	304	305	306	307	308
b Industrial Arts Courses—Grades 7 through 9	309	310	311	312	313
c Physical Education Courses—Grades 7 through 9	314	315	316	317	318

9 HIGH SCHOOL GRADUATES Refer to the instructions on the instruction sheet of this form.

Columns 1 through 5 must equal column 6

Columns 7 and 8 must equal column 6

	1	2	3	4	5	6	7	8
	AMERICAN INDIAN OR ALASKAN NATIVE	ASIAN OR PACIFIC ISLANDER	HISPANIC	Not of Hispanic Origin		TOTAL	Total MALE	Total FEMALE
				BLACK	WHITE			
Persons Receiving High School Diploma	320	321	322	323	324	325	326	327

Please check the accuracy and completeness of each item reported. Errors or omissions may require a refiling of this form.

CERTIFICATION I certify that the information given above is true and correct to the best of my knowledge and belief. (A willfully false statement is punishable by law (U.S. Code Title 18, Section 1001).)

APPENDIX K

Documentation for Errors and Exceptions in Records on the Final File

APPENDIX K

Documentation For Errors And Exceptions In Records On The Final File

I. Errors/Exceptions

- A. General Categorical
- B. State-Specific
- C. District-Specific
- D. District/School-Specific
- E. Districts/Schools With Non-Flagged Exceptions
- F. Schools Reporting More Than Thirty Classroom Lines
- G. Districts/Schools For Which Specific Data Items Are Not Available

II. Districts For Which Full Correction Unobtainable

III. Districts With Corrections Received After Error Resolution Cut-Off Date

IV. Districts Originally Sampled But Not On Final File

V. Message Code Key

I. ERRORS/EXCEPTIONS

I.A. GENERAL CATEGORICAL EXCEPTIONS

There are records in the data file that contain error flags indicating the data do not conform to the edit criteria as expected. Yet the data are accurate for the reporting school or district. These exceptions are not always documented for each individual case and are described categorically below:

- Vocational schools, career centers, and other educational facilities or programs will show an enrollment of zero (Item 5a) when the attending students are enrolled in and reported by their home or sending schools.

- School level data for corporal punishment (Item 5d) and/or suspensions (Item 5e) may exceed the pupil membership data correspondingly by ethnicity or sex due to the retrospective nature of the discipline data items (reported for the previous year) compared to the current nature of the enrollment data (reported for the present school year).

- Vocational schools, career centers, and other special education facilities or programs may report student data for corporal punishment (Item 5d) and/or suspensions (Item 5e) to reflect the corporal punishment and/or suspensions that occurred at this facility. These students, however, are counted in membership (Item 5a) by their home or sending schools.

- Homebound programs, hospital schools, jail/detention centers, special education facilities, and correspondence studies programs may report no pupil assignment data (Item 6) because there are no actual classroom settings.

- Schools which have pupil assignment data may report classroom information (Item 6) for grades which appear inconsistent with grades offered (Item 4) at the school.

    - Schools indicate grade span offered but may not have students enrolled in some grades within this grade span. These are usually rural schools with low enrollment.

    - Certain districts consider elementary level education grade spans as ending at grades other than grade six and have reported classroom information accordingly. These districts usually have elementary schools which contain "middle school" grades between 4 and 6.

- Certain rural schools which house all students in one classroom may report no pupil assignment (Item 6) data.

- Vocational schools, career centers, and other special education facilities or programs may report special education students by handicapping condition (Item 7) to reflect services offered at this facility. These students, however, are counted in membership (Item 5a) by their home or sending schools.

- Schools which are ungraded will not show grades as offered (Item 4) but have reported in the selected course enrollments (Item 8) students enrolled in secondary-level courses or students at the grade or age for grade level between grades 7 and 9.

- Certain vocational schools, career centers, and special education facilities have completed the selected course enrollments (Item 8) to reflect courses taking place at this facility. These students, however, would be counted in membership (Item 5a) at their home or sending schools.

- Certain schools have reported the selected course enrollments (Item 8) based on individual classes. Students would therefore be counted more than once if they are enrolled in more than one class. Therefore, the number of students by sex and total enrollment may appear larger than the membership (Item 5a) of the school.

- Alternative and vocational schools, career and special education centers, and other special facilities or programs offering a grade 12 (Item 4) will show zero graduates (Item 9) when the high school students receive diplomas from their home or sending schools.

- New high schools formed during the 86-87 school year, or schools previously not offering a grade 12 as well as small rural schools which had no graduating students in the 84-85 school year, will show zero graduates (Item 9).

- Schools that are totally ungraded will not show a grade 12 as offered (Item 4) but may report high school graduates (Item 9) if they are senior high schools or offer a regular high school diploma.

- Because some large school districts took advantage of the subsampling option provided to them by the Office for Civil Rights, there will be data items on the district summary report which contain error flags indicating that the data do not conform to the edit criteria as expected. The reasons for these exceptions in reporting are outlined below:

    - The district summary report ED101 will indicate the total number of schools within the district. However, the number of individual school report ED102 forms received will reflect only those subsampled schools reporting and will, therefore, be less.

    - The district summary report will reflect special education data (Item 5) as it applies to the entire district. For this reason, the number of students identified as requiring special education and receiving special education in the district will be greater than the number of students identified by the handicapping condition on the ED102 (Item 7) or identified as receiving special education outside the district on the ED101 report (Item 5d).

The Subsampling Districts are:

1434320	San Diego Unified School District
2100030	Hawaii State Department of Education
2309930	Chicago Public Schools
3000090	Baltimore City Public Schools
3000120	Baltimore County Public Schools
3000480	Montgomery County Public Schools
3212000	Detroit Public Schools
5202940	Memphis City Schools
5203180	Metro Nashville-Davidson County School District
5601260	Fairfax County Public Schools

I.B. STATE-SPECIFIC EXCEPTIONS

Statewide exceptions for districts/schools are listed below:

MASSACHUSETTS

- In Massachusetts, respondents cite the existence of a state statute which prohibits the use of corporal punishment (Item 5d). Some schools have indicated zero as a total for this item while others have elected to leave this item blank, meaning the data item is not applicable to their situation.

- Respondents cite the existence of a state statute that prohibits the categorization of special education students according to the handicapping condition categories used on the ED102 form. Per OCR direction, the special education data item (Item 7) on the ED102 form have not been subjected to comprehensive error resolution for Massachusetts respondents. All data have been entered on the file in the manner they were reported by the schools. As a result, some Massachusetts schools will report data for the total number of special education students only (line 7m), while other districts have elected to leave the entire item blank. Some Massachusetts schools reported complete data while others reported data that contained some internal inconsistencies for which full error resolution could not be provided. Therefore, the number of pupils identified as receiving special education in the district (Item 5c) on the ED101 report may be inconsistent with the number of students reported in section 7 of the individual school reports.

MINNESOTA

- Minnesota school districts' data were reported centrally by the State Department of Education.

- Minnesota districts' special education data were reported as follows: the district summary report ED101 included pupils who are district residents only, regardless of where they are receiving the special education services; the individual school reports ED102 include pupils who are receiving special education services within the school, regardless of residency status. Therefore, discrepancies exist between the district level report ED101 for children requiring (Item 5b) and children receiving special education (Item 5c), and the sum of pupils receiving special education reported by the individual school reports.

- Membership data were reported by the State office using Fall 1986 data. The other data items on the school report are for the 1985-86 school year and, in many instances, represent pupil counts throughout the year. This causes some inconsistencies between the racial breakdown of students in membership and the information provided by the other data items on the school form.

- Minnesota schools did not report pupil assignment (Item 6) for elementary level schools.

- Minnesota school data reported non-resident students in special education (Item 7) but not in pupil membership (Item 5a). Therefore, many schools showed discrepancies in counts by ethnicity, sex, and total between these two items.

- Enrollments in the selected course enrollment (Item 8) contained data as they applied to all grades between 7-12 since the state data file did not separate this information by grade.

- Information to report on the students who have been identified as having Limited English Proficiency in Item 7 was provided on hard copies only.

TEXAS

- There is no distinction made between the pupils reported under the handicapping condition categories of "Educable Mentally Retarded" and "Trainable Mentally Retarded" in the Special Education Programs (Item 7). Since Texas does not maintain two separate categories, pupils may be reported under line 7a (Educable Mentally Retarded) or line 7b (Trainable Mentally Retarded).

FLORIDA

- Data was provided by the State Department of Education.

- Information regarding the grades offered by each individual school was drawn from the Master School Identification File. The information on this File differs from the actual grade configuration for the individual schools. Since the schools reported membership by grade, some inconsistencies occurred (for example, high schools showing grades offered as 10-12 showed data for selected course enrollment; this was done as some of these pupils were actually classified as 9th graders).

I.C. DISTRICT-SPECIFIC EXCEPTIONS

In addition to those General Categorical exceptions listed above, certain districts have reported information on a district-wide basis in a manner not consistent with the edit criteria. These differences of reporting may create both "flagged" and "non-flagged" exceptions. These exceptions are documented below on a district-by-district basis.

ARIZONA

INDIAN OASIS-BABOQUIVARI USD #40
OE NUMBER 1203950

ED102 REPORT

- The count of students who have been identified as needing language assistance programs (Item 5b1) and are enrolled in language assistance programs (Item 5b2) is not on the district's school reports. Notes on forms submitted by the district indicated that the district is currently surveying students to determine who is in need of language assistance programs. The district estimates that 35-40% of the students enrolled will need language assistance.

ROOSEVELT SCHOOL DISTRICT
OE NUMBER 1207080

ED102 REPORT

- Elementary schools in this district have students in more than one grade in one classroom. Information to report on classroom assignment (Item 6) is reported with students in one class to reflect the actual classroom makeup; grade information for the classes where the students are in more than one grade is not on file. The classroom assignment data therefore for all the classrooms with grade information being blank include the lowest and the highest elementary grade and other.

TUCSON UNIFIED SCHOOL DISTRICT
OE NUMBER 1208800

ED102 REPORT

- Inconsistencies exist between the number of pupils reported as having been identified as needing Language Assistance Programs, and those actually enrolled in those programs. The school district's policy has been to continue and expand bilingual education programs, therefore, pupils who do not show a need to be enrolled in such programs who elect to participate are permitted to enroll.

CALIFORNIA

LOS ANGELES UNIFIED SCHOOL DISTRICT
OE NUMBER 1422710

ED101 REPORT

- Inconsistencies exist between the number of pupils identified as requiring special education services (Item 5b), those receiving special education services in the district (Item 5c), and the number of pupils receiving special education services in the individual schools, classified by handicapping conditions (Item 7). The data reported on the ED101 represent unduplicated counts of pupils. The ED102 reports contain information of services rendered. Information on the ED102 reports therefore included pupils who may be in more than one program who were counted in each instance.

LOS ANGELES UNIFIED SCHOOL DISTRICT (Continued)

ED102 REPORT

- Membership data (Item 5a) have been collected at a different time than data for language assistance (Items 5b1 and 5b2), gifted and talented programs (Item 5c) data and special education (Item 7) data. Hence, the racial/ethnic data may have discrepancies between these items and membership data.

- Data regarding corporal punishment (Item 5d) are not available.

- Data regarding suspensions (Item 5e) are blank for those schools where this information was unavailable.

- The racial/ethnic data may not equal the total enrollment by the handicapping condition (Item 7) because not all students were distributed into their ethnic codes by persons submitting information to the district.

- The number of students categorized as limited English speaking in special education program (Item 7) will be inconsistent with the number of students identified as in need of language assistance (Item 5b). Since data for these two items were collected from different sources and at different times, discrepancies cannot be corrected.

- Inconsistencies exist between the data reported in membership (Item 5a) and data reported in the selected course enrollment (Item 8). Since the selected course enrollment data are an accurate reflection of the classes as reported by the teachers, no corrections are to be made.

- Schools that offer Special Education Programs only are all ungraded. Whenever "grades" were reported in Item 4, the information is not a classification of grades offered by age group, but grades as levels of education for which teaching materials can be appropriated.

OAKLAND UNIFIED SCHOOL DISTRICT
OE NUMBER 1428050

ED102 REPORT

- Information regarding the racial/ethnic composition of students reported as suspended (Item 5e) is unavailable for any of the district schools.

- Inconsistencies may exist between the racial/ethnic breakdown reported in membership (Item 5a) and classroom assignment (Item 6) in the year round schools due to data being taken from different tracks.

ONTARIO-MONTCLAIR SCHOOL DISTRICT
OE NUMBER 1428470

ED101 and ED102 REPORTS

- Information to report on special education pupils on the district summary and the individual school reports on file have been found by the district to contain incomplete, inaccurate information; thirteen of the schools in the district have special education data which have not been included in the original submission.

- Due to the record maintenance problems, corrections cannot be provided for the schools' data currently on file; no information can be reconstructed to report on the special education students by handicapping conditions for the thirteen schools with no information on file.

- Partial data have been submitted for all schools which contain information as of April 1987. The April 1987 set of information is not on file.

SANTA ROSA CITY HIGH SCHOOL DISTRICT
OE NUMBER 14358230

ED102 REPORT

- On all the school reports, data for pupils in Gifted and Talented programs were noted as "Not specifically identified."

- Information concerning the number of pupils suspended was not available for all the schools in the district.

VALLEJO UNIFIED SCHOOL DISTRICT
OE NUMBER 1440740

ED102 REPORT

- This district was granted permission by the Office for Civil Rights to use the April 1986 Federal Student Count to complete the 1986 E&S Survey.

MASSACHUSETTS

BURLINGTON PUBLIC SCHOOLS
OE NUMBER 3103240

ED102 REPORT

- For all schools in the district, no racial/ethnic and sex categorization is available for pupils who have been identified as in need of language assistance programs (Item 5b1), enrolled in language assistance programs (Item 5b2), in gifted and talented programs (Item 5c), and were suspended in the previous school year (Item 5e).

MISSOURI

HAZELWOOD SCHOOL DISTRICT
OE NUMBER 3513830

ED102 REPORT

- All schools in the district (except Hazelwood Central High School) do not report information on corporal punishment and suspensions. School records are not maintained to provide information for these two data items (Items 5d and 5e).

NEW YORK

NEW YORK CITY SCHOOL DISTRICT
OE NUMBER 4220580

ED101 REPORT

- An inconsistency exists between the number of pupils reported as in need of special education services (Item 5b) and those reported as receiving such services in (Item 5c) and out of district facilities (Item 5d). No verification/correction could be obtained by the cut-off date.

- An inconsistency exists between the number of pupils receiving special education services and those reported by the handicapping conditions in the individual schools. No verification/corrections could be obtained by the cut-off date.

ED102 REPORT

- There are certain sections of the individual school report ED102 for which data were omitted on a district-wide basis. These are outlined below:

    - Elementary schools did not provide pupil assignment by classroom (Item 6) information.

    - Where schools have reported pupils in the gifted and talented programs, only the total and the racial/ethnic breakdown were reported. No male/female breakdown could be obtained.

    - Where schools have reported pupils in special education programs, no breakdown by handicapping conditions were reported. Data were provided for all students on one line (line 7a for elementary schools; line 7b for non-elementary schools) where the total number of pupils in special education programs was reported together with racial/ethnic, male/female, and time breakdown.

    - Where no information was reported on either line 7a or line 7b regarding pupils in special education programs, no verification/correction could be obtained as to whether the school did offer special education programs.

- In addition to the consistent data omissions which apply on a district wide basis, there are other inconsistencies to, or omissions of, data which are applicable to certain schools within New York City. Documentation of these instances follows.

- The following schools have omitted the zip code from the school address.

SCHOOL ID	SCHOOL NAME
1936	Mabel Dean Bacon HS
2304	HS of Comm/Graphic
2867	PS 22

OHIO

MARYSVILLE EXEMPTED VILLAGE SD
OE NUMBER 4504547

ED102 REPORT

- Information to report on the number of pupils who are in the speech impaired category of Item 7 (Special Education Programs) included duplicated count of students. This applies to all schools in this district.

OREGON

PORTLAND SCHOOL DISTRICT
OE NUMBER 4710050

ED101 REPORT

- The number of pupils identified as receiving special education services in the district on the district summary report, and those reported by handicapping condition on the school reports, are inconsistent. This inconsistency is caused by: (1) the data for the individual schools were collected on a different date; and (2) the schools' data included non-district students receiving special education services at the schools.

ED102 REPORT

- The three special education centers--Holladay Center (School ID #521), Kelly Center (School ID #72002) and Parry Center (School ID #73004)--have data reported on the ED102 report as follows: (1) all special education students who are not members of the school who come in to the school for special education services are included in the counts of pupil membership (Item 5a); (2) the total number of students reported in Item 7 (special education by handicapping condition) includes all members of this school as well as those who come in just for special education services; (3) no breakdown into full and part-time is available for students who are not members of the school.

- Selected course enrollment information (Item 8) had not been computerized at the time of the report; no information can be made available for Item 8 for the following schools: Astor (School ID #50); Hosford (School ID #531); Lee (School ID #644); Metro Learning Center (School ID #768); Peninsula (School ID #906); Vestal (School ID #1192); Vocational Village (School ID #1195); Whitaker (School ID #1257); White Shield (School ID #72007); Boys and Girls Aid (School ID #72009); Continuation Ed for Girls (School ID #72010); Waverly (School ID #73001); Clinton (School ID #76005); Rosemont (School ID #80001); Grant Night School (School ID #84001); Vocational Village-Evening (School ID #86001); Regional Program for the Blind (School ID #86003); and Regional Programs for the Deaf (School ID #86004).

- The students enrolled at the following schools receive their diplomas at other school districts (Item 9): White Shield (School ID #72007); Boys and Girls Aid (School ID #72009); Continuation Ed for Girls (School ID #72010); Clinton (School ID #76005); Rosemont (School ID #80001); Grant Night School (School ID #84001); Regional Programs for the Blind (School ID #86003); Regional Programs for the Deaf (School ID #86004). The Vocational Village-Evening (School ID #86001) students receive their diplomas at the Vocational Village (School ID #1195).

PENNSYLVANIA

SCHOOL DISTRICT OF PHILADELPHIA
OE NUMBER 4818990

ED102 REPORT

- Information reported for pupils enrolled in the selected courses (Item 8) are not consistent with membership data (Item 5a) since the pupils attending these classes may (a) come from another school, or (b) enroll at more than one grade level.

- Where no graduate data (Item 9) are reported in schools reporting that grade 12 are offered, the data are reported with data for the Main Building (of which the reporting school is an annex).

UTAH

JORDAN SCHOOL DISTRICT
OE NUMBER 54000420

ED102 REPORT

- Inconsistencies exist between the number of pupils identified by the schools as requiring language assistance programs (Item 5b1) and those enrolled in language assistance programs (Item 5b2). The information is provided by the school district per instructions from the OCR Regional Office. No corrections will be made to the information reported.

I.D. DISTRICT/SCHOOL-SPECIFIC EXCEPTIONS

In addition to the general categorical exceptions listed in Section I.A., the statewide exceptions in Section I.B., and the district-specific exceptions in Section I.C., there are specific data items throughout the file that appeared in error, but are in fact, correct. The districts/schools retaining these "legitimate errors" are listed below. A message code corresponding to the appropriate explanation for the exception has been entered for each flagged item. The message code key is provided in Section V. of this documentation.

I.E. DISTRICTS/SCHOOLS WITH NON-FLAGGED EXCEPTIONS

At the district/school level, certain data entries do not conform strictly to the survey specifications. These items do not appear in error on the file but are noted here because they contain data somewhat different from the data required.

1. For the following schools, data are reported for pupils categorized as Educable Mentally Retarded (Item 7a) and Trainable Mentally Retarded (Item 7b) under one or the other category. Separation of pupils into the two classifications is either not permissible under the state law, or data are not kept as two separate categories by the school district/school.

OE Number	District Name	School ID	School Name
1313110	Texarkana Dist. #7	84002	W T Daniels
4225770	Saratoga Springs City	3925	Saratoga Springs Sr High

2. For the following schools, data reported on file under a handicapping condition (Item 7) are actually information to report pupils categorized under a different handicapping condition by the school (per note on reports).

GEORGIA

2001020 - Savannah-Chatham County Public Schools
1731 - Savannah High School
Seriously Emotionally Disturbed line (Item 7g) was used for Behavior Disorder.

LOUISIANA

2800840 - Jefferson Parish
285 - Catherine Strehle Elementary
Deaf line (Item 7d) was used for Autistic.

2800840 - Jefferson Parish
700 - Granville T. Woods Elementary
Trainable Mentally Retarded line (Item 7b) was used for N/C.

2800840 - Jefferson Parish
703 - Green Park Elementary
Seriously Emotionally Disturbed line (Item 7g) was used for Autistic.

2800840 - Jefferson Parish
73001 - Ellender Middle
Hard of Hearing line (Item 7c) was used for B.D.
Deaf line (Item 7d) was used for S.L.D.

2801560 - St. Landry Parish
1815 - Opelousas Development Center
Educable Mentally Retarded line (Item 7a) was used for Noncategorical Preschool Handicapped.

2801560 - St. Landry Parish
76001 - Occupational Training School
Trainable Mentally Retarded line (Item 7b) was used for Profound Mentally Retarded.

LOUISIANA (Continued)

2801560 - St. Landry Parish
76005 - Guillory Development Center
Educable Mentally Retarded line (Item 7a) was used for Noncategorical Preschool Handicapped.

2801650 - St. Tammany Parish
1091 - Mandenville Elementary
Multihandicapped line (Item 7l) was used for Noncategorical Preschool Handicapped.

MAINE

2910740 - MSAD #16
307 - Hall-Dale High School
Multihandicapped line (Item 7l) was used for Other Behavior Disorder.

MICHIGAN

3212000 - Detroit Public Schools
4062 - Edmonson
Specific Learning Disability line (Item 7j) was used for Autistic.

3215540 - Garden City Public Schools
86002 - Burger Center
Specific Learning Disability line (Item 7j) was used for Autistic.

3230990 - Sault Ste Marie Area Public Schools
2997 - Soo School
Seriously Emotionally Disturbed line (Item 7g) was used for Autistic.

NORTH CAROLINA

4301260 - Durham County
1251 - Lowe's Grove Elementary
Trainable Mentally Retarded line (Item 7b) was used for Autistic.

4301500 - Winston Salem-Forsyth County
1928 - Sherwood Forest
Seriously Emotionally Disturbed line (Item 7g) was used to include Autistic.

4302970 - Charlotte-Mecklenburg
72003 - Metro Center School
Orthopedically Impaired line (Item 7h) was used for Severely/Profoundly Handicapped.

4303090 - Moore County Schools
1666 - Pinecrest High School
Multihandicapped (Item 7l) includes Autistic.

4303090 - Moore County Schools
2390 - Pinehurst Middle
Multihandicapped line (Item 7l) was used for Autistic.

SOUTH DAKOTA

5131350 - Harrisburg School District 41-2
78008 - Harrisburg School
Multihandicapped line (Item 7l) was used for Physically Handicapped.

3. For the following schools, it appears that data to report on pupil classroom assignment have been completed to reflect either (a) the number of teachers; or (b) the number of classes per grade (Item 6).

OE Number	District Name	School ID	School Name
3905940	Rochester SD	276	East Rochester Annex

7. In addition to the above non-flagged exceptions, the following districts/schools have included notations on their forms to further explain/clarify the data reported.

ARIZONA

1201860 - Cartwright SD #83
80001 - Tomahawk
Notation on the form indicated that all of the classes (reported in Item 6) were established by parental requests to begin the year; then students were placed according to which teacher had the lowest class size.

CALIFORNIA

1425800 - Moreno Valley USD
86008 - Allesandro Middle School
Notation on form indicated that physical education (reported in Item 8c) data are separated into All Male and All Female but instruction is mixed.

1438790 - Tamalpais Union HSD
Notation on form indicated that corporal punishment is prohibited by California law.

LOUISIANA

2801680 - Tangipahoe Parish
223 - Independence Middle
Notation on source document referred to Item 7j (Learning Disability): "one Black male is not Learning Disability but is Severe Language Disordered."

MICHIGAN

3206870 - Brighton Area Schools
86001 - Phoenix HS
Notation on source document indicated that data on file for pupils in the gifted and talented program (Item 5c) were compiled "from available records."

3208040 - Caro Community Schools
473 - Caro Jr/Sr High School
Per school district's official, the reporting school does not keep records of pupils in gifted/talented programs. The general consensus is that they represent 5% of the total school population and that the racial ethnic breakdown is 4% White and 1% Hispanic.

NEW MEXICO

4100660 - Cuba Independent Schools
154 - Cuba High School
Notes on form referred to the pupils reported in the language assistance programs (Items 5b1 and 5b2): "Incomplete records on 48 Freshmen transferring in from feeder schools."

NEW YORK

4203840 - Baldwin Union FSD
170 - Baldwin Jr High
Data for pupils in physical education programs were reported as All Male and All Female; however, notes on source document indicated that for some of the activities, classes were mixed.

NORTH CAROLINA

4301500 - Winston-Salem Forsyth County
2280 - Whitaker Elementary
Per note on form, data reported for pupils who received corporal punishment (Item 5d) were actually recorded on the line for pupils who were suspended (Item 5e), and vice versa.

OHIO

4504724 - Beavercreek Local Schools
196 - Beavercreek High School
Note on form indicated that 4 Asian students in the language assistance programs are enrolled in a program coordinated by volunteers.

RHODE ISLAND

4901020 - South Kingstown
228 - Peace Dale
Note on form indicated that pupils in the gifted/talented programs are "undetermined at this time."

SOUTH CAROLINA

5002310 - School District of Greenville
80001 - Greer Middle
Notations on form indicated that the data for pupils who received corporal punishment (Item 5d) and those who were suspended (Item 5e) were from the first quarter of the current year. All previous discipline records were destroyed when administration changed.

TEXAS

5311680 - Brownville ISD
519 - Lincoln Park
Note on form indicated that the pupils who were identified as having a need for language assistance programs are served as designated by ARD committee to meet each student's physical or mental educational needs.

5319650 - Fort Bend
76002 - Missouri City Jr High
Data to report on pupils who received corporal punishment included students who are now members of the Christa McAuliffe school. The two schools had been one campus in the previous school year.

5321420 - Grand Prairie ISD
4796 - W B Travis Elementary School
Notation included on the source document indicated that two students will be enrolled in the bilingual classes when space is available (Item 5b2).

5321780 - Gregory-Portland
80004 - East Cliff Elementary
Note on form indicated that the one pupil reported in Item 7 (Special Education Programs) under "Deaf" category is in a separate campus.

5325660 - Killeen ISD
80007 - Pershing Park Elementary
Note on form indicated that the pupils reported under Item 7c (Hard of Hearing) included both "Hard of Hearing" and "Deaf" categories.

5331040 - Mission Cons ISD
Note on the ED101 report indicated that the number of students reported in Items 5b and 5c included 6 pregnant pupils per state requirements.

5335400 - Port Arthur ISD
82001 - Stilwell Technical Center
Note on form indicated that students are counted for attendance purposes at their home schools: Austin, Jefferson, and Lincoln.

I.F. SCHOOLS REPORTING MORE THAN THIRTY CLASSROOM LINES

Insofar as the 1986 Survey data processing specifications provide for thirty lines of classroom data (Item 6 - Pupil Assignment) to be entered on file, a number of schools for which there exist thirty classroom lines on the final file reported more than thirty on their forms.

This section lists those schools which reported on their forms more than thirty classroom lines in Item 6.

I.G. DISTRICTS/SCHOOLS FOR WHICH SOME DATA ITEMS ARE NOT AVAILABLE

Throughout the file, there are specific data items required for the completion of the report that contain no information. Depending on the type of question on the reports, the missing information may or may not have caused an "error" to be flagged. The reporting districts in these instances have confirmed verbally and/or noted in writing that the information requested is not available. The districts/schools retaining these "blank" data items are listed below. A message code corresponding to the appropriate description of the data unavailability has been entered for each item. A message code key is provided in Section V, located at the end of this document.

IV. DISTRICTS ORIGINALLY SAMPLED BUT NOT ON FINAL FILE

This section lists those districts selected for the sample but whose data are not on the final file because of one of the following reasons: OCR exempted them from the survey; they were closed districts or have been consolidated with another district; or their forms were received too late for inclusion in the data file.

1. DISTRICTS FROM WHICH NO REPORTS WERE RECEIVED, NOT INCLUDING DISTRICTS DROPPED FROM THE SURVEY BECAUSE OF OUT OF SCOPE

State	District Name	District OE	Number of Schools
KS	SPRING HILL USD #230	2611850	4
ME	BREWER SCHOOL DEPT	2903510	4

OK	KELLYILLE I-31	4616170	1
OK	LEFLORE SD I-16	4617280	1
PA	UNION CITY AREA SD	4824090	2
VT	SHELBURNE SD	5507320	2

*Two districts were selected for the 1986 Survey:
3607110 - Columbia Falls Elem
3607140 - Columbia Falls High

The two districts prefer to report in 1986 as one single district, resulting in the following:
3607140 - Columbia Falls High no longer exists
3607110 - Columbia Falls Elem is on file under the correct name of "Columbia Falls SD" with a new OE#.

4. DISTRICTS SELECTED FOR THE SAMPLE, WITH DATA ON FINAL FILE AS PART OF ANOTHER SAMPLED DISTRICT (Including, Partial or Total, Duplicates of Another District in Sample)

ARKANSAS

1100685 SELAWIK CITY (Number of schools = 1; Enrollment = 198)

In 1976, became part of another sampled district:
1100625 - Northwest Arctic SD (2 schools - 431 students)

1304260 ROSS VAN NESS (Number of schools = 1; Enrollment = 239)

In 7/85, became part of another sampled district:
1305940 - Eudora SD (2 schools - 1,125 students)

1306600 GILLHAM (Number of schools = 2; Enrollment = 418)

In 7/86 became part of
1305130 - De Queen SD (3 schools - 1,506 students)

MASSACHUSETTS

3102040 ASHBURNHAM WESTMINSTER REG (Number of schools = 1; Enrollment = 999)

On the '86 sample, there were two identical districts:
3102040 - Ashburnham Westminster Reg (1 school - 999 students)
3184030 - Ashburnham Westminster Reg SAD (3 schools - 2,079 students)

Data on '86 final file are for:
3184030 - Ashburnham Westminster Reg SD
- o This OE# was created in the '84 Survey to accommodate the consolidation of 3 districts:
  - Oakmont RHS (7-12)
  - Ashburnham Elem (1-6)
  - Westminster (1-6)

MICHIGAN

3209060 CHERRY HILL (Number of schools = 4; Enrollment = 2,400)

This district was dissolved in 2/85
Is now part of another sampled district:
3235580 - Wayne-Westland (28 schools = 17,597 students)

MONTANA

3604560 BOZEMAN ELEM #7 (Number of schools = 6; Enrollment = 2,048)

This district was dissolved sometime prior to 1984, and since then has been part of another district sampled for 1986.
3684010 - Bozeman #7 (8 schools - 4,195 students)

This ID# 3684010 was probably created in 1984 to accommodate this merging.

3605170 BROWNING ELEM SCH DIST #9 (Number of schools = 10; Enrollment = 1,798)

This district is the exact duplicate, but unwanted (i.e., aggregate) of two other sampled districts (and both of these districts are, correctly, on the final '86 file)
3605180 - Browning Elem #9
3605190 - Browning High #9

3605300 BUTTE SCHOOL DISTRICT #1 (Number of schols = 2; Enrollment = 1,376)

Two districts were sampled for '86:
3605300 - Butte SD#1 (JHS)
3605280 - Butte SD#1

Sometime between 1984 and 1986, the above two districts merged with a third one (3605310 - Butte HSD), which was not selected for '86.

On the final file for '86, the data for the resulting combined district is appearing as follows:
3605280 - Butte SD#1

3606110 ST IGNATIUS SCHOOL DISTRICT #28 (Number of schools = 2; Enrollment = 627)

Two districts were sampled for the '86 survey:
3606100 - St Ignatius Elem (1 school)
3606110 - St Ignatius SD 28 (2 schools)

In 4/87, the school district wanted to report both under one single district:
St Ignatius SD 28 (3 schools), combining both the Elem and High School parts.

Currently on the final file, this combined district is carried under the new name, St Ignatius SD #28 and a new OE#.

3615460 KALISPELL JR HIGH SCHOOL (Number of schools 1; Enrollment = 900)

In the 1984 survey, this district was already part of another ('86) sampled district:
3684150 - Kalispell #5 (8 schools - 4,269 students)

MONTANA (Continued)

3616510 LIBBY JR HIGH (Number of schools = 1; Enrollment = 717)

3616530 LIBBY HIGH (Number of schools = 1; Enrollment = 693)

There were three districts sampled for the '86 survey:
3616510 - Libby Jr High
3616530 - Libby High
3616500 - Libby PSD#4
The third district (3616500 - Libby PSD #4) was on the '84 survey file as being the aggregate of the first two (Libby Jr High and Libby High).

Therefore, only the third district (3616500 - Libby PSD #4) will be on the 1986 final file.

3622800 RONAN HIGH #30 (Number of schools 4; Enrollment = 1,307)

Two identical districts were sampled for '86:
3622790 - Ronan SD #30 (consolidation took place in '78)
3622800 - Ronan High #30

The correct district is on the '86 final file, as:
3622790 - Ronan SD #30

3628620 WOLF POINT SCHOOL DISTRICT 45 (Number of schools = 2; Enrollment = 518)

Two identical districts were sampled for '86:
3628590 - Wolf Point Elem
3628620 - Wolf Point SD 45-45A (name truncated on file)

The 2 schools of 3628620 are already included in 3628590.
The correct district is on the '86 final file, as:
3628590 - Wolf Point SD 45-45A

NEW JERSEY

4005160 FIELDSBORO (Number of schools = 1; Enrollment = 518)

In 6/82, this district closed, is now part of another sampled district:
4002030 - Bordentown Regional (4 schools - 1,561 students)

5. DISTRICTS SELECTED FOR THE SAMPLE WITH NO DATA ON FINAL FILE BECAUSE OUT OF SURVEY SCOPE

VERMONT

5508250 ADDISON NORTHWEST SUPERVISORY (Number of schools = 4; Enrollment = 1311)

This is not a school district (LEA).
It is an administrative unit overseeing
4 separate school districts.
It was dropped from the 86' survey.

6. DISTRICTS SELECTED FOR THE SAMPLE WITH NO DATA ON FINAL FILE BECAUSE CLOSED/DISSOLVED/CONSOLIDATED WITH ANOTHER DISTRICT NOT SELECTED FOR THE SAMPLE

NEBRASKA

3709750 SHERMAN CO DIST 004 (Number of schools = 1; Enrollment = 7)

7. SELECTED DISTRICTS WHICH HAVE UNDERGONE CHANGES AND HAVE BEEN ASSIGNED A NEW OE#

DISTRICT NAME	OLD OE #	NEW OE #
Butte School District	3605280	3605286
St. Ignatius School District	3606100	3624886
Columbia Falls School District	3607110*	3607186*

*This district will not be on file. Only "partial" submission was received.

V. MESSAGE CODE KEY

The coding system used is a three part alpha-numeric system with each part separated by a dash (-).

1) The first part contains a numeric code:
   01 indicates that the exception applies to the ED101 School System Summary Report.
   02 indicates that the exception applies to the ED102 Individual School Report.

2) The second part contains a numeric first character and an alphabetic second character:
   The numeric character identifies the particular item number on the form for which the exception applies.
   The alphabetic character identifies the particular line of data for which the exception applies. However, an "X" indicates that the exception applies to either several lines of data or to the entire item.
   Where both characters in the second part are "XX", the exception applies to the entire district/school report.

3) The third part contains an alphabetic sequencing character.

CODE	CODE DESCRIPTION
01-3X-A	The inconsistency between the number of schools reported by the district on the district summary report (Item 3) and the total school reports had been caused by a separate report filed for a school that is housed in another school's building. Their enrollment is separate (hence the separate form) but the district does not consider it a separate school.
01-3X-B	The number of schools on the district summary report is the correct number of schools in the district. The school forms have one additional school reported; this school is under this district supervision since this district has a contract with another district to provide the county with an alternative kindergarten program.
01-4X-A	Information concerning the court order status of the reporting district was left blank with the accompanying statement: "STATEMENT IN ANSWER TO QUESTION 4 - COURT ORDER STATUS" Is this school system currently subject to a Federal or State court order requiring it to develop or implement a plan for pupil desegregation? The Prince George's County Public School System is presently under an Order of the United States District Court for the District of Maryland dated September 20, 1983, in C.A. 72.325.K, et al., requiring the school system, among others, to develop a plan for pupil desegregation, if possible, whereby prior ordered racial guidelines with respect to no school having a black pupil population of no less than 10% and no more than 50% be revised upward, with no minimum guideline stated but with a maximum guideline of 80% being imposed. The Board's current compliance with the aforegoing is evidenced by a further order of said court dated June 30, 1985.
01-5A-B	Data had not been provided in Item 5a of the district summary report because all the testing is conducted by the Luzerne Independent Unit.
01-5B-A	The number of students identified as requiring special education is less than the number of students reported by the handicapping condition in Item 7 of the individual school reports. This is caused by the fact that some students may be reported under more than one handicapping condition if they receive special education services in more than one area. Because data were collected from separate sources, correction could not be obtained.
01-5B-B	The number of students identified as requiring special education will be less than the number of pupils identified by the handicapping condition in Item 7 of the individual school reports. Students from other school districts who attend this district's schools for special education are included in Item 7 of the individual school reports.
01-5B-C	There are 38 students who were included on the district summary report, Item 5b, who are not accounted for on the school reports. No corrections can be provided since special education records are not permanently maintained at the school district.
01-5B-D	The number of pupils receiving special education services in a non-district facility included six pupils who are part-time in the district schools and part-time in a non-district facility. They are counted in both Item 5c (receiving in the district) and Item 5d (receiving in a non-district facility). The number of pupils identified as requiring special education (Item 5b) is an unduplicated count.

CODE	CODE DESCRIPTION
01-5C-A	The number of pupils identified as receiving special education in this district is less than the number of students identified by handicapping condition on the school reports because students from outside this school district are included in Item 7 of the school reports where they attend special education programs.
01-5C-B	The number of students identified as receiving special education in this district is inconsistent with the number of students reported by the handicapping condition in Item 7 of the individual school reports. Information to complete the school reports was collected on a different date than information on the district report. Therefore, the resultant discrepancy will remain.
01-5C-C	The number of students reported as receiving special education within the district is greater than the number of students reflected in Item 7 of the school reports. Homebound and/or hospitalized district students who receive special education are not listed by the handicapping condition on the individual school reports.
01-5C-D	The number of students reported as receiving special education services in the district on the ED101 report will be less than the number of students identified by the handicapping condition in Item 7 of the individual school reports. This is because some students may be reported under more than one handicapping condition if they receive special services in more than one area. Because data were collected from separate sources, this duplication of student counts cannot be corrected.
01-5C-E	The number of pupils identified on the district report as pupils receiving special education services within the district, and the number of pupils reflected on the individual school reports by handicapping conditions, are both verified as accurate. These two sets of data, however, are not consistent; the reporting district cannot provide further verification/correction/explanation for the discrepancy.
01-5C-F	The number of students identified as receiving special education within the district in section 5c of the ED101 report is greater than the number of students identified by handicapping condition on the ED102 reports. The district report includes pre kindergarten programs/or a district-wide program for drop-outs operated from the administrative office/or state operated physical ailment program and residential and day treatment programs operated from a central office. Students would not be reflected on any of the school reports.
01-5C-G	The number of pupils identified as receiving special education in the district on the ED101 report is greater than the number of students identified on the ED102 reports because there are preschool, noncategorized special education students who are not categorized in Item 7 of the ED102 reports.
01-5C-H	The number of students identified as receiving special education in the district on the district report is greater than the number of students identified by the handicapping condition on the school reports in Item 7. The district report includes special education recipients who are handicapped according to state guidelines. These categories include educationally handicapped, behavior disordered, noncategorized preschool special education, and/or students receiving speech therapy whose severity of condition is not great enough to classify the student as speech impaired.

CODE	CODE DESCRIPTION
01-5C-I	The number of students identified as receiving special education in the district on the district report is greater than the number of students identified by the handicapping condition on the individual school reports. The district report includes students who are being served in the district schools as well as preschool noncategorized special education students not reflected in Item 7 of the school reports.
01-5C-J	The number of students identified as receiving special education in the district on the ED101 report is inconsistent with the number of students identified by the handicapping condition in item 7 of the ED102 reports. The district summary report includes actual counts of pupils who receive special education whereas the counts reflected on the individual school reports are only estimates.
01-5C-K	The number of students identified as receiving special education in the district on the ED101 report is inconsistent with the number of students reflected in Item 7 of the ED102 reports. The district participates in a co-op program for special education services. It is not possible at this time to identify these students due to fluctuating enrollments in these facilities.
01-5C-L	The number of students identified as receiving special education in the district on the district summary report is greater than the number of students reported in Item 7 of the individual school reports. The time these students spend on special education classes is limited therefore they have not been categorized on the school reports.
01-5C-M	The number of students identified as receiving special education in the district in Item 5c of the ED101 report is less than the number of students identified by handicapping condition in Item 7 of the ED102 reports. School reports include preschool special education students who are not reflected on the district report.
01-5C-N	The number of students identified as pupils receiving special education services in the district schools includes pupils who (a) are quasi-residents whose status cannot be determined until specifications are received from the Board of Education, and (b) are receiving special education in non-district facilities and who have been included in the counts of the individual schools for state funding purposes.
01-5C-O	The number of students identified as receiving special education in the district on the district summary report is greater than the number of students reported in Item 7 of the individual school reports. The difference is caused by the ten children (included in the district count) who attend special education program in off campus foster care homes administered by the district.
01-5C-P	The inconsistency between the number of pupils in special education programs on the district summary report and the sum of the numbers reported in Item 7 on the individual school reports is due to the different method of counting pupils in the Speech Impaired Program.
01-5C-Q	The number of students identified as receiving special education on the district summary report is inconsistent with the number of students reflected in Item 7 of the individual school reports. This is because the special education services are contracted by BOCES; pupils who received services are reported on the individual school reports but not in Item 5c of the district summary report. (All these pupils are reported in Item 5d-receiving in non-district facilities.)
01-5C-S	All special education programs in this school district are funded, staffed, and administered by the Spaulding County Office.

CODE	CODE DESCRIPTION
01-5C-T	The number of pupils reported as receiving special education services in the district does not include 66 pupils who were identified as in need of special education services whose parents refused permission for placement.
01-5C-U	The inconsistency between the number of pupils receiving special education services in the individual schools and those reported on the district summary report is caused by the inclusion of homebound pupils who are receiving services on the district report (but who are not included in any one of the schools' count).
01-5C-V	The number of pupils receiving special education services in the district includes students who have not been identified as needing special education services. They are in the programs part-time per their parents' request.
01-5D-A	Data regarding pupils who received special education services from non-district facilities are not available.
01-5D-B	Data reported in Item 5b of the district summary report do not include the one student who received special education services in a non-district facility who was not screened by the district.
01-5X-B	Data reported on the district summary report indicating students receiving special education services (Item 5c) are different from the number of students reflected on the school reports by handicapping condition (Item 7). This discrepancy is caused by data being gathered on two different dates.
01-5X-C	The number of students identified as requiring (Item 5b) and receiving special education in this district (Item 5c) reported on the district summary report is less than the number of students identified by handicapping condition (Item 7) of the individual school reports. The individual school reports identify parochial as well as district students who receive special education services in this district.
01-5X-D	Information concerning pupils who have been identified as requiring special education services (Item 5b) and receiving such services (Item 5c) on the district summary report are not provided since all special education services are provided by the St. Louis County Special Education District. The reporting district has included in Item 5d all district pupils who are receiving services provided by the St. Louis County Special Education District in other school districts; and reported all students receiving special education services at the district schools on the individual school reports. (A possibility exists that the same students may have been included on the St. Louis County Special Education District's counts.)
01-5X-E	The number of students identified as requiring and receiving special education in this district on the ED101 report is less than the number of students identified by handicapping condition on the ED102 reports. School reports contain duplicated counts for those students receiving special education in more than one program. The district is unable to correct this discrepancy.
01-5X-F	The Special Education School District of St. Louis County services all districts in the county, some of which may have been included in the 1986 Survey and, thus, reported separately. Notes on the district summary indicated that the district provides services in the following setting: a. SSD Buildings = 2,141 b. Self-Contained Classrooms in LEA's = 1,593 c. Resource Rooms in LEA's = 13,330

CODE	CODE DESCRIPTION
01-5X-G	No data are reported for special education services in the district. Note on ED101 report indicated that special education is administered by the Special Education School District of St. Louis County.
02-4X-A	There are no grades indicated as offered. Courses are taken cross grade and graduation is based on the number of units taken.
02-4X-B	The reporting school indicates grades offered even though an ungraded status is checked. Grades indicated reflect the grade span of education offered but students advance at their own pace.
02-4X-C	Grades offered are to indicate age levels of pupil in special education programs. At this school, only grades 7 and 8 are actual grades.
02-5A-A	There were no students enrolled at this school for year 1986-87.
02-5A-B	The racial/ethnic categorization for the pupils reported in pupil membership (Item 5a) is not available.
02-5A-C	Race and sex categorization for a number of pupils reported in membership cannot be provided because information is not on file or, information is not declared by pupils' parents.
02-5A-D	The sex categorization for the students reported in membership (Item 5a) is not available.
02-5A-E	The racial/ethnic and sex categorization for the pupils reported in membership are not available.
02-5A-F	This is a special education only school. At the time of the report, however, school membership included only expectant mothers. There were no pupils enrolled in special education programs at the time of the report.
02-5A-G	Pupil membership of this special education school includes non-special education pupils (e.g., pregnant pupils) who were attending classes here at the time of the report. Membership data (Item 5a), therefore, do not equal the special education data (Item 7).
02-5A-H	The racial/ethnic categorization of the pupils in membership will not equal the total number of pupils in membership because the reporting school includes an additional category "other" that cannot be put on file.
02-5B-A	Students reported as enrolled in language assistance programs (Item 5b2) are inconsistent with students reported as in need of language assistance (Item 5b1). These are students who do not require language assistance, but are enrolled in these programs for a variety of reasons, such as required bilingual education and enrichment purposes.
02-5B-B	Information regarding race for students requiring and/or enrolled in language assistance programs are not maintained since this is a special facility where each student is provided an individualized educational program.
02-5B-C	Information regarding the race or ethnicity of students reported as in need of and/or enrolled in language assistance programs (Items 5b1 and 5b2) is not available.
02-5B-D	The racial/ethnic breakdown of students in need of and enrolled in language assistance programs is less than the total reported because some students or their parents or legal guardians decline to declare the student's ethnicity.

CODE	CODE DESCRIPTION
02-5B-E	The racial/ethnic categorization of students reported in Item 5b is inconsistent with data reported for students in membership in section 5a. Ethnic determinations for language assistance (Item 5b) had been provided by district or school department personnel. Ethnic determination for membership data (Item 5a) had been provided by parents.
02-5B-F	The racial/ethnic breakdown of students reported as in need of and enrolled in language assistance programs (Item 5b) is greater than the enrollment figures (Item 5a) in some categories. This is because students who are reported in membership at other schools attend this facility for language assistance programs.
02-5B-G	The students classified as in need of language assistance programs are not enrolled due to parental requests.
02-5B-H	Information for students in need of and/or enrolled in language assistance programs (Items 5b1 and 5b2) is not available.
02-5B-I	The information regarding students in need of language assistance programs, enrolled in language assistance programs, and those in membership will be inconsistant. This was caused by incompatible sources.
02-5B-J	The pupils who are enrolled in the language assistance programs at the school have not been not evaluated. These are children of Spanish speaking migrant workers; their enrollment in the language assistance programs was only on a temporary, short-term basis (six weeks).
02-5C-A	Information to correct the discrepancy between the number of students reported by race and total, and the number reported by sex could not be provided for students enrolled in gifted/talented programs (Item 5c).
02-5C-B	A discrepancy will remain between the data reported for students enrolled in gifted/talented programs (Item 5c) and data reported for pupils in membership (Item 5a) because information to complete these items was gathered from two separate sources and/or at two different times.
02-5C-C	The racial/ethnic categorization of pupils in the gifted/talented programs is not available.
02-5C-D	The racial/ethnic categorization of pupils enrolled in gifted/talented programs differ from students reported in membership because students in membership at other schools in this distirct attend this facility for the gifted programs only.
02-5C-E	The racial/ethnic breakdown of pupils in the gifted/talented programs is less than the total number of students in those programs due to undeclared ethnicity.
02-5C-F	Information to provide sex determination of students enrolled in the gifted/talented programs is not availale.
02-5C-G	Students are reported in gifted/talented programs since these programs are provided at this facility. Students are counted in membership at the schools they normally attend.
02-5C-H	Information to provide the race and sex of pupils enrolled in the gifted/talented programs is not available.
02-5C-I	Information to provide the number of pupils enrolled in the gifted/talented programs is not available.
02-5D-A	Records regarding corporal punishment have not been maintained/ records are destroyed at the end of the school year/or, data regarding corporal punishment are not available for this facility.

CODE	CODE DESCRIPTION
02-5D-B	Records indicating the sex of students receiving corporal punishment have not been maintained, or data are no longer available.
02-5D-C	Records indicating the race categorization of pupils receiving corporal punishment in the previous year have not been not maintained.
02-5D-D	Information to provide the race and sex categorization of pupils receiving corporal punishment is not available.
02-5D-E	The racial/ethnic categorization of pupils receiving corporal punishment does not equal the total number of pupils receiving corporal punishment due to undeclared ethnicity.
02-5E-A	Information to correct the discrepancy between the racial/ethnic breakdown and the total and the male/female breakdown for students suspended cannot be provided.
02-5E-B	Data to provide the racial/ethnic and sex categorization of students suspended were not maintained or are no longer available.
02-5E-C	Records indicating the sex of students suspended have not been maintained or these data are no longer available.
02-5E-D	The percentage of suspensions to enrollment is verified as accurate. Suspensions reflect students reported in membership (Item 5a) at other schools in this district. Suspension data reflect students suspended from this facility regardless of whether they were suspended from their home school or not.
02-5E-E	Records regarding the race/ethnicity of students suspended have not been maintained. These data, therefore, cannot be provided.
02-5E-F	Data to provide information regarding students suspended have not been maintained; records are destroyed at the end of the school year; or data are not available.
02-5E-G	The racial/ethnic categorization of pupils suspended does not equal the total number of pupils suspended due to undeclared ethnicity.
02-5X-A	Data regarding corporal punishment (Item 5d) and suspensions (Item 5e) are reported in RE Simpson School (school ID# 86002). In the previous year, these two schools had been one, under the name of RE Simpson K-8.
02-6X-C	The pupil assignment section (Item 6) does not contain data since this is a correspondence school.
02-6X-D	The racial/ethnic categorization of students reported by pupil assignment will be inconsistent with the racial/ethnic categorization of students in membership (Item 5a). Membership data reflects enrollment as of a different date than the enrollment used for completion of Item 6.
02-6X-I	The classroom data are reported by grade since pupils are taught by grade levels and teachers rotate.
02-6X-J	The classes are not self-contained, therefore, data cannot be provided.
02-6X-K	A grade is not indicated in the classes where grades are combined and no separation of the pupils in the requested grade can be made available.
02-6X-L	No classroom information is reported since elementary pupils in this school are homebound and/or hospital bound.

CODE	CODE DESCRIPTION
02-6X-M	The number of students reported in any of the racial/ethnic categories in the classroom assignment section may be greater than those categorized in membership. This discrepancy has been caused by incompatible sources.
02-6X-N	The grade with students reported in classrooms is the only elementary grade with students enrolled.
02-6X-O	Classroom assignment section does not apply because all elementary pupils of this school are in independent study.
02-6X-P	Information regarding pupil assignment by classrooms in the lowest and highest elementary grades is not available.
02-6X-Q	This item does not apply since there are no pupils enrolled in the lowest or highest elementary grades at the school, or the enrollment is very small.
02-6X-R	The size of the classroom reported in Item 6 has been verified as accurate (most large size classrooms have team teachers).
02-6X-S	The information reported reflects the actual lowest and highest elementary grades at this school (i.e., grade 5 is considered the highest elementary grade instead of grade 6, therefore, grade 5 classes are reported).
02-6X-T	The information reported is verified as accurate. The school does offer grade 6 and has two sixth graders enrolled. The pupil assignment data showed classes in grade 5, however, because the two sixth graders have been reported as part of pupil membership for the middle school (School ID# 80002).
02-6X-U	Data are to remain as reported. It is difficult for the district to reconstruct requested information to accurately reflect classroom assignment for the correct elementary grade at the time of the report.
02-6X-V	Information concerning pupil assignment are reported by grades instead of by classrooms. Data cannot be reported by classes because students develop at their own pace.
02-6X-W	Classrooms in this school are grouped by subjects rather than by grade levels. This question, therefore, does not apply.
02-6X-Y	Data are not provided since the elementary grades in this school are not categorized according to grade levels. This is a special school--a center for ungraded special education classes, elementary Limited English Proficiency classes, and certain secondary vocational classes.
02-6X-Z	There are more than thirty classrooms in the lowest and highest elementary grades. Data for the highest elementary classes are reported but are not on file.
02-XX-A	The pupils attending this facility have already been included in their home school's report counts. No information is shown on this report (except when the information is relevant only to this facility and has not been included in the home school's report) to avoid duplication of information.
02-XX-B	Most data items on the school report do not apply because this is an all correspondence school.
02-XX-C	This is a post graduate and adult education school. Data for this school are not pertinent to the survey.

CODE	CODE DESCRIPTION
02-XX-D	This is a special school for children with drug and alcohol problems. Pupil enrollment varies. Data reported have been verified as correct. Data that have been included in the pupils' home schools have not been reported here.
02-7D-A	The information reported for "Deaf" category includes one student who came in from another district for special education services.
02-7(line #)-B	Information concerning race and sex is not available.
02-7(line #)-C	Information concerning race categorization is not available.
02-7(line #)-D	Information concerning sex categorization is not available.
02-7(line #)-E	Time breakdown is not available for pupils in this category of handicapping condition.
02-7(line #)-F	Information on pupils who have been identified as having limited English proficiency in this handicapping category is not available.
02-7(line #)-G	Data are not available.
02-7M-H	Time breakdown is not available for the preschoolers included in the total number of special education pupils in this school.
02-7X-B	This facility does provide special education programs. However, since services are also provided at the students' home school, they are not reported by handicapping condition in Item 7 on this ED102 report to prevent duplication of student counts.
02-7X-E	The total number of students reported by handicapping conditions in Item 7 includes those who are receiving services but who cannot be included in any one of the categories.
02-7X-F	Data to complete special education enrollment by the handicapping condition in Item 7 have been provided by the special education department. Data regarding membership (Item 5a) have been provided by the school. Since these data were collected from these two sources at different times, some discrepancies will remain.
02-7X-G	The school does offer special education services but there were no pupils enrolled in the reported period.
02-7X-I	The racial/ethnic categorization of students reported in special education (Item 7) is inconsistent with the categorization of students reported in membership (Item 5a) in the school. This occurs because there are students from other school districts or from other schools in this district who attend this facility for special education and are also identified in Item 7.
02-7X-J	The number of students identified in Item 7 as limited English speaking (col. 9) may be greater than the number of students identified as in need of language assistance (Item 5b1) because Item 7 reflects students whose parents have reported that a language other than English is spoken in the home. Item 5b reflects only those students tested and found in need of language assistance.
02-7X-K	This school offers only special education services. The pupils reported in membership (Item 5a) and those reported in special education programs by the handicapping condition in Item 7 are inconsistent because the data were collected on different dates.

CODE	CODE DESCRIPTION
02-7X-L	This school shows 100% of enrollment in special education in Item 7. However, this school does not offer special education only. The bulk of this facility's enrollment is post-secondary, attending classes during the evening. The special education students are secondary students. Other secondary students attending here would be counted in membership (Item 5a) at their home school.
02-7X-M	The total figure reported on line 7m is greater than the total number of students categorized by condition in lines "a" through "l" of section 7 of the ED102 form. This discrepancy occurs because the total includes preschool students who are noncategorized.
02-7X(line #)-N	The racial/ethnic categorization and/or the total enrollment of students identified by the handicapping condition in Item 7 are not consistent wih the categorization of students in membership (Item 5a). These data have been collected on different dates.
02-7X-O	This school offers only special education as indicated in Item 4 of the individual school report. However, not all of the students in membership (Item 5a) had been reported in Item 7 because the membership counts included 22 headstart pupils.
02-7X-P	Inconsistency will remain between the racial/ethnic breakdown of pupils in membership (Item 5a) and those in special education (Item 7). The district cannot reconstruct data to correct this problem.
02-7X(line #)-Q	The racial/ethnic categorization of pupils in this category does not equal the total number of pupils due to undeclared ethnicity.
02-7X-S	This school does offer 100% special education. However, not all pupils enrolled at the school are in special education programs; some are awaiting final testing before placement. The number of pupils in special education (Item 7), therefore, is not consistent with those enrolled at the school.
02-7X-T	Homebound pupils served and are included in the special education counts (Item 7) have not been included in membership counts (Item 5a). The information in Item 7, therefore, shows more students than in enrollment.
02-8A-A	Information regarding the sex breakdown of pupils enrolled in Home Economics classes is not available.
02-8A-B	Information regarding pupils enrolled in Home Economics classes is not available.
02-8B-A	Information regarding the sex breakdown of pupils enrolled in Industrial Arts classes is not available.
02-8B-B	Information regarding pupils enrolled in Industrial Arts classes is not available.
02-8C-A	The number of students reported by sex and/or the total number of students reported as enrolled in Physical Education classes (Item 8c) is inconsistent with the number of students categorized in membership (Item 5a) at this facility. This discrepancy occurs because data for completion of these two items were collected on two different dates.
02-8C-B	Information to report pupils in Physical Education classes included pupils who came in to the school for physical education who are not members of this school.
02-8C-C	Information regarding the sex breakdown of pupils enrolled in Physical Education classes is not available.

CODE	CODE DESCRIPTION
02-8C-D	Information regarding pupils enrolled in Physical Education classes is not available.
02-8C-E	Pupils reported in physical education may contain duplicated count of pupils included in the count of another school (middle school) in the district.
02-8X-A	No data are available for any one item in the selected course enrollment question.
02-8X-B	Selected courses enrollment data cannot be separated for grades 7-9 only. Pupil counts may also be duplicated.
02-8X-C	The pupils reported in the selected course enrollment for this school are from an exceptional education unit attached to this school. (This school only has sixth graders.)
02-8X-D	Selected courses are offered through correspondence only.
02-8X-E	Information reported may include duplicated counts of students who are enrolled in more than one course. No pupil counts are available.
02-8X-F	Data cannot be provided for the selected course enrollment since these are exploratory courses only and pupils are not enrolled by grade level.
02-8X-G	Data included pupils from another school who attend classes at this school. The number of pupils reported, therefore, is inconsistent with the school membership data.
02-8X-H	Information reported reflects all pupils at the school.
02-8X-I	Information reported are to be left as reported. No further corrections/clarification are available.
02-9X-A	Although this school does not indicate that grade 12 is offered in Item 4, a number of students did receive high school diplomas from the school. Data reported in Item 9 have been verified as accurate.
02-9X-B	Data regarding high school graduates are not available. Therefore, Item 9 will remain blank.
02-9X-C	There are no students reported as graduates from this facility because all graduates are reported in the other campus of this school on a separate ED102 form.
02-9X-D	This school serves as a "home base" for grades 9 and 10. There are students in grades 11 and 12 who attend here but are "based" elsewhere. In 1984 there were students who received diplomas from this school.
02-9X-E	There are no students reported as graduates from this facility because these are "shared time" programs. Students from parochial schools attend this school on a part-time basis for specific courses and would receive diplomas from their parochial schools.
02-9X-F	This school does not indicate a grade 12 as offered (Item 4). There are students reported in item 9 who graduated last year, however, when this school did offer grade 12.
02-9X-G	Item 9 has been completed to reflect both students receiving high school diplomas as well as students earning G.E.D's issued during the previous year at this ungraded facility.
02-9X-H	Racial/ethnic categorization of students receiving high school diplomas (Item 9) is not available because such records were not maintained at this facility.
