Purpose of the Dataset

In March 2020, Zambia and Malawi reported their first cases of Covid-19, with both governments restricting non-essential travel, banning large public gatherings, and establishing emergency committees to spearhead efforts to contain the pandemic at a national level. GLD implemented a study in 2020 in both Malawi and Zambia to generate a better understanding of citizens' responses to such measures, and the impact of the pandemic on their individual lives and communities. In order to generate as complete a picture as possible of the local situations over time, we conducted three survey rounds in Malawi and two rounds in Zambia. These rounds provided a total of 17,643 observations, gathering information on issues including knowledge of Covid-19; attitudes and fears surrounding health and economic impacts; social, economic, and health vulnerabilities; social distancing practices and other preventative measures. Particular attention was paid to the local variation in concerns over the social stigma, levels of enforcement, and engagement of different authorities.

This study has two primary objectives:

1. To generate information and actionable insights for government officials, CSOs, donors, other stakeholders and the public
2. To provide insights for academics and practitioners concerned with understanding the relationships between individual, household, and community vulnerabilities and resilience in the face of crises.

Infographics summarizing these variables can be found here: https://gld.gu.se/en/our-research/completed-projects-a-z/developing-a-locally-rooted-approach-to-covid-19-response/

Scope of Data

Data Collection Round 1: May 7, 2020 to June 2, 2020

Data Collection Round 2: August 21, 2020 to October 7,2020

Data Collection Round 3: March 9, 2021 to May 01, 2021

Regions: Northern, Central, Southern

Respondents had to be able to be reached by phone.

Overview of Sampling

The sampling frame for the first round of the panel was based on LGPI 2019 household survey respondents living in the Central and Northern regions of Malawi as well as LGPI 2016 household survey respondents that live in the Southern region. Only respondents that agreed to follow up contact and for whom we were able to obtain telephone numbers are included in the sampling frame. A detailed description of the sampling plan for the LGPI

2019 survey, along with the LGPI 2019 datasets, can be found in the Harvard Dataverse repository: https://dataverse.harvard.edu/file.xhtml?fileId=8939027&version=6.0. Trained enumerators from by the Institute of Public Opinion and Research contacted respondents via phone and recorded responses in the SurveyToGo app. Enumerators were trained to first try to contact the previous LGPI respondent, but if that was not possible, a replacement respondent was allowed.And the sampling frame for Round 2 was an extension of round one which included, in addition to the initial sampling frame, replacement respondents identified in round 1. The same logic applied for Round 3. Therefore, the sampling frame from Round 3 consisted of the Round 2 sampling frame, minus those who refused participation or follow up contact, and replacement respondents who agreed to follow up contact.

Response Rate

Number of Observations Round 1: 4658

The response rate for the survey was: 99%

Number of Observations Round 2: 4908

The response rate for the survey was: 99.5%

Number of Observations Round 3: 4127

The response rate for the survey was: 94%

Consent Statment

Round 1

We are currently conducting a survey on Covid-19 and would like to talk to you today. Your answers will be confidential. They will be put together with about 3500 other people we are talking to, to get an overall picture. It will be impossible to pick you out from what you say, so please feel free to tell us what you think. This interview will take about 15 minutes. There is no penalty for refusing to participate.

We would like your opinion with the knowledge that there are no right or wrong answers to these questions and that you may stop the survey at any time.

Are you willing to participate in this survey, either now or at another time?

Round 2

Participation in our Covid-19 survey is voluntary, and your answers will be confidential. They will be put together with about 3500 other people we are talking to, to get an overall picture. It will be impossible to pick you out from what you say, so please feel free to tell us what you think.

This interview will take about 30 minutes. There is no penalty for refusing to participate.

We would like your opinion with the knowledge that there are no right or wrong answers to these questions and that you may ask for clarification or stop the survey at any time. You are also free to skip questions you consider personal or invasive without penalty.

We are able to offer you 1000 Kwacha in airtime for completing the survey.

Are you willing to participate in this survey, either now or at another time?

Round 3

Participation in our Covid-19 survey is voluntary, and your answers will be confidential. They will be put together with about 4000 other people we are talking to, to get an overall picture. It will be impossible to pick you out from what you say, so please feel free to tell us what you think. This interview will take about 30 minutes. There is no penalty for refusing to participate. We would like your opinion with the knowledge that there are no right or wrong answers to these questions and that you may ask for clarification or stop the survey at any time. You are also free to skip questions you consider personal or invasive without penalty.

By agreeing to take the survey, you are giving us the right to transfer the information you provide to our research partners at the Program on Governance and Local Development at the University of Gothenburg in Sweden.

You may withdraw your consent for us to process your data at any time by calling [PHONE NUMBER WE CHOSE TO USE].

We are able to offer you 500 Kwacha in airtime for completing the survey.

Are you willing to participate in this survey, either now or at another time?

Note

1. Suffixes corresponding to the survey rounds are assigned to variable names as _r1, _r2, and _r3.
2. For some demographic variables, such as region, district, educational level, and pre-existing condition, the information of round two and three respondents has been updated from preceding rounds, including LGPI 2016 and LGPI 2019. We have included a variable that states the surveys in which each respondent participated.
