A New You, That's Who: An Evaluation of Short Videos on Puberty and Human Reproduction

Appendix

Table S1: ANCOVA models

Reproductive Health Knowledge

Source	*df*	*SS*	*F*	*p*	η^2
Condition	1	351.88	37.16	<0.001	0.31
Gender	1	30.46	3.21	0.08	0.03
Income (adjusted for family size)	1	6.23	0.66	0.42	0.01
Age	1	37.20	3.93	0.05	0.03
Puberty Attitudes					
Source	*df*	*SS*	*F*	*p*	η^2
Condition	1	0.05	0.09	0.78	0.00
Gender	1	7.68	14.26	<0.001	0.16
Income (adjusted for family size)	1	0.14	0.01	0.91	0.00
Age	1	0.01	0.15	0.60	0.00

Note. Analysis of covariance (ANCOVA) models exploring whether reproductive health knowledge and puberty attitudes were predicted by condition assignment, controlling for child gender, income (adjusted for household size), and *age*. This differs from the models reported in the body of the manuscript, which controlled for pretest scores rather than age.
