Attached are the executable Matlab files that may be used to run the simulations described in the paper "A note on observational equivalence of micro assumptions on macro level".

Rational.m simulates the rational agents' world.

Learning.m simulates the learning agents' world.

Hybrid.m simulates the mixed strategies' agents' world.

The output includes:

Aggregate fitness series (FITall)

Aggregate price series (Pall)

Aggregate output series (Qall)

Trend demand series (Dall)

Trend costs series (Call)
