Replication package for "Entry Costs Rise with Growth" by Peter Klenow and Huiyu Li

October 13, 2024

Description of folders and files

raw data contains data as obtained from the source. Data_glossary.xlsx lists the sources and download date

code contains code that processes the data and calculates the results in the paper. The programs are:

national.R creates Figure 1, Tables 1 and A2

state.R creates Figure 2, Tables 2, 3, A3, and A4

GMM.R creates Table 4

robustness.R creates Tables 7, 8, 10, A5, A6

processCBP.py filters and combines yearly CBP data files to produce "raw data/Census_CBP/cbp_1986_2020.csv"

output contains the tables and figures produced by "code" programs

Additional notes

- Table 5 is directly produced according to the notes below the table.
- Table 6 and 9 are produced using restricted Census data, which we cannot include in the replication file. Folder **code/Census/** contains the programs used to produce these tables.
