Preface

Bureau of Statistics Khyber Pakhtunkhwa has been annually releasing Development Statistics since 1980. The publication is based upon secondary data and contains latest and comprehensive statistics on a wide array of subjects with district-wise breakdown. Statistical Abstracts highlighting comparative picture of Khyber Pakhtunkhwa with Pakistan have been given in the outset of the publication, while glossary of the terms used in the report has been provided at the end.

In some cases, national level data with provincial breakdown have also been incorporated to enable data users to make comparative analysis of national, provincial and district level data.

Efforts have been made to expand the scope and coverage of statistics by incorporating new tables in the sectors such as Education, Employment and Sports & Tourism.

Bureau of Statistics is extremely thankful to the Provincial Line Departments, District Governments and other data generating organizations for their cooperation in supplying requisite data for this publication. The team efforts of the staff of Bureau of Statistics in producing this publication are highly appreciated.

It is hoped, that the publication will best serve the needs of policymakers, planners, academia, researchers and other data users in context of evidence–based planning, decision - making and quantitative analysis

For convenience and easy accessibility to larger users of the data, the publication has been made available on the official website of Bureau of Statistics www.kpbos.gov.pk. Suggestions for improving the coverage and format of the forthcoming publication would be welcomed.

Agriculture

Explanatory Note on Agriculture, Forestry and Fisheries Sectors:

This Chapter covers Agriculture, Forestry and Fisheries sectors. Agriculture constitutes the largest sector of our economy. Majority of the population is directly or indirectly dependent on this sector. According to Pakistan Economic Survey 2021-22 it contributes about **22.68** percent to Gross Domestic Product (GDP) and accounts for significant employed labour force.

Ensuring food security and controlling food inflation are the main tasks for macroeconomic policymakers, especially in the context of poverty alleviation interventions. These tasks call for a multi-pronged strategy to make agriculture sector efficient, competitive and sustainable.

The section on agriculture contains statistics on a number of important aspects, a summary of which is highlighted below:

i. Province-wise area, production and yield per hectare of major crops.
ii. District-wise and year-wise area, production and yield per hectare of major crops, minor crops, fruits, vegetable and pulses.
iii. Land Utilization.
iv. District and year-wise area irrigated by different sources.
v. Number of farms by size, total fertilizers off-take by type and by districts, tractor population by districts, district and year-wise activities of soil conservation.

The statistics contain yield data on the most important crops in Khyber Pakhtunkhwa. The yield and production of major crops show varied results on district-wise comparison. The yield for major crops in the province is below the national average.

Out of the cultivable area in the province only **1.85** million hectare is cultivated, whereas **1.31** million hectare is culturable waste, signifying the need to bring more area under cultivation so as to address the issue of food security and rural livelihood in the long- term.

The share of development budget for Agriculture sector in FY 2022-23 the total size of the ADP remained at **3.89** percent, which is not sufficient to confront the issues of low productivity, food security and rural livelihood.

Forestry:

The basic pillars of food security are availability, accessibility, utilization and sustainability.

The important set of information covered in this document relates to district-wise food storage accommodation in government go-downs and district-wise stock position of Wheat with data on availability and production. It is expected that this data will add value to developing plans and strategies aiming at food security and monitoring the situation of food.

Education

Explanatory Note on Education Sector

Education is not only globally recognized basic human right but also a key driver of economic growth due to its varied linkages with employability, productivity, environment, health and human resource development. Industries

Explanatory Note on Manufacturing Industries Sector

The manufacturing sector has been a major contributor towards promoting economic growth, employment generation, competitiveness and trade development. It is witnessing gradual buildup in its share in the GDP and its importance has increased tremendously during recent years in the wake of emerging issues of poverty, over-population, unemployment and increase in import bill of manufacturing items.

Industrialization is an important driver for the development of an economy. It commanded a central position in the developmental plans for the growth of the Pakistan's economy as manufacturing provides job opportunities to the population. The chapter on Industries contains 19 tables and provides basic data on number of Registered Industrial Units classified by major groups.

Census of Manufacturing Industries (CMI)

Pakistan Bureau of Statistics conducts Census of Manufacturing Industries (CMI) after every five years under the Statistical Act, 2011 in collaboration with the Provincial Directorate of Industries and Provincial Bureau of Statistics. It provides basic data on Fixed Assets, Inventories, Employment, Employment Cost, Industrial Taxes, Overhead Expenses, and Value of Production and Value Added etc.

It covers those establishments, which are engaged in manufacturing activities whether for whole or part of the year with single or joint ownership/ control and are registered under Factories Act, 2013. Some factories liable for registration are also covered. However, defense and government workshops, though engaged in manufacturing activities and registered under factories act, are excluded from the purview of the Census.

Monthly Survey of Industrial Production and Employment

The Monthly Survey of Industrial Production & Employment is a regular monthly publication released by Bureau of Statistics, Khyber Pakhtunkhwa since 1976. It provides information on production covering quantity, value and employment with regard to 13 types of large-scale manufacturing industries situated in Khyber Pakhtunkhwa.

An Historical Analysis of Population Census Data

Introduction

Population has long been recognized as one of the most important factor in the economic and social development process. Population growth patterns are linked to nearly every matter confronting humanity including poverty, urban pollution, education, energy production, roads, food, water scarcity and human health.

Population Census

Since independence, Six Population Censuses have been conducted. First decennial Population Census of Pakistan was conducted during the period from 9th to 28th February 1951, the second from 12th to 31st, January 1961, the third from 16th to 30th September 1972, the fourth from 1st March to 15th March 1981 and the fifth from 2nd March to 18th March 1998.

The sixth Population Census was conducted in two phases: Phase-I from 15th March to 13th April 2017 and Phase-II from 25th April to 24th May 2017. The sixth decennial Population Census was preceded by a full-fledged Housing Census. The Census figures covered the Population residing in Pakistan on 15th March 2017 excluding the Afghan Refugees living in Camps.

The Khyber Pakhtunkhwa Population as per 2017 Pakistan Census Report is 30.51 million which constitutes 14.69% of the population of Pakistan. The Population of this Province has increased at an average Annual Growth Rate of 2.89% over and above the National Growth Rate of 2.40%.

At the time, Census 2017 was conducted; the Newly Merged Areas were not part of the Khyber Pakhtunkhwa and were known as Federally Administered Tribal Areas (FATA). It comprises of 7 Agencies (Newly Merged Districts now) and 6 Frontier Regions (Tribal sub-divisions). Total population of erstwhile FATA was 4,993 thousand which is 2.41% of the Pakistan Population and 14.08% of the combined Khyber Pakhtunkhwa. The Average Annual Growth Rate of the Newly Merged Areas has been recorded as 2.41%.

The Population, Inter-Censal increase and Annual Population Growth Rates since 1951 in the province are provided in the following table:

Khyber Pakhtunkhwa Population

Sr. No.	Year of Census	Population (In Million)*	Inter Censal Increase (%)	Annual Growth Rate- Inter Censal (%)

* = The figures in the table may not be exact due to rounding.

The sex ratio (males per one hundred females) in 1998 was 105, which is 103 in 2017 Census thus registering a decline. The population density has increased to 238 persons

per Square Kilometre in 1998 Census as compare to 148 persons per Square Kilometre in 1981. Similarly, the population density increased to 409 persons per square Kilometre in 2017 Census. Population density including Merged Areas is 349 persons per square Kilometre in 2017 Census.

Provincial Comparison

The inter-provincial comparison from various dimensions and angles of population is given in the table below:

Analysing the data from proportion point of view a substantial increase has been witnessed in case of Khyber Pakhtunkhwa whose proportion has been increased from 13.4% in 1998 to 14.69% in 2017. A slight increase in case of Sindh, Balochistan, FATA and ICT can also be observed. Punjab province shows a decreasing trend in the proportion dropping down to 52.96% in 2017 as compared to 55.63% in 1998.

Population Projection

For Population Projection, the growth rates as given in the Pakistan Economic Survey (worked out by National Institute for Population Studies) were not applied to Projections for the District as the NIPS did not calculate it for districts, so the inter-censal growth rates (1998-2017) were applied to the district projections by using the following formula:

$P_1 = P_o (1+ r/100)^n$ where,

P_o= Population of base Census
P_1= Population of latest Census
r = Growth rate
n = Time Interval (in years) between two Census

Dependency Ratio

The ratio of persons in the ages defined as dependent (under 15 & over 64 years) to those in the ages defined as economically active (15-64 Years) in the Population.

Crop yield
Crop yields mean harvested production per unit of harvested area for crop product.

Crude Birth Rate (CBR)

Crude Death Rate (CDR)
CDR is defined as the ratio of the number of deaths during the year to the average population in that year; the value is expressed per 1000 inhabitants.

Crude Labour Force Participation Rate
The percentage of persons in Labour Force to the total Population.

Cultivated Area
It comprises that land which is sown at least during a year or the preceding year.

Culturable Waste
It comprises that uncultivated land, which is fit for cultivation but was not cropped during the year or in the preceding year.

Culturable Area
It is the composite of cultivated area and culturable waste.

Current Fallow
The cultivated area which is not cropped during the year, but was cropped during the preceding year.

D

Data analysis
Data analysis is the process of transforming raw data into usable information, often presented in the form of a published analytical article, in order to add value to the statistical output.

Dependency Ratio
The ratio of persons in the ages defined as dependent (under 15 and over 64 years) to those in the ages defined as economically active (15-64 Years) in the population.

Dispensary
A Health Institution having less than 10 beds.

Dropout Rate
Dropout rate is the proportion of the students dropped by gender/ level in reference year.

E

Enrolment Gender Parity Index (EGPI)
The ratio of the female to male gross enrollment rate measures progress towards gender equity in gross enrollment rate at primary level. When the gender parity index shows a value equal to one, boys and girls enrollment are equal in terms of gross enrolment rates. A value less than one indicate that proportionately fewer girls than boys have enrollments.

F

Fertility Rate
Average number of children that would be born to a woman during her lifetime if she were to pass through all her childbearing years (15-49) conforming to the age-specific fertility rates of a given year.

Food Security
When all people at all times have access to sufficient safe, nutritious food to maintain healthy and active life.

A health institution is defined as an institution, which provides health services, curative and preventive to all specific class of the public as outdoor/indoor, patients.

Hospital
A Health Institution having 10 or more than 10 beds. However, this definition will not be held where Government has differently named an Institution e.g. Rural Health Centre.

I

Infant Mortality Rate (IMR)
IMR is defined as the ratio of the number of deaths of children under one year of age to the number of live births in the reference year; the value is expressed per 1000 live births.

K

Kharif Crops
Kharif crops are sown in summer and harvested in late summer or early winter. The important Kharif crops are cotton, Rice, Sugarcane, Maize, Jowar and Bajra.

L

It includes the population consisting of employed and unemployed.

Labor Force Participation Rate
It indicates the ratio of the labor force to non-institutional working age population.

Land Use
Land use refers to the socio-economic purpose of the land. Areas of land can be used for residential, industrial, agricultural, forestry, recreational, transport and other purposes.
