CROPS AREA AND PRODUCTION

(BY DISTRICTS)

(1981-82 TO 2008-09)

VOLUME I

FOOD AND CASH CROPS

GOVERNMENT OF PAKISTAN
STATISTICS DIVISION
FEDERAL BUREAU OF STATISTICS
(ECONOMIC WING)
ISLAMABAD

PREFACE

Agriculture sector is the single largest contributor to economy of Pakistan, having approximately 20% share in the GDP. It is the largest source of foreign exchange earnings and meets raw material needs of the major industries of the country. Consequently, agriculture sector plays a pivotal role in the economic development of the country.

2. The availability of accurate statistical data and information is the foundation for a sound development planning. Federal Bureau of Statistics is making efforts to provide agricultural data which meet the standards of reliability and timeliness.

3. This publication "Crops Area and Production by Districts (1981-82 to 2008-09)" provides district wise disaggregated agricultural statistics. These would be of imminence value to all including policy planners, researchers and students. This is the work of the erstwhile Economic Wing of the defunct Ministry of Food and Agriculture and which after devolution is part of FBS.

4. I wish to record my appreciation for the efforts of the team engaged in collection and compilation of this publication, including Federal and Provincial organizations, which assisted the Federal Bureau of Statistics for timely compilation of this publication.

7. I hope that this publication will serve as a reference for information on agriculture in Pakistan. Any critique or suggestions to improve the publication are always welcomed.

(Asif Bajwa)
Secretary

INTRODUCTION

Economic Wing has been mandated with the task inter-alia, to disseminate crops data at federal level in the form of Crops Estimates and its yearly publications; Agricultural Statistics of Pakistan, Crops Area and Production (By Districts) and Fruits Vegetables and Condiments Statistics of Pakistan which cater to their respective purposes. Fire incident at Shaheed-e-Millat Secretariat destroyed the historical data and it was felt to revitalize the missing data to facilitate research and analysis work by providing a database which will not only make available the recent estimates but also the estimates of previous years. To cater to this need, a database was maintained, through a development project "Capacity Building of Economic Wing", which supplies the district-wise data of past 28 years i.e. from 1981-82 to 2008-2009.

The first volume of this publication is in your hands that contains data on Food and Cash crops. This publication furnishes district wise data on area and production of these crops. A graphical display of the crop situation is an added advantage to decipher the trend at a quick glance. Furthermore, in addition to giving the independent estimates for all the relevant crops, this publication also depicts the Food and Cash crops scenario in the country, as a whole. The source of area and production data in the following tables is crop estimates supplied by the provincial Crop Reporting Services and compiled by the Economic Wing of the devolved Ministry of Food and Agriculture and later by Federal Bureau of Statistics. Rounding of figures may result in slight difference. Data pertaining to other crops like Pulses, Oilseeds, Fruits, Vegetables and Condiments are in pipeline and will be published soon.

This publication will prove to be a valuable asset of Federal Bureau of Statistics and I appreciate the hard work done by the members of the Editorial Board whose dedication made possible the compilation of such a huge and refined database. Other staff members, who contributed in this effort, have also earned my sincere admiration for their devotion.

Last but not the least, I forward my humble gratitude to Mr. Asif Bajwa, Secretary, Statistics Division for providing us with his able guidance and support without which we wouldn't have come up with this achievement.

(Arif Mehmood Cheema)
Director General

CONVERSION FACTORS/ABBREVIATIONS

Weights

One pound (16. Oz)	=	0.45359 Kgs	=	0.48609 Seer.
One hundred weight(112 lbs)	=	50.80208 Kgs	=	1.361 Maunds.
One ton (2240 lbs)	=	1.01605 M.tons	=	27.22 Maunds.
			=	5.60/5.71 bales
			=	of jute/cotton
One tonne	=	0.984 Tons	=	26.792 Maunds.
Cotton bale(375 Lbs)	=	170.09 Kgs	=	4.5571 Maunds
			=	0.1674 Long ton
1 Bushel per acre	=	67.253 Kgs. per hectare		
1 Bushel	=	0.73 Maund.		
	=	29.17 Seers.		
	=	60.00 Lbs.		

Length

One inch	=	25.3999 Millimeters
One foot (12 inches)	=	0.3048 Meter
One yard (3 feet)	=	0.9144 Meter
One mile (1760 yards)	=	1.60934 Kilometers

Square Measures

One square yard	=	Nine Square Feet	=	0.83613 Square Meter
One acre	=	4840 Square Yards	=	0.40468 Hectares
One square mile	=	640 Acres	=	258.99842 Hectare
One square kilometer			=	0.3861 Square Mile
One Hectare			=	2.4711 Acres
One Cubic Meter			=	2.4711 Acres/ (35.3147 Cubic Feet)

Liquid

One imperial gallon	=	4.5461 litres or 1.2 U.S gallons
One U.S. gallon	=	3.7853 litres.

GENERAL CONVERSIONS

Divide	**By Factor**	**To obtain**
Acres	2.4711	Hectares
Long ton	0.9842	M.tons
Cotton bales (375 lbs)	5.973	Long tons
Cotton bales (375 lbs)	5.879	M.tons
Maunds	26.79	M.tons
Price per 40 kgs.	1.0716	Price/maund
Yield kgs per hect.	92.2313	Yield maunds/acre.
Rice	0.666	Paddy
Cotton Lint	0.333	Seed Cotton

ABBREVIATIONS

* = Nominal
N.G. = Not Grown
N.A. = Not Available

N.B.- In case of vice-versa multiply with the factor.
