# DEVELOPMENT STATISTICS OF FATA 2016

**Bureau of Statistics**
**Planning & Development**
**Department FATA**

# PREFACE

Development Statistics of FATA is an annual publication regularly released by the Bureau of Statistics FATA. The current edition is the 20th in its series. The publication is based upon secondary data and contains latest available and comprehensive statistics for the last three years on a panoptic array of subjects with Agency/FR wise breakdown. Statistical Abstracts highlighting comparative picture of FATA with Khyber Pakhtunkhwa and Pakistan is the comprehensive theme of the publication. Maximum efforts have been made by the Bureau of Statistics FATA to overcome any inconsistency in the data.

I hope that the publication will best serve the needs of policy-makers, planners, administrators, development partners, academicians, researchers and other data users in the context of evidence-based planning& decision-making.

I would like to appreciate the teamwork put in by the staff of Bureau of Statistics FATA in bringing out this publication and the cooperation extended by all the line directorates of FATA, Political Administrations and other autonomous bodies for provision of data.

For convenience and easy accessibility, the publication has been made available on the official website of FATA www.fata.gov.pk. Suggestions for improving the coverage and format of the forthcoming publication would be welcomed.

# HOUSING CENSUS 1998

A Housing Census was conducted to know the Housing density, nature of tenure, period of construction, building material, source of water supply, lighting and fuel used in FATA other than cold area, the Housing Census was conducted during the first fortnight of March 1998.

During 1998, there were 341114 Housing units in FATA whose condition in respect of construction material used, was as under:

## HOUSING UNITS BY MATERIAL USED IN OUTER WALLS AND ROOFS

| S. No. | Construction Material Used | Total Housing Units | Percent |
|---|---|---|---|
| | **OUTER WALLS** | | |
| 1. | Baked bricks/blocks/stones | 131743 | 38.62 |
| 2. | Unbaked bricks/Earth Bond | 189328 | 55.50 |

| 4. | Others | 23478 | 6.88 |
| | **Total Housing Units** | **341114** | **100.00** |

## SOURCE OF DRINKING WATER

Around 19% of the housing units are using piped water, majority of which has that facility in their own houses.

About 3.2% are using hand pump for potable water. Still 35.1% households are using potable water taken out from wells. Such facility is mostly being availed in rural areas where their percentage share is also 35.1%.

## SOURCE OF LIGHTING

Predominant housing units are using electricity as source of light representing 62.0% of the housing units both in urban & rural areas. Kerosene Oil is being used by approximately 36.1% of the housing units while other sources of light like patromax, mustard oil etc are hardly being used by 1.9% of the housing units.

## COOKING, FUEL

Approximately 92% of housing units are using wood as cooking fuel in their houses while nearly 1.7% percent are using kerosene oil for this purpose. Hardly 1.3% are using gas & 5.3% other sources of cooking fuel in their houses. Regarding urban & rural differential wood is mainly used, representing 84.7%, in urban areas and 91.9 percent, in rural housing units.

# EXPLANATORY NOTE ON POPULATION SECTOR

## INTRODUCTION

Population and Development are interlinked. Demographic patterns and population control and welfare measures may be integrated into comprehensive social and economic plans and programmes. Their integration should be reflected in the goals instrumentalities, development objectives and strategies to be followed in the National and Regional planning areas.

## POPULATION CENSUS

Population of human beings of a country/region or any economic or administrative unit is the most important Socio-Economic Indicator, which guides the planners and policy makers in their planning and decisions making for the future. Population has a great relationship with economic development of a country. Economic Development is the race between the rate of growth of income and the rate of growth of population. Countries with growing per capita income, in spite of growth of population is defined as developing countries whereas those, fail to achieve any improvement in the real income per head are referred to as stagnant countries.

Population Census is a gigantic statistical exercise undertaken by the Population Census Organization in settled areas/FATA simultaneously requiring huge financial and managerial resources to conduct it well in time.

The fifth decennial population census of Pakistan was conducted from 2nd to 18 March 1998 including FATA also. It was preceded by a full-fledged housing census, which was conducted in the 1998. The 1998 Census was a delayed census and conducted after 17 years.

It was the 2nd time in the FATA that a proper census providing for individual enumeration was carried out, as an essential feature of a census, after 1981. In all the previous censuses before 1981 census FATA estimates of population were provided by political Agents except in only a very insignificant segment of population where individual enumeration was carried out. The 1981 Census resulted in a negative population growth rate at 1.5 percent per annum in the population of FATA indicating that the earlier censuses gave over estimated figures. However the results of 1998 Census were very positive in the sense that the inter-censual growth rate (1981-98) Census is 2.19% per annum, which was, -(1.47) in 1981. As Negative growth rate could not be applied to projections, so after 1981 Census Pakistan growth rate was applied to FATA Population for projection purpose. It is also to maintain here that one Agency and Four F.R's have shown Negative inter census growth rate in the 1998 Census results.

In earlier issues of FATA Development Statistics, as adhoc measure FATA growth rate was applied to the population for projections, for those Agencies/FRs where the growth rate was negative. But this time, in consultation with the Population Census Organization, the total population of FATA has been projected using the 1998 census growth rate while the method of proportion has been applied for the Agencies/FRs' population.

The FATA population constitutes 2.40% of the population of Pakistan as per 1998 Census as compared to 2.61% in 1981 Census. The Population of the FATA has increased at an average Annual Growth Rate of 2.19% as compared to National Growth Rate of 2.69%.

The Population and its rate of increase and Annual Growth Rates since 1951 are as under:

| S. No. | Year of Census | Population (000) | Inter Censal Increase (%) | Annual Growth Rate (%) |
|---|---|---|---|---|
| 1. | 1951 | 1332 | - | - |
| 2. | 1961 | 1847 | 38.66 | 3.3 |
| 3. | 1972 | 2491 | 34.87 | 2.6 |
| 4. | 1981 | 2199 | (-) 11.72 | (-) 1.5 |
| 5. | 1998 | 3176 | 44.43 | 2.2 |
| 6. | 1951-1998 | - | 138.44 | 2.1 |

The sex ratio (Males per hundred Females) in 1981 was 108, which has registered no change in 1998. The population density has increased to 117 persons per Sq.Km in 1998 Census from 81 persons per Sq.Km in 1981.

## POPULATION PROJECTION

For population projection, the inter-censual growth rate (1981-98) was applied to the FATA's population by using the following formula:

$$P_1 = P_o \left(1 + \frac{r}{100}\right)^n$$

Where

$P_o$= Population of base year
$P_1$= Population of Current year
r = Growth rate
n = Time Interval (in years) between two Census

The proportion of population of each Agency/FR & Tehsils in the overall population of FATA in 1998 census has been applied in the corresponding projected population of FATA.
