PREFACE AND ACKNOWLEDGEMENT

This publication is the second edition of the Statistical Yearbook. It contains a wide range of themes, with each theme covering series of statistics produced by Ghana Statistical Service and other statistical producing agencies. The Statistical Yearbook was produced in recognition of the growing needs among the diverse users of statistical data.

The Yearbook has been organized in three main parts: Demographic and Social, Economic, and Other Indicators. The first and second parts of this publication provide monthly and annual trends between the period 2012 and 2015. The third part, however, consists of data from sample surveys and censuses conducted with reference period between 2012 and 2015.

The demographic and social indicators were grouped under four thematic areas: population, education, health and Tourism. The economic indicators were also grouped under ten themes: production, prices, real sector, financial transactions, fiscal, inflation rates, interest rates, exchange rates, merchandise trade and postal activities. Classification of indicators covered in this publication followed international classification structures. The indicators covered have sector groupings, sex and regional distribution, where appropriate.

The production of this Yearbook was made possible following data providers continuous provision of statistics to the Ghana Statistical Service to compile this important source of reference on the economy of Ghana. The Ghana Statistical Service, therefore, acknowledges with gratitude, the initiative and effort of the Resource and Data Centre of the Service and the contributions of all organizations that complemented the effort of the Service in the compilation of the first edition of this publication.
