Afghanistan Statistical Yearbook 2019

Issue No: 41 | March 2020

Afghanistan Statistical Yearbook 2019

Issues No: 41 | March 2020

Executive Summary

It is a matter of great pleasure for National Statistics and Information Authority as the only official statistical body in the country to have been able to publish the statistical yearbook of 2019, according to its publication calendar by timely data collection. This statistical yearbook depicts the socio-economic condition of the country and also provides an easy access to a rich source of statistical information and data which helps the ministries, government organizations, NGOs and the private sector as well as international community to formulate policies, programs and make evidence based decision.

The data and statistical information in the statistical yearbook have been collected from ministries, government organizations and private sector providing data on economic and social sectors like population, agriculture, education, health, national accounts, consumer price index, energy, construction, mines and energy, services, foreign trade, finance, statistics and foreign aids which can be used by the planners and data users for better and evidence based planning.

The Afghanistan's population is estimated to be 32.2 million for 2019-20 based on the population statistics department of NSIA. The men and women make up 16.4 million and 15.8 million of the total population respectively. Based on the estimated population figures the urban population is 7.7 million while the rural population is 23 million and the remain 1.5 million is Kochi (Nomadic). The age dependent population is 16.2 million while 15.3 million population of the country is under 15 years of age and 0.9 million is above 64 years old. The returning refugees from Pakistan, Iran and other countries were 1391 families comprising of 8079 individuals in the year 2019.

The data on educational attainment of civil service employees working in government shows that in total 334681 employees there are 430 PhD 7035 MA/MSc 38721 BA/BSc and 288495 employees have lower level of education than BA/BSc.

The Ministry of Education data shows that 10,262,497 students were enrolled in the primary, secondary, high schools, vocational high schools, technical vocational institutes, teacher training institutions, religious education and afghan students abroad in 2019.There were 970853 students enrolled in government educational institutions and 553966 students in private educational institutions The total number of teachers were 241797in 2019 out of which 211454 were in government and 30343 were in private sector.
The higher education data indicates that in 2019 total number of students of the government higher education institutions together with that of the private educational institutions were 424621 which shows 9.8 percent increase compared to the data of last year, comprising of 310,369 males and 114,252 females. The number of government and private universities and higher education institutions reached to 166 in 2019.

There are 128 private and 38 government universities and higher education institutions where only 3 private institutions have decreased comparing to 2019. Teachers of government and private universities have reached to 18909 where 2599 are female and 16310 are male. The university teachers have been increased by 4.5 percent compared to 2018.

The total number of violence against women and girls in 2019 is 3,334 events, it shows a decrease of 12.4 percent compared to the previous year.
The number of crime in 2019 is 18،193 event, it shows a decrease of 13 percent compared to the previous year. In this year, the number of traffic accidents is 2،973 event, which is 2 percent less than the previous year. In 2019, 1،297.0 sq. km of land was contaminated by mines, out of which 53 sq. km has been cleared. That is an increase of about 4 percent over last year while many provinces have not been cleared of mines due to insecurity and lack of donors.

Data on public health indicates that in 2019 there were 2736 health centers. There were 2408 health centers throughout the country in 2018 which currently shows 13.4 percent increase.
These health centers include sub-centers, basic and comprehensive health centers. In spite of in increase in health centers these facilities are not sufficient as there are only 5 beds and 3 medical doctors available per 10000 people. Infectious diseases such as Malaria, Tuberculosis and AIDS existed in Afghanistan in 2019 where AIDs has increased in 2019. The number of people living with AIDS in 2019 are 2923 which has increased by 8.7 percent compared to previous year.
The aforementioned increase is alarming and should be taken in to consideration..

Gross Domestic Product (GDP) of the country was Afs 1,415,070.02 million with GDP per capita of Afs 45,795.15. The growth rate of real GDP was 5.71 percent in 2019.
The share of agriculture, industry and services in total GDP were 25.32, 12.60 and 57.21 percent respectively.

Consumer Price Index (CPI) indicates that inflation rate was 2.3 percent (3.8 percent in food items and 0.9 percent in non-food items) in Afghanistan in 2019. The inflation rate has increased compared to the last year which was 0.6 percent. Based on the consumer price, the highest inflation was in Ghor province by 7.7% followed by Ghazni province by 6.1% in 2019.

Agricultural data in 2019 indicates that wheat production is 5 million metric tons which indicates 35.3% percent increase as compared to the previous year. The reason for increase in wheat production was increase in the rainfall during 2019 particularly in wheat cultivated fields that solely depends on rain. The agricultural land under cereals cultivation has increased by 48% compared to previous year.

Electricity production and import figures in the country shows that electricity production and import has increased from 978.72 million KW in the year 2018 to 1285.50 KW in the year 2019.

Data on foreign trade indicates that in 2019 value of registered goods imports are 6776.8 million and that of exports are 863.8 million only. However, the values of imported goods are 7406.6 million and exports are 875.2 million in 2019. This indicates decrease in the imports by 629.8 million or 8.5 percent and exports decreased by 11.4 million or 1.3 percent compared to the previous year. It is worth mentioning that the total imports include 237.2 million of electricity imports.

Exports of services amounted to 643.7 million in 2019, it shows a decrease of 12.3 percent compared to 2018. Exports of goods and services totaled US$ 1507.5 million in 2019, to compare with 2018 it decreased by 6.3 percent.

Import of services amounted to US$ 1226.3 million in 2019, it decreased by 11.6 percent compared to 2018. Import of goods and services totaled US$ 8003.1 million in 2019, to compare with 2018, it decreased by 9 percent.

The air transportation data in 2018-19 indicate that the government airlines named Ariana has transported 636 tons of goods private airlines have transported 864,000 passengers.

During the 2019 fiscal year, 1610 km of roads were constructed, including 577 km roads were asphalted and 389 km constructed but not asphalted.

Hereby, all data Users, Planners, Policy formulators, Academicians and Researchers are humbly urged to share their constructive ideas and critics for better improvement of NSIA publications.

Section Two

Population

Population

The structure and size of the population are principle components of the development planning, which are to be considered while designing development plans and programs.

The total population of Afghanistan in the year 1398 (2019-20) was estimated around 32.2 millions of which 51.0 percent are males and 49.0 percent are females.

Distribution of population between urban and rural areas shows that out of the settled population 23 millions are living in rural areas and 7.7 millions in urban areas. In addition, 1.5 million are living as nomads.

The most striking feature of the Afghan population is its very young population structure. Whereas 47.7 percent (15.4 millions) are under the age of 15 years, 65 and above are around 2.7 percent. The proportion under 15 is among the highest in the world and significantly higher than that of the neighboring countries.

This young population contributes to a very high dependency ratio for every 101.4 persons in the working age group15-64, there are 100 persons in the less productive ages, under 15 and over 64.

Based on 2003-2005 household listing data, and population census 1979, the growth rate of Afghan population was calculated as 2.14 percent per annum. Population growth due to rural- urban migration is higher in urban areas.

Due to insecurity and lack of funding from the donors, most provinces have not been cleaned up.

Section Six

Health Facilities in the Country

Health Facilities in the Country

Collected data on health sector, indicates that there were 181 government and 460 private hospitals in the country in 2019, which shows an increase in the government and private hospitals by 5.2 percent and 26.4 percent respectively compared to the previous year.

There were 560 comprehensive health centers, 1019 basic health centers and 1166 sub health centers in 2019. The number of comprehensive health centers, basic health centers and sub-health centers increased by 28.4 percent, 0.7 percent and 21.5 percent respectively.

The number of government laboratories were 1346 and the number of private laboratories were 1523 in 2019, which shows an increases of 4.3 percent and 0.7 percent respectively, compared to previous year indicates that the number of government laboratories have increased more than private one. The number of private pharmacies were 11985 in 2019 which shows an increase of 0.1 percent compared to last year.

National Accounts

National Accounts System Rebasing

Afghanistan National Statistics and Information Authority (NSIA) is pleased to release the first result of National Accounts revision based on the United Nations System of National Accounts (SNA) 2008.

The result of Afghanistan's National Account System revision and its methodology have been evaluated by IMF, World Bank and Indian Central Statistics Office experts in a workshop held by the World Bank in New Delhi in December 2018. After taking into account their suggestions and comments, they approved and appreciated that Afghanistan's National Account System methodology revision has been consistent with the International System of National Account (SNA), so the results can be published for the users.

The SNA 2008 applies to all countries including developed, developing and transitional countries to market economies. It provides sound bases for integrated economic analysis which may be useful for the explanation of the linkages between the various sectors of the economy such as the enterprises (formal and informal), the government, and the foreign trade sector.

The concepts of the 2008 SNA have been harmonized with those of the Balance of Payments (BOP), Government Financial Statistics (GFS), Money and Banking Statistics. Therefore, the important concepts which were previously difficult in treatment are now relatively more coherent.
The present National Account statistics are in line with the System of National Account 2008 and all estimations and measurements have been made accordingly.

In the former system, NSIA was compiling GDP by the types of economic activity at current prices and constant prices with the base year (Solar Year) of 2002-03 and by expenditure categories at current prices. After the revision, NSIA compiles GDP by types of economic activity as well as by expenditure categories at the current prices and constant prices with the base year (Calendar Year) of 1395 (2016).

The base year is the starting point for National Account according to concepts, classifications, and methods that have remained unchanged since that year. The revision also includes, in most cases, changes to the base year. With this revision, the previous base year of 2002-03 (1381) was replaced with the fiscal year 1395 (The calendar year 2016). The base year (Base and reference year) has been changed from the Solar Year (End of Solar year 20 March) to the fiscal year (End of fiscal year 21 December) which is consistent with the International Calendar Year (CY).

General Changes in the Revision of SNA in Brief

For comparability of the Afghanistan System of National Accounts with the other countries, updates would be necessary following the practical experiences of other countries in terms of methods, concepts, and terms of the national accounts. Therefore, updating the system is not possible in the short term but a period of 5 or 10 years.

Documenting changes in the methodology during a revision exercise is of vital importance. It helps national accountants adhere to the revised methodology and users to better understand the economy.

As internationally common, the Afghanistan National Account revision involves the following major changes:

- The annual reference period has changed from Solar Year to Fiscal Year (1381 to 1395/ 2002-03 t0 2016)
- New data sources have been used
- Revised prices
- Introduction of new terms and concepts of SNA 2008
- Changing the international standard classification of activities to the ISIC4
- Developing the Supply and Use Table (SUT).

Afghanistan National Statistics and Information Authority (NSIA) gratefully acknowledge the valuable technical support of the World Bank who made the revision of the system possible.
The data users are requested to refer to the national accounts report which will be released soon.

National Accounts

Gross Domestic Product (GDP) data provides an overview of the country's economy and examines the composition of economic activities and the interaction between different economic entities.

GDP

Nominal GDP, which measures the monetary value of all final goods and services during the fiscal year in current prices, of Afghanistan was Afs 1415.02 billion (US$ 18.2 billion) with GDP per capita of Afs 45795.15 (US$ 588.63) in 2019.
Real GDP, which measures the monetary value of all final goods and services during the fiscal year in constant prices, of Afghanistan was Afs 1349.10 billion (US$ 20.02 billion) with GDP per capita of Afs 43670.07 (US$ 647.92) in 2019.
The growth rate of real GDP was 5.71 percent in 2019.

Sectoral Performance
Agriculture

The agriculture value added was Afs 358.08 billion in 2019. Its share in total GDP was 25.32 percent. The agriculture sector growth rate was 21.61 percent and the main driving growth factor was an increase in wheat production in 2019.

Industry

Based on International Standard Industrial Classification (ISIC), industry is comprised of mining and quarrying, manufacturing, electricity, gas, water and construction.
The value added for this sector was Afs 178.63 billion in 2019. Its share in total GDP was 12.60 percent. The industry sector growth rate was 0.82 percent and the main driving growth factor was an increase in maining and quarring by 1.19 percent and electricity, gas, water by 1.22 percent in 2019.

Mines and Quarry

Afghanistan was endowed with a wealth of natural resources, including extensive deposits of natural gas, petroleum, coal, marble, gold, copper, chromite, talc, barites, sulfur, lead, iron, salt, precious and semi-precious stones, construction stone and many rare earth elements. The value added for this sector was Afs 27.53 billion in 2019.
Despite existence of numerous mines in Afghanistan, so far most of then have not been extracted. Regarding mining of copper, iron, gold and other minerals some effort has been made but so far the extraction has not been started.

Electricity, Water and Gas

The value added for electricity, water and gas was Afs 29.04 billion. The growth rate was 1.22 percent in 2019.

Construction

The value added for constructions was Afs 46.93 billion which shows an increase of 0.51 percent in 2019.

Services

The value added for services was Afs 809.14 billion which shows an increase of 0.46 percent in 2019.
The services sector share of total GDP was 57.21 percent in 2019.
The main growth factor was an increase in general government service by 3.40 percent in 2019.

GDP by Expenditure Categories

The total consumption expenditures are Afs 1685.20 billion of which government consumption was Afs 338.69 billion and that of private and NPISH were Afs 1309.84 and 36.68 billions respectively. Expenditures on gross fixed investment amount to Afs 194.23 billion while exports and imports of goods and services amount to Afs 174.45 and 639.50 billions respectively in 2019.

Section Eight

Agriculture

Agriculture

Agriculture has an important role in the Afghanistan economy where 12% of its area is arable area which includes irrigated area, rain-fed land, and temporary fallow land. At the same time, 3% of its area is covered by the forest, 46% covered by permanent pasture and 39% covered by villages, mountains and rivers. Plants are cultivated in rain-fed and irrigated forms. Rain-fed Wheat has an important role for cereal production. Wheat is the major crop for the production of cereal. Wheat constitute 89% of consumption. Fruits including watermelon and melon, apricot, pomegranate and grape produced for consumption and export, also dried fruit and nuts especially apricot and almond plays a significant role in exports.

Major Crops
Grain

Wheat is a major crop. Cultivated every year on irrigated and rain fed land. Wheat production in 2019 was 4.89 million tons, rice production was 0.38 million tons, barley production was 0.12 Million tons and maize production was 0.18 million ton.
Also, the total land under grain cultivation was 2.9 million hectares.

Vegetable

Vegetables are mostly grown for market and home consumption. An estimated 5.12 percent of the total irrigated land was planted with vegetables, the total area under potato cultivation was 57 thousand hectares while its production was 921 thousand tons. And potato yield was 16 tons per hectare. Potato and onion are major vegetables they are particularly used as staple food in the country. The area under onion cultivation in 2019 was 18343 hectares.

Fruits

Different verities of fruit trees are apple, pomegranates, apricots, mulberries, grapes and almonds. In 2019 almost 2.84% of the arable land (222 thousand hectares) was under fruit cultivation. Grapes production was 1112.9 thousand tons. Almost all farming households in the rural area have some fruit trees for self-consumption. In addition, orchards are also a major source of income for farmers in many areas of the country and the majority of large to medium sized orchards are exclusively for markets.

Section Nine

Industries

Industries

Manufacturing industries play a significant role in the Country's economic growth. They mainly produce products such as food, non-alcoholic beverages, clothing, paper, and printed products, plastic products, chemical products, and etc…
In the year 2019, the total value of industries reached 11.72 billion AFN, including 2.26 billion AFN government sector and 9.46 billion AFN private sector.

Mines

Afghanistan is rich in mineral resources and offers potential for considerable future development. Coal, natural gas, salt, marble and liquid ammonia has been commercially exploited in the past. There are deposits of iron barites, talc and significant reserves of copper and also there are some oil reserves. Total value of mines producation in 2019 decreased by 6.9 % compared to 2018.

Electricity

Electricity in the country is being produced through hydro, diesel, and thermal power stations. Electricity production in 2019 compared to 2018 increased by 31.3 percent.

Gas

Natural gas has been produced in 128.7 million cubic meter in 2019 compared to 2018 decreased by 15.99 percent.

Section Ten

Communication & Transport

Land Transport

Afghanistan transportation system includes both land and air transportation The total number of registered vehicles were 1980033 in 2019.It contains 120,36,00 passenger cars, 327446 trucks, 110190 buses and 338,797other types of vehicles.

Air Transport

Afghanistan has four international airports and a few local airports, whereas only three of them are asphalted. The number of flights has been increasing substantially after the end of war in late 2001. Ariana Afghan Airline has four functioning airplanes. These airplanes carried 311 thousand passengers and 636 tons of goods via different routes. In private sector, one airline company Kam Air is active, with 12 airplanes, and it carried 864 thousand passengers via different routes.

Communication

Communication has Rapidly developed after the end of the war. During last fourteen years the number of fixed line telephone subscribers has increased substantially. In 2019 the number of fixed line telephone were 529,603.

Section Eleven

Inflation and Consumer Price Index

Inflation and Consumer Price Index

The main purpose of compiling the consumer price is measuring change in consumer price level and consumer price inflation for the data users. The CPI and its monthly movements are used as key targets for monetary and fiscal policy, as well as adjusting for inflation in business contracts, employees' salaries and retirees' pensions and other social issues.

A Brief Explanation on the CPI Methodology

The National CPI follows international recommendations with regard to the concepts, classifications and formula. It is a weighted aggregate of the CPIs for Kabul, Herat, Kandahar, Jalalabad, Mazar-e-Sharif, Khost, Helmand, Bamyan, Kunduz, Badakhshan, Takhar, Paktya, Parwan, Ghazni, Ghor, Kapisa, Sare Pul, Jowizjan, Baghlan and Faryab. The basket includes 290 important goods and services, typically consumed by urban middle and low-income households. For each item, prices are collected from three shops located in the central markets or main shopping streets of each city. A total of about 20010 price quotations are obtained each month. The Laspeyres formula is used to calculate the CPIs.

National CPI 2019

The inflation rate measured by the overall consumer price index (CPI) for the country was 2.3% in 2019, whereas it was 0.6 % in 2018.

Food Prices Index

The national overall prices for food had increased by 3.8% in 2019, as compared to 1.1% decrease in 2018.
The highest increase was in Ghazni province by 8.3% and followed by Takhar province by 7.4%.
The main contributory factors to the increase in the national CPI were cereals by 5.8%, meat by 5.4%, fresh and dry fruits by 5.3%, sugar and sweets by 5.6% and spices by 16.2%.

Non-Food Rices Index

The national non-food prices increased by 0.9% in 2019 which was increased by 2.3% in 2018. The main contributory factors to the increase were clothing by 5.6%, household goods by 2.8% and health by 4.5%.
In 2019 the highest increase of prices was in Ghor province by 13.2% followed by Parwan province (7.5%).

Section Twelve

Export & Import

Foreign Trade

Exports, Free on Board (FOB)

The officially recorded exports of goods were around US$ 863.8 million in 2019, which does not include smuggling and re-export. The registered exports in the 2019 compared to the 2018 decreased by 1.3 percent (from US$ 875.2 million to US$ 863.8 million).
It is worth mentioning that in 2019, dry and fresh fruits constitute 44.8 percent of exports. In 2019, exports of carpets compared to 2018 increased by 11.1 percent.
Also, it is worth mentioning that during 2019, the value of re-export is US$ 6.7 million from all borders of Afghanistan.

Exports of Service

Exports of services amounted to 643.7 million in 2019, it shows Decrease of 12.3 percent compared to 2018.
Exports of goods and services totaled US$ 1507.5 million in 2019, to compare with 2018 it decreased by 6.3 percent.

Imports, Including Cost Insurance Freight (CIF)

The officially recorded import of goods in 2019 was US$ 6776.8 million excluding smuggled and duty-free goods.
The registered imports in 2019 compared to the 2018 decreased by 8.5 percent (from US$ 7406.6 million to US$ 6776.8 million).

Imports of Services

Import of services amounted to US$ 1226.3 million in 2019, it decreased by 11.6 percent compared to 2018.
Import of goods and services totaled US$ 8003.1 million 2019, to compare with 2018, it decreased by 9 percent.

Duty Free Imports

The total duty free imports during the 2019 were US$ 1791.2 million as compared to US$ 1644.2 million in 2018, which shows an increase of 8.9 percent.

Concepts and terminologies used in the Statistical Yearbooks

Concepts and Terminologies used in the Statistical Yearbooks

These technical notes discuss the data, sources, and methods used to compile the indicators in this publication. The notes are organized by table and within each table, by indicator in order of appearance.

Demographic and Social Statistics

Life Expectancy at Birth

Life expectancy at birth is the number of years a new born baby would live if prevailing patterns of mortality at the time of his/her birth were to stay the same throughout his/her life.

Population

Population refers to a group of people who live in a geographic area such as a continent, a country, a city, a village etc. at s specific point of time.

Population Density

Population density is an important indicator which shows the relation between the size of population and the area the population is living.

Population Growth

Population growth is the change (increase/decrease) in the size of population during a specified time interval which is usually presented as percentage.

Total Fertility Rate

Total Fertility rate is the average number of children that would be born alive to women during her reproductive age, the rate is usually shown Female lives in reproduction age.

Crude Birth Rate

Crude birth rate is the annual number of live, births divided by the mid-year population of that year, here 2019, shown per 10,000 population.

Crude Death Rate

Crude death rate is the annual number of deaths divided by the mid-year population of that year, here 2019, shown per 10,000 population.

Access to Safe Water

Shows the percentage of the population with reasonable access to adequate amounts of safe water (including treated water or untreated but uncontaminated water from sources such as springs, sanitary wells, and protected boreholes). In an urban area such a source may be a public water tank or stand post located not more than 200 meters away. In rural areas access implies that members of the household do not have to spend a disproportionate part of the day fetching water.

Access to Sanitation

Refers to the percentage of the population with at least adequate disposal facilities that can effectively prevent human, animal, and insect contact with excreta.

Child Immunization

Measures the rate of vaccination coverage of children under one year of age for four diseases—measles and DPT (diphtheria, peruses or whooping cough, and tetanus).

National Accounts

The SNA provides a framework for presenting a coherent, consistent and integrated set of macroeconomic accounts, balance sheets and tables. The SNA is founded on the concepts and principles of macro-economic theory and the framework is based on a set of internationally agreed concepts, definitions, classifications and accounting rules. It also provides the formework for recording the interactions between different economic agents and groups of agents like households, business companies, government and non-profit institutions who are involved in economic activities. The estimates of macro-economic aggregates compiled in the framework of SNA are called National Accounts Statistics (NAS).

International Standard Industrial Classification

The International Standard Industrial Classification of Economic Activities (ISIC) is the international reference classification of productive activities. Its main purpose is to provide a set of economic activity categories that can be utilized for the collection and reporting of statistics according to such activities.

Gross Domestic Product (GDP)

Gross Domestic Product is the monetary value of all final goods and services produced in economic territory at a country during an accounting period. Or, GDP is the sum of Gross value added of all residents producer units within the economic borders of country during a given period of time.

Gross Value Added

Gross value added is the sum of output minus intermediate consumption of a production process.

Intermediate Consumption

Intermediate consumption is the value of goods and services consumed as inputs in the production process.

GDP Per Capita

GDP per capita is the Gross Domestic Product divide by the total current year population.

Current Price

Current Price is the monetary value of goods and services at a certain accounting period at the time when the transaction takes place

Constant Price

Constant Price is the monetary value of goods and services that takes place at a certain accounting period, at a base year period.

Base Period

The period that provides weights for indexes is described as the base period and other periods or years compared by it.

GDP Price Deflator

GDP price deflator is calculated by dividing annual GDP at current price by the corresponding GDP at constant price.

Key Sectors in GDP

1- Agriculture

Corresponding to ISIC, agriculture includes cereals, fruits, livestock, forestry and fishing.

2- Industry

This sector includes mining, manufacturing, energy (electricity, gas and water) and construction.

3- Services

This sector includes all other branches of economic activity, i.e. transportation and communication, wholesale and retail trade, hotels and restaurants, banking, insurance, real estate, ownership of dwellings, public administration and defence, NGOs, professional, and personal services including domestic services, education, health care, garage, repair, and other services.

GDP Compilation Approaches

GDP can be compiled by three approaches, namely production, income and expenditure.

1-Production Approach

Production approach is the total output minus cost of input good or intermediate consumption (IC) that is used in the production process.

2-Income Approach

The second approach to estimating the value added of different kinds of economic activity consists of summing estimates of its components, that is:

- The compensation of employees or wages and salaries and other benefits (WS),
- The operating surplus, or mixed income (OS),
- The net indirect taxes (NT).

In the case of producers of government services and NGOs, the operating surplus is not applicable.

3-Expenditure Approach

Expenditure approach involves making independent estimates of the final consumption of the private sector, government, change in stocks, gross fixed capital formation, and imports and exports of goods and services.

Total Final Consumption Expenditure

Total final consumption expenditures is the sum of private and government consumption.

Government Consumption

Government consumption includes all current expenditure for purchases of goods and services by all levels of government.

Private Consumption

Private consumption is the value of all goods and services purchased or received as income in kind by households and non-profit institutions.

Capital formation

Capital formation is that part of current output of the economic activities and imported goods which is not consumed or exported during the accounting period but set aside as addition to Fixed Assets and stock of capital goods.

Fixed Capital Assets

Fixed capital assets are:

- Durable goods that last more than one year.
- For the purpose of production or generating income
- Cost more than US$300
- New construction and major improvements which extend its life period.
- Reclamation and improvement of land and the development and extension of timber tracts, orchards, Plantations and similar other agricultural holdings.

Factor Services
Factor services comprise income of labor and capital, thus covering income paid to non- resident workers and investment income (receipts and payments on direct investment, portfolio investment, and other investment, and receipts on reserve assets).

Non-Factor Services
Comprise services on account of freight and insurance, passenger services other transportation travel and other goods and services. These include transactions with non-residents by government agencies and their personnel abroad, as well as transactions by private residents with foreign governments and government personnel stationed in Afghanistan.

Gross Domestic Savings
Gross domestic savings are calculated as the difference between GDP and total final consumption expenditure.

Consumer Price Index
The CPI describes the movements of the general price level of goods and services purchased by households.

Exchange Rate
Exchange rate is the prices of per foreign currencies unit versus local currency by the free market vendors.

Total Domestic Revenue
Total domestic revenue is the sum of tax and non-tax revenue.

Tax Revenue
Tax revenue is the sum of direct and indirect taxes.

Direct Taxes
Direct Taxes are the taxes that are levied on the income of individuals or organizations.

Indirect Taxes
Indirect taxes are those paid by consumers when they buy goods and services.

Import Duties
Import duties consist of customs duties, or other import charge, which are payable on goods of a particular type when they enter the economic territory.

Wage and Salaries
Wage and salaries consists of all payment in cash, but not in kind, to employees in return of services rendered, before deduction of withholding taxes and employees' contributions to social security and pension funds.

Agriculture
Work and activities of agriculture and agricultural exploitation of the land, livestock, and forests as well as fishing.

Agricultural Area
Agricultural area is typically land devoted to agriculture, the systematic and controlled use of other forms of life particularly the rearing of livestock and production of crops to produce food for humans.

Irrigated Land
To supply (land or crops) with water by means of pipes, sprinklers, ditches, or streams.

Cultivated Rain Fed Area
The land that is necessary for their water supply through the rain.

Arable Land
Is applied to lands that are practically under cultivation of plants, that is one year or several years old.

Permanent Pasture
Natural or seeded grassland that remains unplowed for many years.

Gardens
A garden is a planned space, usually outdoors, set aside for the display, cultivation, or enjoyment of plants and other forms of nature, that includes fruitful trees and non fruitful, ornamental plants and vineyards.

Forests
A forest is a large area dominated by trees.

Other Land
In other words it is the land of the direct use in agriculture has been no and in other cases the Use lands are like rivers, mountains, roads and the industrial centers, oasis and etc.

Total Energy Use
The use of the Renewable Energy generator like electricity, oil and gas, fuel ,wood and traditional fuels .

Industry
Economic activity concerned with the processing of raw materials and manufacture of goods in factories.

Foreign Trade
Foreign trade refer to transfer of goods and services(imports and exports) between world countries.

Exports
The flow of goods and services from outside the country to another country here, exports means the flow of goods and/or services out of a country's custom territory.

Imports
The flow of goods and services inside the country from another country, here import means the flow of goods and/or services inside a country's custom territory.

Trade Balance
Is the difference between exports f.o.b. and imports c.i.f

Foreign Aid
Foreign aid includes grants and long-term maturing loans provided by foreign governments for civilian areas.

Aid
Aid includes grants payable at the time of occurrence of emergencies like natural disasters such as earthquake, flood, and etc at which the grant receiver is not obliged to repayment.

Loan

Debt payments that loans recipient is required to pay back to the creditor.

Bilateral Aid

bilateral is one whose executive responsibility is on national institutions and is performed on the basis of agreements between tow countries.

Multilateral Aid

Multilateral aid is one whose executive responsibility is on international institutions. The difference between bilateral and multilateral aid is that bilateral aid is exchanged and/ or transferred between two government, but the multilateral aid is exchanged and/ or transferred through international institutions among governments.

The Usage and Explanation of Signs and Symbols in Statistical Publications

NO.	Sign/ Symbol	Explanation
1	,	Decimal in Dari and Pashto Languages
2	.	Decimal in English Language
3	0	The value is zero.
4	0،0	The data is negligible.
5	...	The data was not available till publishing
6	–	The data is not collected.
7	*	The data is estimated.
8	XX	Not Applicable
9	**	The data is not final.
10	⃠	The data is not presented due to confidentiality.
