FOREWORD

The 2015 Philippine Standard Commodity Classification (PSCC) is the latest revision of the country's commodity classification. It is a detailed classification of all commodities on imports and exports being used for tariff and statistical purposes. The 2015 PSCC is an integration of the 2012 ASEAN Harmonized Tariff Nomenclature (AHTN) based on the 2012 Harmonized Commodity Description and Coding System (HS) issued by the World Customs Organizations (WCO) and the Standard International Trade Commodity (SITC) Rev. 4, by the United Nations Statistics Division (UNSD).

The 2015 PSCC serves as a standard statistical nomenclature for economic analysis as well as for planning and policy formulation; as a standard scheme on commodity groupings or classes necessary for maintaining continuity of existing series on and for international comparability of the country's trade statistics; and as an aid in the implementation of tariff and trade regulations.

As a member state of the Association of South East Asian Nations (ASEAN), the Philippines is bound by Article 4 of the ASEAN Agreement on Customs dated 01 March 1997 and the AHTN Protocol signed by member states on the 07 August 2003 to implement the AHTN for all trade transactions for tariff, the collection of statistical data and other purposes. However, the Protocol also states that member states may further sub-divide the AHTN, beyond the 8th digit for the collection of statistical data or other non-tariff purposes. Thus, the 2015 PSCC adhered to the 6-digit level of the HS, and to the 7th and 8th digit codes of the AHTN subheadings. The 9th and 10th digit codes cover commodities of national interest for statistical purposes.

The 2015 PSCC was prepared by the Philippine Statistics Authority (PSA) technical staff and reviewed by the Technical Committee on Statistical Standards and Classifications (TC-SSC) through its Technical Working Group on Standard Commodity Classification (TWG-SCC). We would like to take this opportunity to acknowledge the valuable contribution of the members of the TC-SSC and the TWG-SCC for the development and review of the 2015 PSCC.

The 2015 PSCC was approved by the PSA Board under Resolution No.15, Series of 2015: "Approving and Adopting the 2015 Philippine Standard Commodity Classification". It is envisioned that the adoption and use of the PSCC by concerned agencies will greatly enhance the coordination and integration of efforts towards the improvement of trade statistics in the Philippine Statistical System (PSS). All government offices, agencies and instrumentalities are therefore enjoined to adopt and use the PSCC starting January, 2016.

TECHNICAL NOTES

I. Background

Pursuant to Republic Act 10625, also known as the *2013 Philippine Statistics Act*, the Philippine Statistics Authority (PSA) is mandated to prescribe and maintain uniform statistical standards and classification systems to harmonize and ensure comparability of government statistics based on international standards/ guidelines, such as the United Nations international standard classification systems.

One of the national standard classification systems being maintained by the PSA is the *Philippine Standard Commodity Classification (PSCC).* The PSCC is a detailed classification of all commodities on imports and exports being used for tariff and statistical purposes. The existing PSCC is an integration of the ASEAN Harmonized Tariff Nomenclature (AHTN) based on the Harmonized Commodity Description and Coding System (HS) issued by the World Customs Organizations (WCO) and the Standard International Trade Classification (SITC) developed by the United Nations Statistics Division (UNSD).

All member states of the Association of Southeast Asian Nations (ASEAN) including the Philippines are bound to comply with Article 4 of the ASEAN Agreement on Customs dated 01 March 1997 governing tariff regulations within the region. ASEAN member states (AMS) further agreed to use a common tariff nomenclature to enhance the flow of goods in the ASEAN region. Thus, the AHTN was formulated and a protocol governing the implementation of the AHTN was approved by AMS on August 7, 2003. The AHTN is an 8-digit nomenclature, consisting of the 6-digit HS Code with the addition of the seventh and eighth digits (referred as the ASEAN subheadings) and commodity descriptions. The Protocol also states that member states may further sub-divide the AHTN, going beyond the 8th digit for the collection of statistical data or other non-tariff purposes.

So far, the Philippines has prepared the following commodity classifications patterned after the corresponding international standard commodity classifications:

Philippine Standard Commodity Classification	**International Standard Commodity Classification**
1960 PSCC	1950 SITC
1977 PSCC 1979 PSCC Amendment No.1 1980 PSCC Amendment No. 2	1960 SITC Revision (Rev.) 1 1975 SITC Rev. 2
1993 PSCC Rev. 2 1997 PSCC 1999 PSCC	1985 SITC Rev. 3
2004 PSCC	2002 HS, 2004 AHTN, SITC Rev. 3

II. 2015 Philippine Standard Commodity Classification

The 2015 Philippine Standard Commodity Classification (PSCC) is the latest version of the PSCC which is aligned with the 2012 AHTN, which in turn is patterned after the 2012 HS issued by the WCO as well as with the SITC Rev. 4 developed by the UNSD.

The first draft of the 2015 PSCC was initially prepared by the PSA through the Statistical Classification Division (SCD) of the Standards Service (SS) under the Censuses and Technical Coordination Office (CTCO). A series of consultation meetings to review the draft was then conducted by the Small Working Group (SWG) composed of commodity specialists from the Tariff Commission (TC), Bureau of Customs (BOC) and from the SCD-SS, CTCO as well as Trade Statistics Division (TSD) of the PSA.

Separate commodity codes were provided to significant commodities as requested by the Seaweed Industry Association of the Philippines, the Philippine Coconut Authority (PCA), and the Export Marketing Bureau (EMB) of the Department of Trade and Industry (DTI) to facilitate the monitoring of the trade performances of the requested commodities. Some new export products reported by PSA were also incorporated in the 2015 PSCC.

The revised draft was then reviewed by the Technical Working Group on Standard Commodity Classification (TWGSCC) chaired by the Tariff Commission (TC) and composed of the following members: EMB of the DTI, BOC, Bangko Sentral ng Pilipinas (BSP), Board of Investments (BOI), National Economic and Development Authority (NEDA), the Department of Science and Technology (DOST) and the PSA. The TWGSCC then submitted the revised draft to the PSA Technical Committee on Statistical Standards and Classifications (TCSSC) for endorsement to the PSA Board. The TCSSC recommended that a public consultation forum be conducted first to identify other new or emerging commodities that need to be highlighted in the 2015 PSCC.

Consequently, a Public Consultation Forum on the Proposed 2015 PSCC was held on 8 October 2015 at the Luxent Hotel, Quezon City to raise awareness and elicit feedback from data users and other stakeholders on the proposed 2015 PSCC. Representatives of key government agencies, trade and economic agencies, and the private sector, specifically industry associations and local business companies attended the forum.

The PSA Executive Board approved the 2015 PSCC through PSA Board Resolution No. 15, Series of 2015 for adoption by all concerned government agencies and instrumentalities.

1. Purpose of the 2015 PSCC

The 2015 PSCC fills the urgent need for an updated standard commodity classification system that integrates the previous standard commodity classifications used in the country and is reflective of recent international and domestic developments on commerce and trade, brought about by the globalization of economies and rapid technological changes. Most important of

all, it closes the gap between the 2004 PSCC and 2007 HS/AHTN as well as the gap between the 2004 PSCC and the 2012 HS/ AHTN through its correspondence matrices.

As a detailed classification of all commodities on imports and exports that enter the Philippine commerce and trade, the PSCC serves as a standard statistical nomenclature for economic analysis, investment purposes as well as for planning and policy formulation.

The PSCC also serves as a standard scheme on commodity groupings or classes necessary for maintaining continuity of existing series on trade statistics and for international comparability of the country's trade statistics; and as an aid in the implementation of tariff and trade regulations.

2. General Principles and Basic Considerations in the Preparation of Standard Commodity Classifications

2.1 In the preparation of international as well as national standard commodity classifications, commodities were grouped into sections and headings as far as practicable according to the following generally accepted principles:

a. Nature of merchandise and the materials used in its production
b. Processing stage, whether crude, semi-manufactured or fully manufactured
c. Market practices and the uses of the products
d. Importance of the commodity in terms of world trade
e. Technological changes

2.2 On the other hand, the following criteria were used in selecting commodities that need to be provided with separate 10-digit PSCC Codes:

a. Trade value of the commodity
b. Potential of the commodity to be a major export and import product
c. Intended policy use of the detailed commodity data, e.g. monitoring and preservation of endangered species
d. Regulated or prohibited commodities per existing laws, trade agreements and directives shall be provided separate code for monitoring purposes

2.3 Other considerations in the preparation of the 2015 PSCC include the following:

a. The first six digits of the 2015 PSCC should correspond to the 2012 HS while the first eight digits should correspond to the 2012 AHTN and the AHTN tariff headings shall be maintained as is.
b. A statistical suffix, which is limited to two digits, shall be added to the eight-digit AHTN code to come up with the 10-digit PSCC Code in order to accommodate the commodities included in the PSCC but are not included in the AHTN.
c. Alphanumeric codes shall also be used to reflect the in-quota and out-quota classification for selected commodities.

First level (Chapter) – Chapters are represented by first two digits

Second level (Heading) – Headings are represented by the first four digits

Third level (HS Subheading) – HS subheadings are represented by the first six digits

Fourth level (AHTN subheading) – AHTN subheadings are represented by the first eight digits

Fifth level (PSCC) – The ninth and tenth digit codes added to the eight-digit AHTN codes refer to the PSCC commodities that are not in one-to-one correspondence with the AHTN

For example: **Section II – Vegetable products**
