Afghanistan Statistical Yearbook

2017–18

Issue No. 39

August 2018

Executive Summary

It is a matter of great pleasure for National Statistics and Information Authority as the only official statistical body in the country to have been able to publish the statistical yearbook 2017-18 according to its publication calendar by timely data collection. This statistical yearbook depicts the socio-economic condition of the country and also provides an easy access to a rich source of statistical information and data which helps the ministries, government organizations, NGOs and the private sector as well as international community to formulate policies, programs and make evidence based decisions.

The data and statistical information in the statistical yearbook have been collected from ministries, government organizations and private sector providing data on economic and social sectors like population, agriculture, education, health, national accounts, consumer price index, energy, construction, mines and energy, services, foreign trade, finance statistics and foreign aids which can be used by the planners and data users for better and evidence based planning.

The country›s population is estimated to be 29.7 million including 1.5 million Kochi population for 2017-18 based on the socio-demographic statistics department of NSIA. Men and women make up 15.2 million and 14.5 million of the total population respectively. Based on the estimated population figures the urban population is 7.1 million while the rural population is 21.1 million. The rural and urban population is estimated without considering Kuchi population. The age-dependent population is 14.9 million while 14.1 million population of the country is under 15 years of age. The returning refugees from Pakistan, Iran and other countries were 10.809 families comprising 59,623 individuals in the year 2017-18.

The data on educational attainment of civil service employees working in government shows that in total 312,879 employees there are 268 PhD, 5889 MA/MSc, 102 BA/BSc honours, 72,486 BA/BSc and 234,134 employees have lower level of education than BA/BSc.

The Ministry of Education›s data shows that 9,610,993 students were enrolled in the primary, secondary, high schools, vocational high schools, technical vocational institutes, teacher training institutions, religious education and afghan students abroad in 2017. There were 9,187,304 students enrolled in government educational institutions and 423,689 students in private educational institutions that shows 2 percent increased comparing to previous year. The total number of teachers were 220,117 in 2017 out of which 195,229 were in government and 24,188 were in private sector.

The higher education data indicates that in 2017-18, total number of students of the government higher education institutions together with that of the private sector educational institutions were 369,317 which shows 8.0 percent increase compared to the data of last year. There were 277,491 males and 91,826 females. The number of government and private universities and higher education institutions reached to 160 in 2017-18. There are 122 private and 38 government universities and higher education institutions where only 1 private institution has increased comparing to 2016-17. Teachers of government and private universities have reached to 17,515 where 2,377 are female and 15,138 are male. The university teachers have been increased by 18.5 percent compared to 2016-17.

Data on public health indicates that in 2017-18 there are 2,424 health centers. There were 2,173 health centers throughout the country in 2016-17 which currently shows 11.6 percent increase. These health centers include sub-centers, basic and comprehensive health centers. In spite of increase in health centers these facilities are not sufficient as there are only 5 beds and 3 medical doctors available per 10,000 people. Infectious diseases such as Malaria, Tuberculosis and AIDS exited in Afghanistan in 2017-18 where AIDs has increased in 2017-18. There were 2,549 persons affected by AIDS in 2017-18 which indicates an increase of 23.7 percent compared to previous year. This increase is alarming and must be considered as a serious issue.

GDP including opium is 1463633 million Afghanis ($21.4 billion) in 2017-18 where GDP per capita is 49281 Afghanis ($719). GDP excluding opium is 1384905 million Afghanis ($20.2 billion) where GDP per capita become 46630 Afghanis ($681). The main factor of decrease in GDP in US dollar is the US dollar›s exchange rate against Afghani from 67.4 in 2016-17 to 68.5 Afghanis in 2017-18. The growth rate of real GDP including opium is -7.2 percent. The main factor for the rise is increase in opium production by 87.5 percent whereas GDP growth excluding opium increased by 2.9 percent in 2017-18.

CPI indicates that the level of inflation in Afghanistan the inflation rate was 4.4 percent in 2017-18 and shows a relative decrease compared to last year which was 4.9 percent. Based on the consumer price the highest inflation was in Balkh province by 7.3 percent and followed Kandahar province by 7.0 percent. The data of food items show increase of 6.0 percent and non-food items increased by 2.9 percent.

Agricultural data in the 2017-18 indicates that wheat production is 4.3 million metric tons which indicates 6 percent decrease as compared to the previous year. The reason for decrease in wheat production was decrease in the rainfall during 2017-18 particularly in wheat cultivated fields that solely depends on rain. The agricultural land under wheat, rice and other cereals cultivation is decreased by 433,736 hectares compared to previous year.

The value of industrial products of the government of Afghanistan and private sector in 2017-18 was 73271.1 million Afghanis which increased by 1127.9 million Afghanis or 18.2 percent compared to previous year.
Data related to production and imports of electricity shows that electricity production has been increased to 1098.1 million kilowatt/hour in 2017-18 from 1076.3 kilowatt/hour in 2016-17.

Data on foreign trade indicates that in 2017-18 value of registered imports are $7,793 million and that of exports are $832 million only. However, the values of imported goods are $6,534 million and exports are $596 million in 2016-17. This indicates increase in the imports by $1,258 million or 19.3 percent and increase in exports by $235 million or 39.5 percent compared to the previous year. It is worth mentioning that the total imports include $284.2 million of electricity imports.

As concerned about communication, there is a positive development. Meanwhile, the data obtained reveal that 31.8 million SIM cards were sold by various mobile phone companies in the country during 2017-18.
The air transportation data in 2017-18 indicate that the government airlines named Ariana has transported 1,625 tons of goods whereas the private airlines have transported more passengers compared to Ariana Afghan Airline.

In relation to construction and road, the data of 2017-18 indicate that both the government and private sector observed 10 percent increase in construction and 12.5 percent incrase in road construction compared to the previous year.

The total financial assistance committed by donors to the government of the Islamic Republic of Afghanistan was $3465.22 million in 2017-18 whereas the total amount actually disbursed was $2685.86 million.

Population

The structure and size of the population are principle components in the development planning, which are to be considered while designing development plans and programs.

The total population of Afghanistan in the year 1396 (2017-18) was estimated around 29.7 millions of which 51 percent are males and 49 percent females.

Distribution of population between urban, rural areas shows that out of the settled population 21.1 millions are living in rural areas and 7.1 millions in urban areas. In addition 1.5 million are living as nomads.

The most striking feature of the Afghan population is its very young age structure. 47.5 percent (14.1 millions) are under the age of 15 years, where elderly of 65 and over are around 2.6 percent. The proportion under 15 is among the highest in the world and significantly higher than that of the neighboring countries.

This young population contributes to a very high dependency ratio for every 100 persons in the working age 15-64, there are 99 persons in the less productive ages, under 15 and over 64.

Based on 2003/05 household listing data, and population census 1979 the growth rate of Afghan population was calculated as 2.03 percent per annum. Population growth due to rural-urban migration is higher in urban areas.

National Accounts

Gross Domestic Product (GDP (data provide an overview of the country's economy and examines the composition of economic activities and of the interaction between different economic entities.

GDP – Nominal and Real

In order to show economic condition in the country, in 2015-16 GDP for Afghanistan is compiled in two categories; GDP include poppy and GDP exclude poppy.
GDP including poppy was Afs 1463633 Million (US$ 21.4 billion) with GDP per capita of Afs 49281 equal to US$ 719.
GDP excluding poppy was Afs 1384905 Million (US$ 20.2 billion) with GDP per capita of Afs 46630 equal to US$ 681.

The growth rate of real GDP including poppy was 7.2%, while the excluding poppy GDP growth was 2.9%.

Sectoral performance

Agriculture

The agriculture value added is estimated, including poppy was Afs 346269 million while without poppy totaled Afs 281518 million or about 23.7 and 20.3 percent of GDP in 2017-18 respectively. How ever the Agriculture sector has increased compared to last year by 21.4 and 3.8 percent in 2017-18

Industry

Based on International Standard Industrial Classification (ISIC) Industry comprised mining and quarry Manufacturing, Electricity, gas, water and Construction.
The value added for this sector was Afs 307529 million in 2017-18, and shows the growth of 0.9 percent over last year. The main share in the growth of this sector were in Mines and quarry which 13.6 percent, production of food and beverage by 2.1 percent, and electricity by 2.0 percent.

Mines and quarry

Afghanistan is endowed with a wealth of natural resources, including extensive deposits of natural gas, petroleum, coal, marble, gold, copper, chromite, talc, barites, sulfur, lead, iron, salt, precious and semi-precious stones, construction stone and many rare earth elements.
The value added for this sector was Afs 13441 million in 2017-18.
Despite having numerous mines in Afghanistan so far most of it has not been extracted. Regarding mining of copper, iron, gold and other mineral some effort has been made but so far extraction has not been started.

Electricity, water and gas

In 2017-18 the value added of electricity was Afs 1246 million, has growth by 2.0 percent compared to last year,

Construction

In 2017-18the value added for constructions was Afs 139834 million and increased was 0.4 percent.

Services

Value added for the service sector was Afs 743006 million in 2017-18, which grew by 3.3 percent whereas; it was 2.3 % in 2016-17.
The service sector share in GDP was 50.7 percent in 2017-18 while it was 51.6 % in the last year.

GDP by expenditure categories

In 2017-18, the total final consumption expenditure was amounted to Afs 1286422 million of which government consumption was Afs 174187 million and private consumption Afs 1112235 million. Expenditure on gross domestic fixed investment amount to Afs 265637 million and exported of goods and services Afs 111027 million and the total amount on imported goods and services (Afs 743827 million) in 2017-18.

Agriculture Development

Afghanistan is an agricultural country of the total area 3 percent is forest and arable area is 12 percent and land under permanent pastures is 46 percent. Remaining is mountain and constructions (39 percent). There are cultivation plant by land face water and rainfall. Rain fed wheat is important for cereal production. Wheat is the major crop for production of cereal. Wheat constitutes of 88 percent consumption. Fruits including watermelon and melon apricot pomegranate, grape produced for consumption and export, also dried fruit and nuts especially apricot and almond is important for export.

Major crops

Wheat

Wheat is major crop for food. Every year cultivated on irrigated and rain fed area wheat production in 2017-18 was 4.3 million tons. Total production of wheat decreased by 6.0 percent compared to 2016-17. Rice production was 0.338 Million tons which decreased by 5.1 percent compared to previous year. This decrease in production was due to decrease in the area of cultivation. Barley production was 0.095 million tons compared to last year decreased by 68.5 percent and maize production was 0.174 million tons compared to last year decreased by 44.2 percent.

Vegetable

Vegetables grown by most farm for market and home consumption. An estimated 8.7 percent of the total irrigated area was planted with vegetables, Potato cultivated area was 32.1 thousand hectares its production was513.2thousand tons, potato yield was16.0tons per hectare. Potato and onion are major vegetables they are specially used for food in the country. Onion area this year was 17721 hectares.

Fruits

Major fruit tree varieties are apple, pomegranates, apricots, mulberries, grapes and almonds. Almost2.7percent of cultivated arable land in 2017-18, 211 thousand hectares was under fruit cultivation. Grapes production was 923.8 thousand tons almost all farming households in the rural area have some fruit trees for self-Consumption. However, orchards are also a major source of income for farmers in many areas of the country and the majority of large to medium sized orchards are exclusively for markets.

Livestock

Livestock is an inseparable part of agriculture there are small numbers of farmers who do not have livestock. In livestock sector, there are different kinds of products such as wool, milk and milk products, meat, skin, and fat. Livestock Products are a major source of income for the farmers and a good food source for the families of farmers also, animals are the only source of income for nomads. Based on reports by provinces agricultural departments, number of cattle's are 4.9 millions, sheep 13.9 millions, goats 7.6millions, chickens 13.6 millions.

Industries Development
Current situation

Industrial sector contributed to GDP by 21.0 % in 2017-18 . Most of industrial productions are Produced for domestic consumption i. e. chemical fertilizer, cement, medicine, wheat flour, bread and other bakery products, meat, dry fruits process, salt, soap, toilet paper, etc.
The value of government sector production descreased by around 1 (from 2251.2 million Afs in 2016-17 to 2253.4 million Afs in 2016-17.
While the value of private sector production descreased by 14.4%(from 4433.8 million Afs in 2016-17 to 5073.1 million Afs in 2016-17).

Mining
Afghanistan is rich in mineral resources and offers potential for considerable future development. Coal, natural gas, salt, marble liquid ammonia has been commercially exploited in the past. There are deposits of iron barites, talc and significant reserves of copper، and also there are some oil reserves. Total value of mining in 2017-18increased by 14.6% compared to 2016-17.

Electricity, water and gas
Electricity
Electricity in the country is being produced by hydro, diesel, and thermal powers station
Electricity production in 2017-18 compared to 2016-17 increased by 2 percent.

Water
There is only one public running water enterprises in Afghanistan. Most of the water sources in the urban areas are from underground water sources and in rural area are from rivers, springs, and underground water.

Gas
Natural gas has potential source while unfortunately currently there is no complete data available. Since Domestic gas is not sufficient for the country some amount of gas for cooking, Heating and lightening purposes is imported from abroad. Which amounted 156.1 million cubic meters in 2017-18.

Construction
The numbers Construction increased by 10 percent in 2017-18 compared to 2016-17. road construction in 2017-18 has increased by 12.5 Percent compared to 2016-17.

Services

Land Transportation

Afghanistan transportation system uses land and air transpiration. In 2016-17 total registered vehicles were 1906938 which increased to 1936686 vehicles in 2017-18 that shows an increase of 1.6 percent. Private cars Increased the most, Lorries increased from 315194 vehicles in 2017-18 to 315194 in 2017-18 and buses Increased from 104543 to 106947 at the same period.

Air Transport

Afghanistan has four international airports and some local airports, three of that are asphalted. Air traffic (the number of flights) has been increasing substantially since the end of war in late 2001. Ariana Afghan Airlines had 5 Active aircrafts/ in 2017-18, of which 1 aircrafts, due to technical problems were inactive. Active Airplanes carried total number of 285 thousand passengers and 1652 tons of goods from different airports. In private sector Safi and East Horizon Airlines was not active and one airline company (Kam Air) is Active, with 7 airplanes, carried 749 thousand passengers in deferent routes.

Communication

Communication has strongly developing since the end of the war. Till 2016-17 total of 30242233 SIM cards were sold by private and mixed communication companies. By 2017-18/ total SIM cards sold by private communication companies were 31808002 SIM cards. During last thirteen years the number of fixed line telephone subscribers has increased substantially. This number increased from 467260 in 2016-17 to 481115 in 2017-18, which shows an increase of 3 percent.

Inflation and Consumer Price Index

The main purpose of the consumer price Index is change in consumer price level and measure of consumer price inflation for the data users. The CPI and its monthly movements are used as key targets for monetary and fiscal policy, as well as adjusting for inflation in business contracts, employees' salaries and retirees' pensions and other social issues.

A Brief Explanation on the CPI Used Methodology

The National CPI follows international recommendations with regard to the concepts, classifications and formula used. It is a weighted aggregate of the CPIs for Kabul, Herat, Kandahar, Nangarhar, Balkh, Khost, Helmand, Bamyan, Kunduz, Badakhshan, Takhar, Paktya, Parwan, Ghazni, Ghor, Kapisa, Sare Pul, Jowizjan, Baghlan and Faryab. The basket includes 290 important goods and services, typically consumed by urban middle and low-income households. For each item, prices are collected from three shops located in the central markets or main shopping streets of each city. A total of about 20010 price quotations are obtained each month. The Laspers formula is used to calculate the CPIs.

National CPI 2017-18

The inflation rate measured by the overall consumer price index (CPI) for the country was 4.4% in 2017-18, whereas it was 4.9 % in 2016-17.

Food Prices Index

The national overall prices for food had increased by 6.0% in 2017-18 as compared to 6.5% in 2016-17.
The highest increase was in Kandahar by 10.4% and followed Ghazni (8.5%).
The main contributory factors to the increase in the national CPI were oils & fats by 3.4%, fruits by 7.4% and vegetables by 20.7%.

Non-food Prices Index

The national non-food prices increased by 2.9% in 2017-18 which increased by 3.5% in 2016-17. The main contributory factors to the increase were tobacco by 5.9%, clothing by 3.2%, housing by 3.9%, transportation by 4.4% and Miscellaneous by 4.2%.

In 2017-18 the highest increase of prices was in Balkh province by 6.8% followed by Sare Pul province (5.8%).

Donor Assistance

Since 2001, several conferences have been held for financial cooperation for Afghanistan.

The latest conference welcomed by international development partners on October 4 2016 at the Afghanistan Peace plan, which provided Afghanistan with an appropriate development and implementation program. Thus, donors have declared their political and development commitment to Afghanistan, 38 countries and international organization, from the participating countries in the Brussels conference, have announced a total of $15.264 billion over the next four years (2017 to 2020) of which $5.6 billion EU countries commitment.

Recent development

In 2017 3.47 US$ Billion aid and the amount of 0.12 Billion US$ loans was committed for the expenses of specific projects. Out of total aid 2.69 US$ billion from aid, and 0.12 US$ billion from loans has been disbursed, which constitutes about 78.27 percent of committed aid and loans.

Amount of the disbursed money was lower than the amount committed and per capita aid also at low level. It is worth mentioning that the amount of 0. 17 US$ Billion was spent by the local NGO's and 0.15 US$ Billion was spent by international NGO's in different sectors. It has to be mentioned that considerable amount of aid was spent in infrastructure of the country.

Bilateral aid

Over all aid committed by bilateral donors in 2017 was 2859.45 US$ millions out of which 2143.78 US$ million had been disbursed (74.97 percent disbursement / committed ratio)
In 2017 Japan disbursed 217.25 US$ millions United State committed 998.08 US$ millions of Which 888.67 US$ millions has been disbursed (89.03 percent disbursement/ committed ratio). Germany committed 549.27US$ millions has disbursed 339.0US$ million (disbursed/committed ratio 61.72 percent). Sweden has disbursed 108.0 US$ millions and Italy had committed 91.56 US$ millions and disbursed 84.47 percent of committed amount Canada also has disbursed 67.22 US$ million. United Kingdom has disbursed 188.67 US$ millions.

Multilateral aids

Over all assistance committed by multilateral donors in 2017 was 605.77 US$ million. The amount paid is 89.49 percent more than the agreed amount. In 2017 Asian Development Bank committed 213.19 US$ million and disbursed 163.48 US$ million (78.69 percent disbursed/committed ratio). European Union committed 262.92 US$ million, disbursed 282.69 US$ million 107.5 percent disbursement. World Bank disbursed 39.82 US$ million. Also the UN Agencies have been paid 34.89 million US$. amount and is mainly aid.

Note: The assistance of internally displaced families have also been included

Terms and concepts of Statistical Yearbook
These technical notes discuss the data, sources, and methods used to compile the indicators in this publication. The notes are organized by table and within each table, by indicator in order of appearance.

Demographic and social statistics
Life expectancy at birth is the number of years a new born infant would live if prevailing patterns of mortality at the time of his birth were to stay the same throughout his/her life.

Population
Population refers to a group of people who at point of time live in a geographic area such as a continent, a country, a city, a village etc.

Population density
Population density is an important indicator which shows the relation between the size of population and the area the population is living in the simple indicator of population density is calculated by dividing population of one area by its total geographic area.

Population growth
Population growth is the change (increase/decrease) in the size of population during a specified time interval which is usually presented as percentage.

Fertility rate (total) is the average number of children that would be born alive to women during her reproductive life, if she were to bear children at each age in accordance with prevailing age-specific fertility rates.

Literate population is defined as the proportion of the population of age 15 and above who can read and write to the total population fifteen and above.
Under 5-mortality rate is the probability that a newborn baby will die before reaching age 5

Crude birth rate
Is annual number of births per 1,000 populations.

Crude death rate
Is annual number of deaths per 1,000 populations.

Adult literacy
Is defined as ability of an adult person who can, with understanding, read and write a short, simple statement on their everyday life.

Access to health care
Is measured by the share of population for whom treatment of common diseases and injuries, including essential drugs on the national list, is available within one hour's walk or travel.

Access to safe water
Shows the percentage of the population with reasonable access to adequate amounts of safe water (including treated surface waters or untreated but uncontaminated water from sources such as springs, sanitary wells, and protected boreholes). In an urban area such a source may be a public fountain or stand post located not more than 200 meters away. In rural areas access implies that members of the household do not have to spend a disproportionate part of the day fetching water.

Access to sanitation
Refers to the percentage of the population with at least adequate disposal facilities that can effectively prevent human, animal, and insect contact with excreta.

Child immunization
Measures the rate of vaccination coverage of children under one year of age for four diseases—measles and DPT (diphtheria, peruses or whooping cough, and tetanus).

National Accounts
The SNA provides a framework for presenting a coherent, consistent and integrated set of macroeconomic accounts, balance sheets and tables. The SNA is found on the concepts and principles of macro-economic theory and the framework is based on a set of internationally agreed concepts, definitions, classifications and accounting rules. It also provides for recording the interactions between different economic agents and groups of agents like households, business companies, government and non-profit institutions who are involved in economic activities. The estimates of macro-economic aggregates compiled in the framework of SNA are called National Accounts Statistics (NAS).

International Standard Industrial Classification
The International Standard Industrial Classification of Economic Activities (ISIC) is the international reference classification of productive activities. Its main purpose is to provide a set of economic activity categories that can be utilized for the collection and reporting of statistics according to such activities.

Gross Domestic Product
Gross Domestic Product is the monetary value of goods and services produced in a country territory during an accounting period.
GDP is the sum of Gross value added of all residents producer unites within the economic boarders of country during a given period of time.

Gross value added
Gross value added is the sum of output minus intermediate consumption of a production process.

Intermediate consumption
Intermediate consumption is the value of goods and services consumed as inputs in the production process.

GDP per capita
GDP per capita is the Gross Domestic Product divide by the total population in current year.

Gross National Income
Gross National Income is GDP plus primary incomes receivable from abroad less primary incomes payable to abroad.

Current Price
Current Price is the monetary value of goods and services at a certain accounting period at the time when the transaction took place

Constant Price
Constant Price is the monetary value of goods and services that takes place at a certain accounting period at a base year period.

Base period
The period that provides weights for indexes is described as the base period and other periods or years compared on it.

GDP price deflator
GDP price deflator is calculated by dividing annual GDP at current price by the corresponding GDP at constant price.

Key sectors in GDP
1- Agriculture
Corresponds to ISIC Agriculture includes cereals, fruits, livestock, forestry and fishing.

2- Industry
This sector includes mining, manufacturing, energy (electricity, gas and water) and construction.

3- Services
This sector includes value added in all other branches of economic activity, i.e. transportation and communication, wholesale and retail trade, hotels and restaurants, banking, insurance, real estate, ownership of dwellings, public administration and defence, NGOs, professional, and personal services including domestic help, education, health care, garage, repair, and other services.

GDP Compilation Approaches
GDP can be compiled by three approaches, namely production, income and expenditure.

1-Production approach
Production approach is the total output minus cost of input good or intermediate consumption (IC) that used in production process.

2-Income approach
The second approach to estimating the value added of different kinds of economic activity consists of summing estimates of its components, that is:

- The compensation of employees or wages and salaries and other benefits (WS),
- The operating surplus, or mixed income (OS),
- The consumption of fixed capital (CA) and
- The net indirect taxes (NT).

In the case of producers of government services and NGOs, the operating surplus is not applicable.

3-Expenditure approach
Expenditure approach involves making independent estimates of the final consumption of the private sector, government, change in stocks, gross fixed capital formation, and imports and exports of goods and services.

Total final consumption expenditure
Total final consumption expenditures the sum of private and government consumption.

Government consumption
Government consumption includes all current expenditure for purchases of goods and services by all levels of government.

Private consumption
Private consumption is the value of all goods and services purchased or received as income in kind by households and non-profit institutions.

Capital formation
Capital formation is that part of current output of the economic activities and imported goods which is not consumed or exported during the accounting period but set aside as addition to Fixed Assets and stock of capital goods.

Fixed capital assets
Fixed capital assets are:

- Durable goods that last more than one year.
- Forthe purpose of production or generating income
- Cost more than US$300
- New construction and major improvements which extend its life period.
- Reclamation and improvement of land and the development and extension of timber tracts, orchards, plantations and similar other agricultural holdings.

Factor services
Factor services comprise income of labour and capital, thus covering income paid to non- resident workers and investment income (receipts and payments on direct investment, portfolio investment, and other investment, and receipts on reserve assets).

Non-factor services
Comprise services on account of freight and insurance, passenger services other transportation travel and other goods and services. These include transactions with non-residents by government agencies and their personnel abroad, as well as transactions by private residents with foreign governments and government personnel stationed in Afghanistan.

Gross domestic savings
Gross domestic savings are calculated as the difference between GDP and total final consumption expenditure.

Consumer Price Index
The CPI describes the movements of the general price level of goods and services bought by households.

Exchange rate
Exchange rate is the prices of per foreign currencies unite versus local currency by the free market vendors.

Total domestic revenue
Total domestic revenue is the sum of tax and non-tax revenue.

Tax revenue
Tax revenue is the sum of direct and indirect taxes.
Direct taxes
Direct Taxes are the taxes that are levied on the income of individuals or organizations.

Indirect taxes
Indirect taxes are those paid by consumers when they buy goods and services.

Import duties
Import duties consist of customs duties, or other import charge, which are payable on goods of a particular type when they inter the economy territory.

Non tax revenue
Is all government receipts; i.e., revenue from capital sales, royalty, fines, administrative fees, and penalties, etc.

Wage and salaries
Wage and salaries consists of all payment in cash, but not in kind, to employees in return of services rendered, before deduction of withholding taxes and employees' contributions to social security and pension funds.

Agriculture
Work and activities of agriculture and agricultural exploitation of the land, livestock, and forests as well as fishing.

Agricultural area
To the land that gets called at the high levels of domains that have been without ups or downs, natural shape on plants flourish and livestock of fodder used it.

Irrigated area
Agricultural land that is included in the length of the season by one of the water sources, such as the sea, springs, irrigation etc

Cultivated rain fed area
The land that is necessary for their water supply through the rain.

Arable land
Is applied to lands that are practically under cultivation plants one year or several years old.

Irrigated land
included on the land under temporary crops plants, meadow of the temporary pasture , garden .

Permanent pasture
The land is applied in the scope of the high levels of a Downs or without downs is supposed to, In that natural plants to form inner essence and stock of the forage use it.

Gardens
It is said that the area plants, planted in several years and included fruitful trees and non fruitful, ornamental plants and vineyards.

Forests
The land it is said that in their natural form to different trees such as needle leaves and other plants stem, and bushes.

Other land
In other words it is the land of the direct use in agriculture has been no and in other cases the Use lands are like rivers, mountains, roads and the industrial centers, oasis and etc.

Total energy use
The use of the Renewable Energy generator like electricity, oil and gas, fuel ,wood and traditional fuels .

Industry
Industry in the sense of, business and art general purpose made a change in the form or the combination of materials .

Industrial sectors
In statistical yearbook for classification of industrial production use ISIC code version 4 .

Foreign trade
Foreign trade refer to transfer of goods and services(imports and exports) between world countries.

Exports
Export means to send or send goods from inside the country to country. In this collection of export export of goods from customs territory country is intended.

Imports
Imports in the meaning inside of goods and services inside the country from other countries , in this one collection to import within the customs territory to goods intended country.

Trade balance
Is the difference between exports f.o.b. and imports c.i.f

Foreign support
Economic aid include grants and loans of the foreign long-in order to use In the field of civilian by the government or international organizations

Aid
Aid payments payable included mostly is that related to the emergency at the time of the occurrence of events Like natural earthquake, flood, only count and etc. takes place and recipient required to help pay the they will not be.

Loan
Debt payments include loans recipient is required to pay back to them.

Bilaterally Aid
The help of the two bilateral assistance that responsibility to its executive responsibility of national institutes and is based on the agreement are , country to country..

Multilaterals Aid
The help that responsibility for it to be responsible for the international institutions in general as a multilateral aid It is known as.
The difference between the help of bilateral and multilateral aid is directly between bilateral The Government change over will be while in the multilateral help a the International Institute for between the two governments of help to a recipient through action.
