PREFACE

This report contains a summary of the results of the Census of Agriculture for KwaZulu-Natal undertaken in respect of 1993. Commercial farming units in the former TBVC states and self-governing territories are not included. Data for the whole of the RSA are published in CSS Report No.11-02-01(1993).

As a result of the poor co-operation of respondents in respect of the 1993 Agricultural Census, the collection of questionnaires could not be concluded on the date planned. In fact a sufficient number of questionnaires was not received in order to provide reliable results on magisterial district level in all cases. Of the net number of 6 080 respondents involved in KwaZulu-Natal, 40,1% did not respond and provision had to be made statistically for these cases. The non-response rate had a substantial effect on the final results in certain areas.

This report was printed by means of a computer. Should your copy of this publication have any unacceptable printing or binding errors, the publication will be exchanged free of charge on receipt of the unsatisfactory copy. Please return it to the CSS's head office at Private Bag X44, Pretoria, 0001 or Steyn's Building, Steyn's Arcade, 274 Schoeman Street, Pretoria.

A list of reports which have been published or will be published shortly in respect of agricultural censuses/surveys as from 1981, appears at the back of the report.

Explanatory notes

1. SCOPE OF THE AGRICULTURAL CENSUS

1.1 For purposes of the agricultural census, farming means -

- the cultivation of field crops, fruit, grapes, nuts, seed, bulbs, vegetables or flowers;
- nurseries, excluding those predominantly engaged in reselling;
- the operation of tea, coffee, sugar, timber or other plantations;
- the breeding of livestock, game, poultry or other animals, including freshwater fish, furred animals and speculation in livestock; and
- the production of milk, cream, wool, fur, eggs or honey,

for commercial purposes.

1.2 Data in respect of agricultural holdings in urban areas, i.e. areas having some form of local authority, are included in this report. Only those cases where the products were intended for sale are included, such as products of nurseries, vegetable gardens, flower farms and dairy farms.

1.3 The data refer to farmers in KwaZulu-Natal who worked on their own or rented farms or farmed land on shares. Data in respect of farmers and farming units in the former TBVC states and the self-governing territories are excluded.

2. DEFINITIONS AND CONCEPTS USED

2.1 Census year - Details relating to the area of the farming unit, the number of working proprietors/tenants and members of the family, the number of paid employees/farm employees, the number of animals and farming debt were requested as at 28 February 1993. Employees' remuneration, gross farming income and expenditure, field crops and horticultural products produced, animals and animal products sold, equipment purchased and the amount spent on the erection of buildings and development work undertaken, refer to the financial year of the farming unit which ended on any date between 1 March 1992 and 28 February 1993, while the market value of farming assets was requested as at the end of the financial year of the farming unit.

2.2 Farming unit - A farming unit consists of one or more separate farms, holdings or portions of land whether contiguous or not, provided they are situated in the same magisterial district and are operated as a single unit. Farms or portions of land situated in different magisterial districts are regarded as separate farming units. The number of farming units, therefore, does not represent the number of farmers, as a specific farming unit can be operated by more than one farmer, and one farmer can operate more than one farming unit.

2.3 Farmer - The farmer is the person, enterprise or establishment conducting farming operations for his/its own account, irrespective of the ownership of the land farmed; or the manager, foreman or any other person in control of the farming activities.

3. COMPARABILITY WITH PREVIOUS CENSUSES/SURVEYS

3.1 In comparing the results of this census with those of previous censuses/surveys the following should be borne in mind -

- alterations in the boundaries of geographical areas;
- fluctuating climatic conditions;
- alterations in branches of farming and
- rotation of crops.

3.2 In cases where the slaughtering, processing and packing of poultry are undertaken by the farmer as an integral part of poultry-farming on the same agricultural unit, these activities are classified under agriculture. Similarly, the drying/processing of tea leaves, if undertaken by the farmer in conjunction with the cultivation of tea on the same agricultural unit, is classified under agriculture. Before 1988 these activities were considered as manufacturing and thus excluded from the agricultural censuses/surveys.

3.3 In cases where stock-farmers, in addition to their normal farming activities, also speculate with livestock, income was included. Before 1988 speculation activities were excluded from the agricultural censuses/surveys.

4. NOTES TO TABLES

4.1 General

4.1.1 In order to ensure the confidentiality of individual respondents' data, products/items were combined in certain cases and in other cases indicated with ".." (not available).

4.2 Table 1 - Principal statistics

4.2.1 Farming units

The total number and the total area of farming units may reflect fluctuations from year to year. These differences can be ascribed, inter alia, to -

- inconsistencies in the areas reported from year to year by individual farmers;
- annual fluctuations in the total number and the total area of the farming units enumerated as a result of, for example, fluctuations in the composition of farming units and temporarily unoccupied (inactive) farming units, which are not included in the survey; and
- continual withdrawal of land for mining, industrial, commercial and residential purposes.

4.2.2 Tables 1.1 and 1.2

4.2.2.1 *"Regular employees" include farm managers/farm foremen and other regular employees who normally do farm work.*

4.2.5.1 The following farming activities are distinguished:

- Field crops
- Horticulture
- Animals

- Mixed.

4.2.5.2 A farming activity is considered as dominant if the gross income from that activity represents the relatively largest portion of the total gross farming income of the farming unit, otherwise it is considered as mixed. Dominance on the 50% level is shown in Table 1.7.1, while that on the 75% level is shown in Table 1.7.2.

. Free housing.
. Free land utilisation.
. Contributions to the Workmen's Compensation Fund and Unemployment Insurance Fund.
. Contributions to the pension, medical and other such funds.

4.5 Tables 7 and 8

4.5.1 Combination of products

- In order to ensure the confidential nature of data furnished by individual farmers, information relating to a few farms is either not released or is published in such a manner that the data furnished by any particular farm are not disclosed. For this reason products with relatively small contributions were either included in the category "other" or in the "total".

4.5.2 Combination of areas

- Magisterial districts in respect of which no data were reported were omitted.

- Magisterial districts with relatively small contributions were combined and shown as the "rest of statistical region" to ensure the confidential nature of data of individual farmers.

4.6 Table 7 - Gross income earned from agricultural activities
