KATA PENGANTAR

Perangkaan Padi Malaysia 2015 merupakan penerbitan ke 32 dalam siri yang sama yang diterbitkan setiap tahun. Antara maklumat penting yang terkandung dalam laporan ini ialah keluasan, hasil, pengeluaran dan varieti padi yang ditanam. Laporan ini diharap akan menjadi bahan rujukan yang berguna bagi agensi dan jabatan yang terlibat dalam perancangan dan pembangunan pertanian, khususnya dalam industri padi.

Saya ingin mengambil kesempatan ini untuk mengucapkan terima kasih kepada Kementerian Pertanian dan Industri Asas Tani, Seksyen Padi, Bahagian Padi Tanaman Industri & Florikultur Jabatan Pertanian, Jabatan-Jabatan Pertanian Negeri, Jabatan-Jabatan Pengairan dan Saliran Negeri dan IADA-IADA di atas sumbangan dan kerjasama mereka dalam mendapatkan maklumat yang diperlukan.

Saya juga ingin merakamkan ucapan terima kasih kepada pegawai-pegawai Unit Perangkaan, yang bertanggungjawab menyediakan penerbitan ini.

Jabatan Pertanian mengalu-alukan komen dan cadangan ke atas data yang dibentangkan untuk memperbaiki keluaran penerbitan ini yang akan datang.

Dato' Ahmad Zakaria bin Mohamad Sidek
Ketua Pengarah Pertanian
Jabatan Pertanian
Semenanjung Malaysia.

PREFACE

Paddy Statistics of Malaysia 2015 is the 32th of annual report published in the series. Among the important information contained in this report are hectareage, yield, production and paddy varieties planted. It is hoped that this publication will serve as a useful reference for agencies and departments involved in agricultural planning and development particularly in the paddy industry.

I would like to take this opportunity to thank the Ministry of Agriculture and Agro-Based Industry, Paddy Sections, Division of Paddy, Industrial Crops & Floriculture, Department of Agriculture, all State Agriculture Departments, State Drainage and Irrigation Departments and IADA for their contributions and assistance in the data collection.

I would also like to thank the officers of the Statistics Unit, who were responsible for the preparation of this report.

The Department of Agriculture welcomes any comments and suggestions on the data presented for the improvement of future issues of this publication.

Dato' Ahmad Zakaria bin Mohamad Sidek
Director General of Agriculture
Department of Agriculture
Peninsular Malaysia.

NOTA KETERANGAN

1. PENDAHULUAN

Padi merupakan tanaman yang ketiga luasnya ditanam di Malaysia selepas kelapa sawit dan getah. Dalam tahun 2015, 681,559 hektar ditanam dengan padi, termasuk padi yang ditanam dua kali setahun. Penerbitan Perangkaan Padi Malaysia 2015 ini dikeluarkan secara tahunan dengan tujuan utama untuk memberi maklumat berkaitan industri tanaman padi untuk perancangan dan pembangunan industri padi.

2. PERSEMBAHAN JADUAL

Jadual-jadual disusun dalam bentuk format yang menggambarkan data semasa, data siri masa dan lain-lain data perangkaan padi. Ia bertujuan untuk membantu pengguna memahami, menganalisis, meramal dan membuat perbandingan arah aliran data padi.

Jadual-jadual dipersembahkan dalam 5 peringkat yang berlainan, iaitu:

i) Jelapang Padi
ii) Daerah
iii) Negeri
iv) Semenanjung Malaysia
v) Malaysia

EXPLANATORY NOTES

1. INTRODUCTION

Paddy is the third most widely planted crop in Malaysia after oil palm and rubber. In the year 2015, 681,559 hectares were planted with paddy including those that are planted twice a year. This report, Paddy Statistics of Malaysia 2015 is published annually with the main objective of providing information in the paddy industry for planning and development of the industry.

2. TABLES PRESENTATION

The data are compiled into formats which depict the current year data, time series data and other paddy statistics in our attempt to assist users in understanding, analysing, forecasting and comparing the trend of paddy data.

The tables are presented at 5 different levels namely:

i) Granary Area
ii) District
iii) State
iv) Peninsular Malaysia
v) Malaysia

Untuk mempersembahkan data yang lebih menyeluruh, data padi juga di kategorikan kepada 3 kumpulan, iaitu:

To give a more complete presentation of the data, the paddy data are also categorised into 3 groups, that is:

i) Keseluruhan Padi
ii) Padi Sawah
iii) Padi Huma (Tanah Tinggi dan Tanah Rendah)

i) Overall Paddy
ii) Wetland Paddy
iii) Dryland Paddy (Upland and Lowland)

3. SUMBER DAN PENGUMPULAN DATA

3. SOURCE AND DATA COLLECTION

Statistik padi disusun dari data yang dikutip melalui:

The paddy statistics are compiled from data collected through:

i) Penyiasatan Hasil Padi
ii) Penyiasatan Keluasan Aktiviti Tanaman Padi

i) Paddy Yield Survey
ii) Paddy Cultivation Activity Area Survey

Dalam Penyiasatan Hasil Padi, satu penyiasatan sampel dilaksanakan setiap musim padi. Data yang diperoleh ialah anggaran purata hasil padi dan maklumat berkaitan amalan kultura.

In the Paddy Yield Survey, a sample survey is implemented during each paddy season. The data collected are estimates on average yield of paddy and information on cultural practices.

Data dari Penyiasatan Keluasan Aktiviti Tanaman Padi diperoleh secara bancian bulanan. Untuk mendapat data ini, pegawai luar membuat lawatan ke ladang dan menganggarkan keluasan tanaman padi/aktiviti berpandukan kepada blok-blok padi yang diwujudkan. Antara data yang dipungut ialah anggaran keluasan bertanam, tuaian, terlibat dan musnah serta keluasan bertanam mengikut varieti.

Data from the Paddy Cultivation Activity Area Survey are obtained by a monthly census. To collect these data, field officers visit the paddy planting areas and estimate hectares of paddy planted/activities guided by paddy blocks created. Among the data collected are estimates on area planted, harvested, affected and destroyed also area planted according to varieties.

Maklumat yang dikumpul adalah dilaporkan oleh jabatan/agensi pelaksana seperti Jabatan Pertanian Negeri,

The data collected are reported by the implementing departments/agencies such as the State Agriculture Departments,

Jabatan Pengairan dan Saliran Negeri dan IADA. Lain-lain perangkaan padi adalah berpunca daripada agensi-agensi kerajaan yang berkaitan dan penerbitan-penerbitan institusi antarabangsa.

4. ISTILAH DAN DEFINISI

(a) Data Tahunan

Data tahunan padi merujuk kepada data yang dilaporkan dalam Musim Utama dan Luar Musim. Contoh, data bagi tahun 2015 merujuk kepada data Musim Utama 2014/2015 dan Luar Musim 2015 dan dilaporkan sebagai Semua Musim dalam laporan ini. Pendekatan ini digunakan untuk mendapat data keluasan bertanam, purata hasil padi dan anggaran pengeluaran padi.

(b) Padi Keseluruhan

Padi keseluruhan ialah data jumlah padi yang merangkumi Padi Sawah dan Padi Huma (tanah tinggi dan tanah rendah).

(c) Padi Sawah

Padi Sawah merujuk kepada padi yang ditanam di sawah padi yang bertakung air semasa peringkat pertumbuhannya.

(d) Padi Huma

Padi Huma ialah padi yang ditanam di kawasan kering sama ada di tanah tinggi atau tanah rendah dan bergantung kepada air hujan sahaja untuk keperluan bekalan airnya.

State Drainage And Irrigation Departments and IADAs. Additional paddy statistics are obtained from the relevant government agencies and publications from international institutions.

4. TERMINOLOGY AND DEFINITIONS

(a) Yearly Data

Yearly data of paddy refers to the summation of data reported in the Main Season and Off Season. For example, data for 2015 refers to the Main Season 2014/2015 data and the Off Season 2015 data and are reported as All Seasons in this report. This approach is used to obtain data on the area planted, average yield of paddy and estimates of paddy production.

(b) Overall Paddy

Overall paddy is the total paddy data which is compiled from the Wetland Paddy and the Dryland Paddy (upland and lowland).

(c) Wetland Paddy

Wetland Paddy refers to paddy planted on water-logged field during it's growing stage.

(d) Dryland Paddy

Dryland Paddy refers to paddy planted on dry areas whether on upland or lowland and depends purely on rainfall for it's water requirements. Tables on yield data and planted area for Wetland Paddy and Dryland Paddy are also included separately in this report.

Jadual-jadual berkaitan data hasil dan keluasan bertanam untuk Padi Sawah dan Padi Huma juga diterbitkan secara berasingan dalam laporan ini.

(e) Musim Utama

Musim Utama ialah tempoh bertanam padi yang tidak memerlukan sistem pengairan secara menyeluruh. Dari segi pentadbiran, Musim Utama ditakrifkan sebagai tarikh padi mula ditanam * antara 1 Ogos hingga 28/29 Februari tahun berikutnya.

(f) Luar Musim

Luar Musim ialah musim kering dan tanaman padi biasanya bergantung kepada sistem pengairan. Dari segi pentadbiran, Luar Musim ditakrifkan sebagai tarikh padi mula ditanam * antara 1 Mac hingga 31 Julai dalam tahun berkenaan.

*** Definisi padi ditanam ialah menabur bagi sistem tabur terus dan mencedung bagi sistem semaian.**

(g) Jelapang Padi

Jelapang Padi ialah skim pengairan yang besar (keluasan melebihi 4,000 hektar) dan diiktiraf oleh Kerajaan dalam Dasar Pertanian Negara sebagai kawasan utama pengeluaran padi. Terdapat 10 jelapang padi di Malaysia, iaitu, MADA, KADA, IADA KERIAN, IADA BLS, IADA P. Pinang, IADA Seberang Perak, IADA KETARA, IADA Kemasin Semerak, IADA Pekan

(e) Main Season

*The Main Season is the period when paddy is grown without depending wholly on any irrigation system. For administrative purposes, Main Season is defined as the commencement date of paddy planting * between 1st August to 28/29 February of the following year.*

(f) Off Season

*Off Season is the dry period and paddy planting normally depends on an irrigation system. For administrative purposes, Off Season is defined as the commencement date of paddy planting * between 1st Mac to 31st July of the year.*

** Definition of paddy planting is sowing for direct seeding system and transplanting for nursery system.*

(g) Granary Areas

Granary Areas refer to major irrigation schemes (areas greater than 4,000 hectares) and recognised by the Government in the National Agricultural Policy as the main paddy producing areas. There are 10 granary areas in Malaysia, namely MADA, KADA, IADA KERIAN, IADA BLS, IADA P. Pinang, IADA Seberang Perak, IADA KETARA, IADA Kemasin Semerak, IADA Pekan and IADA Rompin.

dan IADA Rompin.

(h) Pasel Padi

Pasel padi ialah bahagian tanah yang pada kebiasaannya digunakan untuk penanaman padi.

(i) Faktor Penukaran Padi kepada Beras

Faktor penukaran padi kepada beras adalah berasaskan peratus kadar pemulihan padi seperti berikut:

Semenanjung Malaysia	**65%**
Sabah	**63%**
Sarawak	**60%**

(j) Purata Hasil Padi

Purata hasil dan pengeluaran padi yang dilaporkan adalah berasaskan kepada padi bersih (Kg/Ha). Ini bermaksud padi telah dikeringkan dan dibersihkan serta kandungan kelembapan wap basah tepat pada 14%.

(k) Pembulatan Angka

Jumlah angka-angka komponen mungkin tidak bersamaan dengan angka jumlah kecil atau jumlah besar disebabkan pembulatan.

(h) Paddy Parcel

A paddy parcel is a piece of land which is usually used for planting paddy.

(i) Paddy Conversion Factor to Rice

The conversion factors of paddy to rice are based on percentages of paddy recovery rates as follows:

Peninsular Malaysia	*65%*
Sabah	*63%*
Sarawak	*60%*

(j) Average Yield of Paddy

The average yield and production of paddy reported is based on cleaned paddy (Kg/Ha). This refers to paddy that was dried and cleaned with moisture content at exact 14%.

(k) Rounding of Figures

The sum of the component figures may not tally with the sub-total or total figures due to rounding.
