# INTRODUCCIÓN.

La Dirección General de Economía Agropecuaria, se complace en presentarle el "Anuario de Estadísticas Agropecuarias 2002 – 2003".

Dicho documento contiene el resultado de las diferentes Encuestas Agropecuarias que el Personal de la División de Estadísticas Agropecuarias ha realizado durante el año agrícola en mención.

El sondeo de precios diarios realizado en las principales plazas de mercado previamente seleccionadas del país, ha dado la base para la información relativa a precios de productos agropecuarios contenidos en este documento.

La División de Agronegocios presenta un resumen de las visitas recibidas en los Centros de Agronegocios, así como también las visitas recibidas en el sitio webb.

El quehacer desarrollado por la Dirección General de Economía Agropecuaria, es apoyado por el Departamento de Información Geográfica, cuya misión es la de convertir la información estadística agropecuarias en mapas geográficos, para lo cual en esta oportunidad presentamos 4 mapas que corresponden a los rubros de Granos Básicos ( maíz, frijol, arroz y sorgo ), su superficie y número de productores.

Esperamos que la información presentada, sea una herramienta muy importante para el desarrollo de su trabajo.

# METODOLOGIA

Las estadísticas de producción y comercialización contenidas en este anuario. han sido preparadas por las Divisiones de Estadísticas Agropecuarias y Análisis de Mercado, y tienen como fuente un programa de encuestas y de investigaciones de mercado desarrollado durante el año 2001 - 2002, a través del cual se recopilaron los datos que generaron la información estadística y de mercado que presentamos en esta publicación.

Las encuestas de producción agropecuaria están sustentadas en una serie de técnicas y métodos estadísticos que incluyen el uso de un Marco Muestral por Probabilidad de Areas, construido y estructurado en base al uso intensivo del suelo, clasificado en nueve estratos. Este Marco está diseñado para generar información desagregada a nivel regional y departamental, dicho marco asegura que toda la población de interés esté incluida en la investigación y además, que la totalidad de las unidades de investigación tuvieran igual oportunidad de ser seleccionadas en la muestra.

Con la aplicación de la referida metodología, las unidades de investigación no fueron productores específicos, sino que estas estuvieron constituidas por segmentos de área, es decir superficies de tierra identificadas en fotografías aéreas a escala 1:5000. definidas por límites físicos fácilmente identificables; lo cual garantizó que independientemente de quien fuera el productor, los datos siempre se podrían obtener.

El Marco Muestral estuvo conformado por un número determinado de segmentos a nivel de región, departamento y estrato, habiendo entonces en cada uno de los nueve estratos un número determinado de segmentos. La información correspondiente a los estimados muestrales de cada segmento fue expandida a nivel país mediante factores de expansión (N/n), previamente calculados de acuerdo al departamento y estrato al que corresponden.

Para el diseño y cálculo del tamaño de la muestra se trabajó a nivel nacional, y posteriormente a nivel de departamento, o sea que cada uno de ellos tuvo su propia muestra. Vale la pena mencionar que dentro de cada departamento la muestra estuvo constituida por segmentos provenientes de los diferentes estratos. El tamaño del segmento osciló de acuerdo al estrato al que pertenece, variando de 0.5 a 2.0 kilómetros cuadrados. La muestra investigada fue de 353 segmentos distribuidos aleatoriamente en los 14 departamentos del país. Los segmentos estuvieron constituidos por áreas de terrenos bien definidas, con límites físicos tales como carreteras, caminos vecinales, ríos, quebradas, etc., áreas dentro de las cuales personal técnico de la D.G.E.A., debidamente entrenado, obtuvo los datos de campo mediante entrevistas directas con los agricultores, complementadas éstas con observaciones de los cultivos establecidos y las explotaciones existentes. La información se registró en los formularios de control y boletas diseñadas con este propósito.

Basadas en este Marco Muestral se levantaron las encuesta de Intenciones de Siembra de granos Básicos, Primera de Propósitos Múltiples y finalmente la Segunda Encuesta de Propósitos Múltiples. La Encuesta de Intenciones de Siembra de Granos Básicos, se realizó durante los meses de abril y mayo y tuvo como objetivo obtener datos para elaborar el primer pronóstico de la producción de granos básicos de la cosecha 2001/2002 reflejando posibles áreas de siembra y sus respectivos volúmenes de cosecha.

Posteriormente se desarrolló la Primera Encuesta de Propósitos Múltiples en los meses de junio y julio, ajustándose las cifras de superficie y producción generadas en la encuesta de intenciones de siembra de la cosecha de invierno; obteniéndose además las expectativas de siembra de las cosechas de verano. También, se obtuvo información de otros cultivos, así como de la Producción Pecuaria.

Finalmente durante los meses de octubre y noviembre se trabajó en la Segunda Encuesta de propósitos Múltiples para conocer el comportamiento de las siembras de verano y apante tanto de granos básicos como de otros cultivos, incluyéndose información pecuaria. Se efectuaron observaciones de campo, así como consultas con extensionistas y técnicos involucrados en el sector agropecuario.

La sección de comercialización con información precios, comercio nacional e internacional de granos básicos, productos pecuarios, insumos agrícolas, frutas y hortalizas y productos agroindustriales, fue generada por la División de Análisis de Mercado por medio de un equipo de reporteros de mercado y personal técnico de la División. La información se obtuvo mediante un programa de visitas diarias a las principales plazas de San Salvador y semanales a las cabeceras departamentales. En dichas plazas se realizó un mínimo de cinco entrevistas directas con los señores comerciantes, transportistas, mayoristas y detallistas.

Así mismo, los datos se complementaron con información secundaria obtenida de empresas públicas y privadas relacionadas con las actividades del sector agropecuario, tal es el caso de los informes de aduanas donde se registra toda la información relacionada con el comercio exterior

La información colectada fue sometida a un proceso de revisión y crítica por personal técnico de las Divisiones de Estadísticas Agropecuarias y Análisis de Mercado. Posteriormente, el material fue trasladado a la unidad de Promoción o para su revisión , análisis, publicación y divulgación.

# INDICE DETALLADO

| No. DE CUADRO | CONCEPTO | No. DE PAG |
|---|---|---|
| | **PRODUCCION AGRICOLA**. | |
| 1 | Superficie, Producción y Rendimiento de diferentes cultivos. Año Agrícola 2002 – 2003. | 1 |
| 2 | MAIZ. Retrospectiva: Superficie, Producción é Índices 1991/1992 – 2002/2003. | 2 |
| 3 | MAIZ. Superficie, Producción y Rendimiento por variedad sembrada, según Región, Departamento y cosecha 2002/2003. | 3 |
| 4 | MAIZ. Superficie, Producción y Rendimiento por modalidad de siembra, según Región, Departamento y cosecha. Año 2002 – 2003. | 4 |
| 5 | FRIJOL. Retrospectiva: Superficie, Producción, Rendimiento é Índices. 1991/1992 – 2002/2003. | 5 |

| 36 | MAIZ. Precios Promedio Mensuales a nivel de transportista en Capitales Centroamericanas. Año 2002. | 34 |
| 37 | FRIJOL NEGRO. Precios Promedio Mensuales de Frijol negro a nivel de Transportista en Capitales Centroamericanas. Año 2002. | 35 |
| 38 | FRIJOL ROJO. Precios Promedio Mensual de Frijol Rojo Corriente, a nivel transportista en Capitales Centroamericanas. Año 2002. | 36 |
| 39 | ARROZ. Precios Promedio Mensuales de Arroz 1ª. Clase a nivel transportista en Capitales Centroamericanas. Año 2002. | 37 |
| 40 | MAICILLO. Precios Promedio Mensuales de Maicillo a nivel Transportista en Capitales Centroamericanas. Año 2002. | 38 |
| 41 | GANADO BOVINO. Precios Promedio Mensuales de Ganado Bovino en Pié en Tiangue de Soyapango. Año 2002. | 39 |
| 42 | CARNE DE RES Y CERDO. Precios promedio Mensuales de carne de Res y Cerdo a nivel de Consumidor, en mercados de San Salvador. Año 2002. | 40 |
| 43 | CARNE DE RES, CERDO Y POLLO. Precios Promedio Mensuales al Consumidor, en Supermercados y Carnicerías de San Salvador. (Colones/libra). Año 2002. | 41 |
| 44 | PRODUCTOS PECUARIOS. Precios Promedio Mensuales al por mayor de los principales productos pecuarios en Mercados Municipales de San Salvador. Año 2002. | 42 |
| 45 | PRODUCTOS PECUARIOS. Precios Promedio al consumidor de los principales Productos Pecuarios en Cabeceras Departamentales. Año 2002. | 43 |
| 46 | PRODUCTOS AVÍCOLAS Y LACTEOS. Precios | 44 |

Promedio Mensuales de Productos Avícolas y
Lácteos a nivel de Consumidor en Mercados Municipales
de San Salvador. Año 2002.

47 LECHE. Precios Mensuales al consumidor de leche en 45
polvo y fluida homogenizada. San Salvador. Año 2002.

48 FRUTAS. Precios Promedio Mensuales a nivel Mayorista 46
plaza de San Salvador. Año 2002.

49 FRUTAS. Precios promedio Mensuales a nivel de Consumidor 47
de frutas en Plaza de San Salvador.
Enero – Diciembre 2002.

50 HORTALIZAS. Precios Promedio Mensuales de Hortalizas 48
a nivel Mayorista, en plaza de San Salvador.
Enero – Diciembre 2002.

51 HORTALIZAS. Precios Promedio Mensuales a nivel de 49
Consumidor, en Plaza de San Salvador.
(Enero – Diciembre de 2002)

52 PESCADO Y MARISCOS. Precios Promedio al Mayorista 50
de Pescado y Mariscos en Plaza de San Salvador.
(Enero – Diciembre 2002)

53 PESCADO Y MARISCOS. Precios Promedio al Consumidor 51
de Pescado y Mariscos en Plaza de San Salvador.
(Enero – Diciembre 2002).

**COMERCIO EXTERIOR.**

54 GRANOS BÁSICOS. Exportación de Granos Básicos. 52
(Kilogramos). Año 2002.

55 GRANOS BÁSICOS. Exportación de Granos Básicos 53
(Colones). Año 2002.
