KENYA NATIONAL BUREAU OF STATISTICS

Vision

To be a centre of excellence in production and management of quality statistics.

Mission

To develop, provide and promote quality statistical information for evidence-based decision making.

Core values

- ***Professionalism:*** Strictly abide by professional considerations on the methods, standards and procedures for statistical production.
- ***Confidentiality:*** Guarantee confidentiality of data providers as stipulated in the statistics act.
- ***Collaboration:*** Collaborate with stakeholders so as to enhance the quality of statistical information
- ***Team work***: To embrace teamwork as a hallmark of success. Pursue timely attainment of targeted results at all levels through high level of coordination, networking and collaboration within staff.
- ***Customer Focus:*** Commitment to meet the needs of our customers and always focus on customer satisfaction.
- ***Accountability and Transparency***: Conduct business and lend services to stakeholders in a transparent and accountable manner.
- ***Efficiency and effectiveness***: Promote high productivity, competence and usefulness of resource at the national and county level.
- ***Innovation and creativity***: Committed to innovation, invention, invention, creativity and resourcefulness in service delivery.

Foreword

The implementation of the constitution has created increased demand for comprehensive and disaggregated statistical information to inform evidence based policy formulation, budget process, monitoring and evaluation of various programmes both at the county and national levels has increased over time.

It is on this basis that Kenya National Bureau of Statistics, being the principal agency of the Government for coordinating and supervising all official statistical programs undertaken within the National Statistical System embarked on various statistical activities. One of such key activities is the compilation of county statistical abstract.

The 2015 County Statistical Abstract Report is the first of its kind to be developed in Vihiga County and will be produced annually. This will be a single source of indicators covering various sectors of the economy at the county level. The report has mainly benefited from the administrative data generated in the county. In addition, some indicators were compiled from various survey reports and population and housing censuses.

The report is expected to provide a reliable platform for planning, policy formulation monitoring and evaluation process. The data contained in this abstract will enable data users to gauge the performance of the county.

In conclusion, there is need for collaborative efforts between the County and National Governments in order to improve on the quality of statistical information, enhance dissemination, and accessibility of statistics at the county level.

Saitoti Torome
Principal Secretary
State Department of Planning and Statistics
Ministry of Devolution and Planning

Acknowledgement

The successful production of Vihiga County Statistical Abstract has been made possible through joint and collaborative efforts of producers and users of statistics. The realization of this report was motivated by the increased demand for statistics at both devolved and national levels. To improve on the quality of the future statistical abstracts, the Bureau expects to have timely and reliable data from the data producers within the county that will meet the expectations of the users and suppliers.

First and foremost, I would like to acknowledge the great contribution of Kenya National Bureau of Statistics Board of Directors for conceiving and providing policy direction in development of annual county statistical abstract.

My sincere gratitude goes to H. E. Rev. Moses Akaranga, the Governor of Vihiga County for providing an enabling and conducive environment for compilation of statistics for the county. I also want to County Chief Officers, Directors and their staff who participated in the provision of data.

Special thanks goes to the County Commissioner for coordinating departments representing the National Government. I appreciate the roles played by county departmental heads who provided timely data and also participated in the validation of information contained in this publication.

I acknowledge the great contribution of the Vihiga County Statistical Officer and the County Working Committee for their tireless efforts made to ensure successful compilation of data for the production of this Statistical Abstract.

Finally, I thank the KNBS fraternity, particularly KNBS County Statistical Abstract Secretariat at the headquarters for successfully coordinating various departments, planning, compiling and producing this 2015 County Statistical Abstract.

Zachary Mwangi
Director General
Kenya National Bureau of statistics

Symbols and Conventions Used

The following symbols have been used in this publication "Means they have the same unit”
“..” Means figures not available
“-“ Zero or negligible

Rounding of Figures: In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

Introduction

The Kenya National Bureau Statistics (KNBS) is a Semi-Autonomous Government Agency established by an Act of Parliament (the Statistics Act No.4 of 2006) under the Ministry of Devolution and Planning. The KNBS core mandate includes; the collection, compilation, analysis, publication and dissemination of statistical information for public use, with an additional role of coordinating, monitoring and supervising the National Statistical System (NSS).

The Bureau as the principal government agency responsible for the provision of official statistics has a challenge of providing statistics to both national and county governments.

The constitution has provided for statistics as a concurrent function and this requires the Bureau to have a review of the array of data that it collects to identify what would be consumed at the two levels of government. There is also need to reorganize internal structures so as to measure up to the challenges in provision of statistics for various purposes.

At the national level, KNBS publishes Statistical Abstract and Economic Survey annually. The two documents provide the national government with statistics on performance of various sectors of the economic and other vital indicators. The County Statistical Abstract presents trends of socio-economic and demographic statistics in a series of five years or less depending on the indicator being reported. Tables in Statistical Abstract are detailed and cover all aspects of the Kenyan economy. It is therefore, an excellent reference document on social economic data, research, planning and decision making at the county level.

Constitution of Kenya

Kenya's constitution was enacted on 27th August 2010 replacing the old one that had been in place since Independence in 1963. The constitution provides for a two tier government structure with one National Government and forty seven devolved County Governments.

Structure of County Governments

The County Government consists of two arms, namely the County Assembly and the County Executive. The functions of County Government as contained in the Fourth Schedule (Constitution 2010) include:- Finance and Economic planning; Roads, Public Works and Transport; Health and Sanitation; Education and ICT; Agriculture and Irrigation; Livestock, Fisheries and Veterinary Services; Trade, Industry and Cooperative Development; Land, Housing, Physical planning and Urban Development; Water Development, Environment and Natural resources and Tourism, Culture, Sports and Social Development.

The County Assembly

The County Assembly is vested with the legislative authority of county laws, general oversight of the County Government and Representation of the people. It consists of Members County Assembly (MCAs) elected from different Assembly Wards in the county, nominated MCAs representing special interests such as persons with disability and the youth as prescribed by an Act of Parliament, and the Speaker who is an ex-officio. The head of the County Assembly is the Speaker, who is also the Chairman of the County Assembly Service Board.

The distribution of the County Assembly for Vihiga County is as follows:-

Ex-officio-Speaker	1
Elected MCAs	25
Nominated MCAs	14
Total	**39**

The County Executive

The Executive arm of the County Government comprises of The Governor, The Deputy Governor, The County Executive Committee and the County Public Service. The County Executive Committee is appointed by the Governor with the approval of the County Assembly. The Governor and Deputy Governor are elected by registered voters in the county in a general election, for not more than two terms of five years each. The Governor and Deputy Governor are the head and deputy head of the County Executive, respectively.

The county governor and the deputy county governor are the chief executive and deputy chief executive of the county, respectively. Each county is run by an executive committee, consisting of:

- A governor, elected directly by the people
- A deputy, elected as running mate of the successful candidate for governorship
- A number of committee members not exceeding a third (or ten where a county assembly has more than 30 members) of the members of the respective county assembly
- A county secretary, nominated by the governor and approved by the county assembly, who will double up as head of the county public service, and secretary to the county executive committee

For Vihiga County, the County Executive Committee comprises of:-

The Governor	1
The Deputy Governor	1
The County Secretary	1
The CEC members	10
Total	**13**

Overview of Vihiga County

Vihiga County is one of the four counties of what is loosely referred to as western province. It borders Nandi County to the east, Kakamega County to the north, Siaya County to the west and Kisumu County to the south. The County is made up of five constituencies namely Luanda, Emuhaya, Hamisi, Sabatia and Vihiga. The County lies between longitudes 34°30' and 35°0' E, and latitudes 0° and 0°15' N. It covers a total area of 531.0 Km^2 and about 30 Km^2 forest cover in Hamisi Sub County. The equator cuts across the southern part of the county. Its altitude ranges between 1,300 m and 1,800 m above sea level and slopes gently from west to east. Generally the county has undulating hills and valleys with streams flowing from northeast to southwest and draining into Lake Victoria.

Vihiga County is the second smallest County after Mombasa in terms of size. The County is mainly rural having one of the highest population density in the Country. The county has a hill made up of rocks and is crossed by the equator

The County is dominated by Luhya sub tribes namely Maragoli, Banyore and Tiriki. The Terik who also reside in the County and forms the minority are more of Kalenjin sub tribe.

The main economic activity in the County is Agriculture. The economic activities include small scale farming, bee keeping, and tea processing at Mudete Tea Factory and Jua kali.

Administrative and Political Units

This section presents information on the administrative and political units in the county disaggregated by constituent sub-units. It gives the distribution of administrative units by sub-county, divisions and locations by political units in terms of constituencies and wards.

Notes and Definitions

County: It is an area that is demarcated as a devolved unit as stated under Article 6(1) of the Kenya's Constitution and specified in the First Schedule of the Constitution;

Sub County: Refers to both Administrative Units of National Government and County Government. In most areas it coincide with the Constituency area.

County Assembly: means an assembly constituted in the county in accordance with Article 177 of the Constitution;

Constituency: Is an area demarcated as stated under Article 89 of the Kenya's Constitution for the purpose electing a member of the National Assembly. There are 290 constituencies in Kenya

Ward: Is an electoral area within a county delimited in accordance with Article 89 of the Kenya's Constitution for the purpose of the electing a the member of the County Assembly. There are 1450 wards in Kenya

Table 1.1: Administrative Units by Sub-County, 2014

Sub-County	Division	Location	Sub-location
Sabatia	2	8	31
Vihiga	1	5	17
Emuhaya	2	16	54
Hamisi	4	8	28

Land and Climate

This section contains data on Land Area, topography and climate.

Notes and Definitions

Topography: refers to the geographic features of a location. The features includes the mountains, peaks valleys etc.

Climate: The weather conditions prevailing in an area in general or over a long period or a region with particular prevailing weather conditions. It includes temperature, air pressure, humidity, precipitation, sunshine, cloudiness, and winds.

Rainfall: The amount of rain that falls on an area over a period of time. The rainfall data is for a weather station within each sub county.

Land Area: Refers to an area in square kilometres of the land-based portions of standard geographic areas.

Temperature: Refers to a measure of the warmth or coldness of a place with reference to some standard value.

Table 2.1: Surface area by Category, 2014

Population and Vital Statistics

This section provides information on population and vital statistics by census year; registration of births and deaths by place of occurrence in Vihiga County.

Notes and Definitions

Density: Refers number of persons per square kilometre, obtained by dividing the enumerated persons in a given area by the size of the area expressed in KM^2

Area: Is the extent of a surface enclosed within a specified boundary, expressed in square kilometres. This excludes areas covered by water.

Birth: Birth is the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy.

Death: Death is the permanent disappearance of all evidence of life at any time after live birth has taken place (postnatal cessation of vital functions without capability of resuscitation). This definition excludes fetal deaths.

Expected Birth or Expected Death: Is derived from the prevailing fertility or mortality conditions and total female population of reproductive age or the total population. The number of expected births or deaths is calculated using age-specific birth and death rates.

Place of Occurrence: It is where birth or death occurs.

Coverage rate: Coverage rate is basically the percentage of registered events out of the total number of expected events. Although the denominators ideally should be the total number of events which occurred, the actual number of such events is unknown and hence estimated as 'expected events'.

Births or Deaths Registered at Health Facilities: Refer to births or deaths that occur at a health facility and a notification is issued by a health worker at the facility.

Births or Deaths Registered outside Health Facilities: Refer to births or deaths that occur at home and a notification is issued by an Assistant Chief.

Selected Age Groups: Refer to special age groups as follows:

- Children under one year
- ECDE (3-5 years),
- Primary (6-13 years)
- Secondary (14-17 years)
- Youth (18-35 years),
- Children (under 18 years),
- Voters or Adults (18+ years),
- Women of reproductive age (15-49 years),
- Active Labour Force (15-64 years)
- Elderly (65+ years).

Agriculture

This section provides information on agro–ecological zones, land potential by selected sub-counties, type of crops grown, the total area cropped, amount produced and their value. It also gives information on average retail prices for farm inputs, acreage under irrigation by type of crop grown.

Notes and Definitions

High potential: Clay-loam soil with sufficient manure and good drainage

Medium potential: Sandy-loam soil with high drainage

Low potential: Sandy soil with very high drainage and low manure content

Agro-Ecological Zones (AEZ): Refers to the Division of an area of land into smaller units, which have similar characteristics related to land suitability, potential production and environmental impact. The zone groups are temperature belts defined according to the maximum temperature limits within which the main crops in Kenya can flourish.

Reporting period: The data is reported on calendar year as opposed to seasonal basis. Therefore, for crops where planting and harvesting may take place more than once in the year, the production data is aggregated to get the annual data

Agricultural Area: refer to area under the crop or the area harvested. For a particular crop, the area reported is on what has been harvested

Arable land: Is the land under temporary agricultural crops (multiple-cropped areas are counted only once), temporary meadows and pastures (for less than five years), land under market and kitchen gardens, barnyards, and land temporarily fallow (for less than five years). The abandoned land resulting from shifting cultivation is not included in this category. Data for "Arable land" are not meant to indicate the amount of land that is potentially cultivable.

Crop production: Refers to the actual harvested production from the field and excludes threshing losses and that part of crop not harvested for any reason.

Farm gate Prices: The value of production given in this report uses farm gate prices as the basis of valuation of the production from the county. Farm gate price is the price paid to farmer at the farm level and hence excludes margins on transport.

Table 5.1: Agro-Ecological Zones for the Sub-County, 2014*

Zone	Sub county	Economic Activities
Upper Midland	Sabatia	Tea, Maize, Beans, Vegetables,Bananas and Sweet Potatoes

Livestock

This section provides data on livestock population, production, livestock diseases, and animal slaughter by Sub County. It also provides data on livestock products.

Notes and Definitions

Livestock Primary Products: include products from live and slaughtered animals. Products from slaughtered animals include meat, offals, raw fats, fresh hides and skins. Products from live animals include milk, eggs, honey, beeswax and fibres of animal origin.

Table 6.1: Number, Quantity and Value of Animals Slaughtered by Type, 2013-2014

Energy

Electricity connections for domestic use, small commercial and industrial use and the average annual pump prices and monthly pump prices of various petroleum products are presented in this section.

Notes and Definitions

Domestic use: These are domestic customers. They are Low voltage level (240 /415kV) users

Small commercial: These are medium commercial and industrial customers. They are medium Voltage level (11&33 kV) users

Pump prices: These are the maximum retail petroleum prices calculated by the Energy Regulatory Authority in accordance with Legal Notice No.196 of 2010.

Education

Information on education enrolment by class for pre-primary (ECDE), Primary, Secondary, Technical, middle level colleges and University are given in this section. The indicators that have been computed are Gross Enrolment Rates and the Net Enrolments which provide information on access rate.

Notes and Definitions

Enrolment in Adult and Continuing Learning is mainly non formal. Schools maintained by the Central Government are classified as "Public" whereas those which receive no grant from the national Government are classified as "Private" schools.

Net enrolment rate: Enrolment of the official age group for a given level of education expressed as a percentage of the corresponding population.

Gross enrolment rate: Total enrolment in a specific level of education, regardless of age, expressed as a percentage of the eligible official school-age population corresponding to the same level of education in a given school year.

Public Health

This section provides statistics on health facilities by type and ownership, hospital beds and cots, outpatient morbidity for persons who are under five years old and those who are aged five years and above, registered medical personnel, NHIF and medical students.

Notes and Definitions

Kenya's health system is broadly categorized into six levels of care, namely, Level 1 comprising of the community and outreach level of care, Level 2 representing the dispensaries, Level 3 of health centers and clinics, Level 4 of the district hospitals, Level 5 of the County hospitals, and Level 6 of tertiary national referral hospitals

Health Facility: This is a defined a health service delivery structure from where services are provided e.g. Outpatient, pharmacy, laboratory. Government facilities are the ones which are gazetted and Non-Government facilities are registered with the regulator.

Level 1 – Community Health Unit: This is a health service delivery structure within a defined geographical area covering a population of approximately 5,000 people.

Level 2 – Dispensaries: Refers to the lowest point of contact with the public. These are run and managed by enrolled and registered nurses who are supervised by the nursing officer at the respective health centre.

Level 3 - Health Centres: They have a clinical officer as in-charge and provide comprehensive primary care and mainly focus on preventive care such as childhood vaccination. They are medium-sized units which cater for a population of about 80,000 people.

Level 4 – Sub County hospitals: Are hospitals which are the coordinating and referral centre for the smaller units. They usually have the resources to provide comprehensive medical and surgical services. They are managed by medical superintendents.

***Level 5 - County hospitals*.** These are regional centres which provide specialised care including intensive care and life support and specialist consultations. These are referral points for the sub county hospitals

Level 6 - National referral hospitals: Refers to National referral hospitals offering very specialized services. They are Kenyatta National Hospital, Moi Teaching and Referral Hospital, Mathare Mental Hospital and Nairobi Spinal Injury.

Retail Prices and Consumers Expenditure

This section presents statistics relating to retail and wholesale commodity prices for selected commodities in the County.

Notes and Definitions

Retail and wholesale prices are collected every week from the retail and wholesale markets, respectively, to determine the variation in both retail and wholesale prices. Weighing scales are used to measure the quantity of the commodity to convert non-standard units to standard units.

Table 18.1: Annual Retail Prices of Commodities, 2013-2014
