AGRICULTURAL STATISTICS BALOCHISTAN

2021-2022

Directorate of
Crop Reporting Services
Agriculture Department,
Balochistan, Quetta.

FOREWORD

Issuance of Agricultural Statistics of Balochistan has been a regular feature of the Agriculture Department for the last three decades.

The book has played a vital role in the planning and Development of the Agriculture Department as well as other allied departments, which brings updated information for Researchers, Consultants and Government Functionaries and all those interested in the issues concerning the Agriculture Sector of Balochistan as well as Pakistan's Economy.

The Technical Staff of the Crop Reporting Services (CRS) of the Agriculture Department has made tremendous efforts to publish a comprehensive, informative and useful Agricultural Statistics, however room for improvement is always there.

Any suggestion for improving the format and the contents of this book would be welcomed and acknowledged.

Note:- The reported, Culturable waste and not available for cultivation area of washuk district is not updated due to its seperation from Kharan district. The reported area of Kharan is showing an increase from the Geographical area as because the reported area of Washuk is also included.

Geographcal Area is that area which has been surveyed and calculated by the survey of Pakistan.

Reported Area is the total physical area of the village/Deh, Tehsil or district etc.
Cultivated Area is that area which was sown atleast during the year under reference or during the previous year.Cultivated area = Net Area sown + Current fallow.

Cropped Area means the aggregate area of crops raised in a farm during the year under reference including the area under fruit trees.
Current Fallow is that area which is vacant during the year under reference but was sown at least once during the previous year.
Net Sown is that area which is sown atleast once during (Kharif & Rabi) the year under reference.

Area sown more than once is the difference between the total cropped area and the net area sown.

Cultureable Waste is that uncultivated farm area which is fit for cultivation but was not cropped during the year under reference nor in the year before that.

Forest is the area of any land classed or administered as forest under any legal in enactment dealing for forests. Any cultivated area which may exist within such forest should be excluded (and shown under heading cultivated area).

Area not available for cultivation is that un-cultivated area of the farm which is under farm home-steads, farm Roads and other connected purposes and therefore not available for cultivation.
