The Dataverse files include

- Final STATA data file (.dta) that is ready for analysis
    - Name: EEZ_expl_trimmed_adjusted_20180921.dta
- Two STATA data files with geographical boundaries for use with the *spmap* command
    - Name: EEZ_boundries_corr.dta
    - Name: EEZ_boundries_db_corrected.dta
- The STATA (.do) files that read in the final data file and produces all results in the main text. Please run all do-files from the master do-file named "0_PPR_MasterFile_20180930_JAERE_MainText"

For information about the different datasets used to construct the final STATA data file, see the Online Appendix published together with the paper (Table A.4 and Table A.5).
