XVI. Income

Now I would like to ask you some questions about what your household's income was over the past 12 months.

IN0 Start Time	**IN0** **[ ]**
IN1 (Gross Revenue) What was your household's total gross income over the past 12 months?	**IN1** **[ ]**

Enumerator
(The goal of this section is to come up with an accurate estimate of the households (include all the household members!) income over the past 12 months AND to get as much detail as possible about the sources of the income. Some respondents will be able to tell you what their gross revenue is and then will be able to break it out by source below. Other respondents will know how much they received by source and need help adding it up to get a total. Do not worry about asking questions IN1 and 4 in order. Your calculators will be helpful!)
(The respondent may need help – try asking about revenues last month, then ask if last month was typical – if it is typical, tell the respondent what 12 times the monthly figure is, see if they agree with the amount – should it be higher or lower? By how much? Keep going until the respondent agrees with your figure. Remember this is supposed to be an estimate of the total gross income of the household – all the people who live and eat in the house for at least 6 months out of the year. Remind the respondent to include the value of home produced and consumed items -- rice, for example. Please use the following table to help you and the respondent figure out what revenues for the past year are – as much as possible fill in the table below, but do not worry about it if you do not figure out everything.

IN2 Has anyone in your household received any of the following payments (ask about each payment in the table below) during the past 12 months? 1 - yes, 3 - no

IN4 (If yes) How much did they receive over the past 12 months? (If the respondent knows revenues sources by broader categories than the ones listed below, use column **IN3** to record the category. For example, if revenues for rice farming and other crops are 20,000 Baht, then record 20,000 Baht in column **IN4** row A, and in column **IN3** record A, E to indicate that the 20,000 Baht is for revenues from rice farming and other crops.)
