Task	NBACK (iCere_Control_Pilot2, v210729)
Duration (s)	284 (plus 10s of reference scans for multi echo, as 'Stay very still' screen shown)
Volume #	284 (12 T1 stabilization)
TR (s)	1.00
Stimuli	**FACES** from HCP **SCENES** from Konkle Lab 'Massive Memory' Scene Image Set (especially images used in scene 'localizer' within Josephs & Konkle 2020 *PNAS*) **LETTERS**: 60pt Ariel font consonants (from 430, uppercase: B, C, D, F, G, H, J, K, L, M, N, P, Q, R, S, T, V, Z) **RHYMES**: 16 10-word lists: all words are 1-syllable; lists are matched for length [4-6 letters, mean = 4.7 for all lists] and frequency [mean = 44.08, range = 0.23 across lists] using the Corpus of Contemporary American English (Davies, 2008), vDecember 2015.]
Task requirements	Participants are instructed to fixate a central, white crosshair for the entire run. - During **2-back blocks**, participants press the right index finger key to indicate a match with the stimulus 2 trials back, or the left index finger key for a non-match. - During **0-back blocks**, participants press the right index finger key to indicate a match with the first (cued) stimulus and the left index finger key for a non-match. - For images and letters, "match" = identical; for rhymes, "match" = rhyming words.
Other task notes	At the beginning of each block, a cue indicates 2-back or 0-back.
# of runs	8
Run creation	Each run features 8 blocks (1 0-back and 1 2-back block per category per run). Each block has a cue and 9 trials, including 2 target ("match") trials and 2 lures (repeated non-targets). **Target orders** are balanced across 0-back and 2-back blocks across the 4 categories. Targets are equally likely to appear in each position (T2-T9) across and within each run. **Lure orders** vary (e.g., are not identical within blocks with matching target orders across categories), but lures appear in each position (T2-T9) 16 times each across all runs. Category orders are not repeated across runs, and no categories appear (i.e., as 0-back and 2-back) back-to-back. 0-back and 2-back blocks are counterbalanced (with equal numbers of 0- and 2-back blocks in each block position 1-8). Categories are counterbalanced (with equal numbers of letters, scenes, faces and rhymes in each block position 1-8). The *cross* is not counterbalanced (e.g., with 2-back rhymes or 0-back rhymes each appearing in subsets of block positions 1-8) across runs (see "Detailed Order" below).
Possibility of more runs	Would need more stimuli
Design	Each run includes 8 blocks (one per cue-type per category). Each block includes a cue and 9 trials (25s total). 4 fixation periods (15s each) occur throughout a run (after every 2 stimulus blocks). Within a block, between each stimulus, the crosshair is green. During longer fixation periods (15s), the crosshair is white. All stimuli are shown on a black background. Text (for rhymes and letters) is white. **<u>NBACK1</u>** [12s (+)] : 12s (+), 25s(2-Back RHYMES), 25s(0-Back LETTERS) 15s (+), 25s(2-Back FACES), 25s(0-Back SCENES) 15s (+), 25s(2-Back LETTERS), 25s(2-Back SCENES) 15s (+), 25s(0-Back FACES), 25s(0-Back RHYMES) 15s (+)

Trials/Block/Run	80 stimuli per run, 10 in each block: 40 2-back and 40 0-back, 20 per category
Trial timing	Within a block: each stimulus (including cue) is shown for 2s, followed by 0.5s fixation. 
<table>
<tr><td>Randomization</td><td>Not including cues, targets are equally likely to occur in T2-T9 across blocks. All blocks feature 2 targets and 2 lures. Lures are equally likely to occur across T2-T9 when considering all runs (but differ across blocks, including those matched by category target-wise). 4 runs start with 2-back (1 per category) and 4 with 0-back (1 per category).

Here, 2-Back blocks are in the darker shade and 0-Back blocks the lighter shade of each category-specific color:

Time_Start_Cue(s) indicates the start of the cue for each block, after removal of the 12s for T1 stabilization (starting at 0). For T1-T9, 0 = Non-Match, 1 = Match and L = lure. Within a block, trial 1 (T1) starts 2.5s after Time_Start_Cue(s).
