Date: February 2019

This file contains instructions to reproduce the results in the paper:

"Torn Apart? The Impact of Manufacturing Employment Decline on Black and White Americans" by Eric Gould.

The main data is freely available for all researchers to download from IPUMS USA: https://usa.ipums.org/usa/

The following samples IPUMS were used: ACS 3-YR 2011, 2000 5%, 1990 5% State, 1980 5% State, 1970 1% Metro fm1, 1970 Metro fm2, 1960 5%

The following variables were downloaded from IPUMS into a Stata data set called "usa_00041.dta" on February 11, 2018:

year cpi99 statefip metarea gq ownershp ownershpd valueh perwt nchild nchlt5 sex age marst bpl racesing school educ educd gradeatt gradeattd schltype empstat empstatd labforce occ1990 ind1990 classwkr classwkrd wkswork1 wkswork2 hrswork1 hrswork2 uhrswork absent workedyr incwage incwelfr incsupp poverty marst_mom marst_pop racesing_mom racesing_pop

The variables are defined on the IPUMS website.

To produces the results in all tables and figures, run the following Stata do files (used with Stata 15) in this order:

1. Prepare Men.do
2. Prepare Women.do
3. Regression Results.do

The last do file uses the file "statefip_region_subregion.dta" which is a crosswalk between states, regions, subregions. The last do file also uses "cdc_mortality_MSA_COUNTY_AGE.dta" which contains the mortality rates by county, age, gender, and race. This data was downloaded (freely available) from CDC National Center for Health Statistics: https://www.cdc.gov/nchs/data_access/cmf.htm
