Data Collection Form

R4S/YLABS Study of Cyber Rwanda in Youth Centers

Instructions for documentation

- *Data will be collected through electronic data entry in Qualtrics*
- *There should be only one response per question, unless otherwise specified.*
- *For multiple response questions, each response is coded as a variable with 1 = "yes," and 0="no," and in some cases a third option for "no response" = 2*
- *Do not read response options unless instructions indicate to do so.*
- *If a respondent refuses to answer a question, select "no response" as an option, or in the case of a question with an "other, specify" option, select "other" and type in the letters "NR" in the specify text portion.*
- *If there is a response mentioned that is not pre-coded/programmed, double check to make sure. If sure, then select "other" response and enter the response in the "specify" text field*
- *Occasionally, a 'check' statement or a 'verify' statement is programmed. Follow the instructions regarding these statements to ensure that contradictory or impossible/inaccurate responses are recorded.*
- *Follow any other prompt or instruction.*

Willingness to Pay for methods offered through CyberRwanda (post-intervention assessment only)

READ: CyberRwanda is a digital platform allowing youth and adolescents to place online orders for family planning and menstrual hygiene products. Clients pay for and pick up their products at local pharmacies participating in the project. We want to understand how access to FP methods by adolescents who shop through CyberRwanda can be improved. Specifically, we want to find out how much youth and adolescents like you are willing to pay for the family planning methods they shop for through the CyberRwanda platform.
