This repository includes the Supplemental Information materials with extended results (in .pdf format) as well as data and code to replicate most results in the paper. Specifically, it includes materials to replicate Table 2, Figure 1 (A and B), and Figure 2 (A and B), and Figure 3. Simply download all files to the same local folder, set the working directory accordingly, and execute the code.

- Data files
  - `S01-SurveyBrazil.RData`: File with dataset from nationally representative survey in Brazil (Study #1).
  - `S01-SurveyTurkey.RData`: File with dataset from nationally representative survey in Turkey (Study #1).
  - `S02-dataBrazil.RData`: File with the data from the Brazil version of the survey experiment in Study #2
  - `S02-dataTurkey.RData`: File with the data from the Turkey version of the survey experiment in Study #2
  - `S03-dataBrazil.RData`: File with the data from the Brazil version of the survey experiment in Study #3
  - `S03-dataTurkey.RData`: File with the data from the Turkey version of the survey experiment in Study #3
- Replication Code
  - `S01-Regression&Tables.R`: File with R code for analysis and replication of Table 2 in the paper (Study #1)
  - `S02-dataBrazil.R`: File with R code for analysis and replication of the Brazil portion of Study #2 (Figure 1A in the paper)
  - `S02-dataTurkey.R`: File with R code for analysis and replication of the Turkey portion of Study #2 (Figure 1B in the paper)
  - `S03-dataBrazil.R`: File with R code for analysis and replication of the Brazil portion of Study #3 (Figure 2A in the paper)

- `S03-dataTurkey.R`: File with R code for analysis and replication of the Turkey portion of Study #3 (Figure 2B in the paper)
- `Pooled.R`: Produced the figure for the pooled analysis of Study #2 and #3 (Figure 3 in the paper, and alternative rendering in the Supplemental Information)
