- The STATA version being used is STATA16.1
- The replication may need to install the following packages: blindschemes, coefplot, combomarginsplot, ebalance, fre, mplotoffset, norm

Main Study: WVS Macau Module

- The main analysis uses the WVS Wave 7. One can download the raw dataset from the WVS Data Archive: https://www.worldvaluessurvey.org/WVSDocumentationWV7.jsp
- The do-file for replication is **analysis.do**
- The replication is composed of the following sections:
  1. Data Preparation
  2. Covariate balance tests
  3. Main Analysis
  4. Comparing the sieges sample with post electoral-shock sample
  5. Robustness checks
  6. Mechanism

Google Trends in Macau

- It consists of the following datasets:
  1. **gtrend_2019hkdc+weather.dta** (2019 Hong Kong local election)
  2. **gtrend_2015hkdc+weather.dta** (2015 Hong Kong local election)
  3. **gtrend_CUHK+poly+weather.dta** (University Sieges compared to the 2019 Hong Kong local election)
- The do-file for replication is **google trend.do**, which is for replication of Figure 1 Figure B.1, and Figure B.2.
