Codebook for study1.csv

Total Observations: 6153
Total Variables: 33

Variable: age
  - Description: Age variable
  - Values: ['18-29' '40-49' '50-59' '30-39' '60-69']

Variable: gender
  - Description: Gender variable
  - Values: ['Male' 'Female' 'Prefer not to Answer' 'Other']

Variable: religiosity
  - Description: Religiosity variable
  - Values: ['Traditional' 'Ultra-Orthodox' 'Secular' 'Religious'
'Other']

Variable: male
  - Description: Binary indicator of male
  - Values: [0,1]

Variable: age_num
  - Description: Numeric measure of age
  - Values: [0-4]

Variable: religiosity_num
  - Description: Numeric measure of religiosity
  - Values: [0-4]

Variable: therm_arabs_num
  - Description: Arab feeling thermometer pre-treatment
  - Values: [1-10]

Variable: pooled
  - Description: Binary indicator of treatment assignment
  - Example Values: [0,1]

Variable: personal_vs_control
  - Description: Binary indicator of personal versus control treatment
assignment
  - Example Values: [0,1]

Variable: communal_vs_control
  - Description: Binary indicator of non-personal versus control
treatment assignment
  - Example Values: [0,1]

Variable: organic_vs_control
  - Description: Binary indicator of organic versus control treatment assignment
  - Example Values: [0,1]

Variable: personal_vs_communal
  - Description: Binary indicator of personal versus non-personal treatment assignment
  - Example Values: [0,1]

Variable: arab_therm_pre
  - Description: Arab feeling thermometer (pre-treatment)
  - Values: [1-10]

Variable: arab_therm_pre_na
  - Description: Indicator for whether Arab feeling thermometer is missing pre-treatment
  - Values: [0,1]

Variable: empathy_index_pre
  - Description: pre-treatment empathy variable
  - Values: [0-4]

Variable: empathy_index_pre_na
  - Description: Indicator for whether empathy measure is missing pre-treatment
  - Values: [0,1]

Variable: exposure_positive_pre
  - Description: pre-treatment seek exposure variable
  - Values: [0-4]

Variable: exposure_positive_pre_na
  - Description: Indicator for whether seek exposure measure is missing pre-treatment
  - Values: [0,1]

Variable: therm_arabs_post_num
  - Description: Arab feeling thermometer (post-treatment)
  - Values: [0-10]

Variable: empathy_index_post
  - Description: post-treatment empathy variable
  - Values: [1-4]

Variable: arabs_peace
  - Description: post-treatment measure of support for peace
  - Values: [0-3]

Variable: exposure_index_post

```
  - Description: post-treatment seek exposure variable
  - Values: [0-3]
------------------------------------------------
Variable: video
  - Description: Post-treatment video consumption
  - Values: [0,1]
------------------------------------------------
Variable: page_like
  - Description: Post-treatment page following
  - Values: [0,1]
------------------------------------------------
Variable: bhvr_indx
  - Description: Post-treatment behavioral measure
  - Values: [0,1]
------------------------------------------------
Variable: block_id
  - Description: Experimental block
  - Values: [0-8]
------------------------------------------------
Variable: no_pre
  - Description: Attrition measure, no response to pre-treatment
survey
  - Values: [0,1]
------------------------------------------------
Variable: no_post
  - Description: Attrition measure, no response to post-treatment
survey
  - Values: [0,1]
------------------------------------------------
Variable: no_prepost
  - Description: Attrition measure, no response to pre and post-
treatment
  - Values: [0,1]
------------------------------------------------
Variable: no_post_therm
  - Description: Attrition measure, no response to post-treatment
thermometer
  - Values: [0,1]
------------------------------------------------
Variable: no_post_empathy
  - Description: Attrition measure, no response to post-treatment
empathy measure
  - Values: [0,1]
------------------------------------------------
Variable: no_post_peace
  - Description: Attrition measure, no response to post-treatment
peace measure
  - Values: [0,1]
------------------------------------------------
Variable: no_post_expose
```

  - Description: Attrition measure, no response to post-treatment exposure measure
  - Values: [0,1]
