Replication Files

Patience Across Payday: The Role of Scarcity in Commitment Decisions

Holly Dykstra

January 2025

This replication package reproduces all the figures and tables presented in the main text and the appendix of "Patience Across Payday: The Role of Scarcity in Commitment Decisions." Analysis was done using Stata 18 and requires the estout, ietoolkit, and randcmd packages. To run, place all files in the same directory, and set the Stata working directory to this folder.

Files

- **Data**:
  - data.tab: the primary dataset containing all variables used in the study.
  - stata.dta: the dataset generated by clean.do.
- **Code**:
  - clean.do: cleans and labels data.tab for analysis.
  - analysis.do: uses the cleaned dataset from clean.do (stata.dta) to reproduce the figures and tables found in the article.
