1. Summary

The simulations and codes to produce Figures 1, 2 A1, A3 and A4 are part of the replication package. Stata (we used version 17) and Mathematica (we used version 12) are required.

2. List of figures

Figure 1 is plotted by the Mathematica script Figure 1.nb. The underlying data is generated in Figure1.xlsx.

Figure 2 is plotted in the Stata do-file Figure2.do. The underlying data is generated in Figure2.xlsx.

Figure A1 is plotted in FigureA1.do.

Figure A3 is plotted in FigureA3.do. The underlying data is generated in FigureA3.xlsx.

Figure A4 is plotted in FigureA4a.nb and FigureA4b.nb. The underlying data is generated in FigureA4.do.
