REVIEW OF ECONOMICS AND STATISTICS

QUICK REFERENCE FOR UPLOADING REPLICATION FILES

Link to REStat Data Archive site:

http://dvn.iq.harvard.edu/dvn/dv/restat

1. Login or Create Login account
2. From ALL DATAVERSES,
- click on **R** [listing of all studies beginning with R]
- click on **Review of Economics and Statistics** [currently found on page 2 of R list]
3. Click on **Create New Study**
4. Complete the information template:
- **Title**: complete title as it appears in the journal
- **Original Publication**: This is the citation information for your Article/Note. Please follow the example provided.
- **Study ID**: system-generated
- **Author**: author names and affiliations. If there is more than one author, click on the plus sign at the right to add co-authors' names and affiliations.
- **Contact**: name, affiliation and email of the author to contact regarding the replication files
- **Deposit Date**: system-generated
- **Series**: Volume XX, Issue X: Replace the Xs with the actual volume number and issue number in which your paper is published: For example, Volume **92**, Issue **1**. It is important to maintain this format and not introduce extra characters or spaces.
5. **Save**
6. Click on **Add Files** (top right)
- enter a brief description of the file: such as type README, SPSS, STATA, etc. (note that the system automatically converts SPSS and STATA files to ASCII)
- take advantage of the system's organizational capabilities; it allows users to organize files by categories
7. When you are done uploading your files, click on **Send for review** (top right)

The files will be sent to the REStat editorial office for release to the Data Archive site.

Need to edit your files after they have been released?

- Log into your account at the link above
- Go to ✡[gear symbol to the left of user name] **> Manage Studies:** click on your study
- When you are done editing your files, click on **Send for review.** Again, they will be sent to the REStat editorial office for release to the Data Archive site.
