SAMPLING: In each of the four survey provinces or chagwats, 4 subcounties or tambons selected at random from the 12 original tambons of the cross sectional 1997 survey. One exception causing random replacement: a single tambon per changwat was purposefully selected and reserved for the monthly survey that began in August 1998. Roughly, from one third of the original villages in the 1997 survey, the head (or other committee members) of the selected villages was reinterviewed which results in total 64 villages.

UNIVERSE: All villages in the selected four provinces of Thailand in May 1998.
